Cisco 300-810考試 - 300-810題庫下載

人之所以能，是相信能。VCESoft之所以能幫助每個IT人士，是因為它能證明它的能力。VCESoft Cisco的300-810考試培訓資料就是能幫助你成功的培訓資料，任何限制都是從自己的內心開始的，只要你想通過t Cisco的300-810考試認證，就會選擇VCESoft，其實有時候成功與不成功的距離很短，只需要後者向前走幾步，你呢，向前走了嗎，VCESoft是你成功的大門，選擇了它你不能不成功。

最新的 CCNP Collaboration 300-810 免費考試真題 (Q83-Q88):

問題 #83

Which description of an IdP server is true?

- A. consists of pieces of security information that are transferred to the service provider for user authentication
- B. provides user authorization
- **C. authenticates user credentials**
- D. is an authentication request that is generated by a Cisco Unified Communications application

答案： C

解題說明:

SSO uses Security Assertion Markup Language (SAML) to exchange authentication details between an Identity Provider (IdP) and a service provider. The identity provider authenticates user credentials and issues SAML assertions, which are pieces of security information transferred from the identity provider to the service provider for user authentication. Each assertion is an XML document that contains trusted statements about a subject including, for example, username and privileges. SAML assertions are usually digitally signed to ensure their authenticity.
