Salesforce Salesforce-Slack-Administrator 시험요강:

주제	소개
주제 1	Security: This domain targets Salesforce Security specialists in identifying Slack product security features that meet organizational needs. Candidates will describe how Slack addresses security governance, risk management, and compliance while recommending features that protect sensitive data.
주제 2	Workspace Administration: This domain assesses the competencies of Salesforce administrators in creating and managing Slack workspaces to meet organizational needs. Candidates will determine when a new workspace should be created and manage the approval process for workspace creation.
주제 3	Fundamentals: This section of the exam measures the skills of Salesforce Administrators and covers the key privileges and responsibilities associated with each Slack user role. Candidates will identify unique features of Slack's paid plans and understand the common responsibilities shared by Admins and Owners. Additionally, this section emphasizes the importance of workspace and organization-level settings and dashboards, focusing on how they contribute to effective Slack management.
주제 4	Enabling Slack Success: This section focuses on the skills of Admins to develop a vision for Slack within their organization. Candidates will use analytics dashboards to track usage and make recommendations based on data insights, such as channel archival or promoting best practices.

최신 Salesforce Administrator Salesforce-Slack-Administrator 무료 샘플문제 (Q82-Q87):

질문 # 82

You're an Org Admin at a security-conscious financial services company. You're rolling out Enterprise Mobility Management (EMM) across the organization.

Leadership asks if it is possible to require guests to use the Slack for EMM app.

How should you respond to this request?

(Select the best answer.)

- A. Guests can be required to use the Slack for EMM app.
- B. Guests can only login through the desktop app to access your workspaces.
- C. It's not possible to require guests to use the Slack for EMM app.
- D. Guests are required to use the Slack for EMM app by default.

정답: C

설명:

Slack's documentation on EMM policies specifies:

"Enterprise Mobility Management (EMM) requirements apply only to full members of your Slack organization. Guest accounts (Single-Channel or Multi-Channel Guests) are not required to use the Slack for EMM app." Thus, guests are exempt from EMM enforcement. Options B and C incorrectly state guests can be controlled via EMM. D is unrelated.

질문 # 83

You're an Org Admin at a security-conscious financial services company. You're rolling out Enterprise Mobility Management

(EMM) across the organization. At the last minute, leadership asked if it is possible to require guests to use the Slack for EMM app. How should you respond to this request? (Select the best answer.)

- A. Guests can be required to use the Slack for EMM app.
- B. It's not possible to require guests to use the Slack for EMM app.
- C. Guests can only login through the desktop app to access your workspaces.
- D. Guests are required to use the Slack for EMM app by default.

정답: A

질문 # 84

Your organization recently purchased the Slack Pro plan. As the IT lead, you're responsible for setting up single sign-on (SSO). Which provider is required for the Pro plan? (Select the best answer.)

- A. Azure SAML
- B. G Suite Auth
- C. Okta
- D. AuthO

정답: B

질문 # 85

Moshi is a Workspace Owner on the Plus plan. John is leaving the company on Friday, and Moshi will be deactivating John's IdP account.

What does Moshi need to do to ensure that John won't have access to Slack?

- A. Activate "Just-in-Time" de-activations to automatically remove John and any users who are inactivate for more than 14 days.
- B. Change the email, and reset the password. Changing the email will end John's Slack session.
- C. Check that the IdP supports de-provisioning via SCIM and that the connector app is installed and configured correctly.
- D. Deactivating the IdP account will automatically delete the Slack account that was bound to it via SSO.

정답: C

질문 # 86

You built a workflow using Workflow Builder that shares onboarding info with project team members.

The project has pivoted, and the onboarding workflow info is outdated.

How do you ensure new team members receive the correct information?

- A. Add a new step to your workflow calling out what has changed since the previous iteration.
- B. Download the workflow file, edit the JSON file, and import the updated workflow file.
- C. Delete your workflow and create a new workflow with the updated project information.
- D. Unpublish your workflow, modify the workflow steps, and republish your workflow.

정답: D

설명:

Slack's Workflow Builder guidance states:

"To update an existing workflow, unpublish it, make edits to the steps or messages, and republish it." Editing JSON manually (B) is unnecessary. Adding a step (C) is a patch, not a real fix. Deleting and rebuilding (D) is inefficient when Slack allows direct editing. (Reference: Slack Administration Study Guide - Managing Workflows)
