We guarantee that you will be satisfied with the quality of our Certified Pega System Architect 24 (PEGACPSA24V1) practice questions.

Pegasystems Certified Pega System Architect 24 Sample Questions (Q43-Q48):

NEW QUESTION # 43

Which security feature prevents users from accessing case data they are not authorized for?

- **A. Access Control Policy**
- B. Case Status
- C. SLA Timeout
- D. Work Queue Processing

Answer: A

Explanation:

An Access Control Policy restricts user access to specific case data based on business rules and role assignments. This ensures that only authorized personnel can view or modify sensitive records. It helps prevent data leaks and unauthorized updates. It is widely used in compliance-driven industries.

NEW QUESTION # 44

Which type of data source retrieves external data in real-time?

- A. Lookup Table
- B. Value List
- **C. Connector**
- D. Data Transform

Answer: C

Explanation:

A Connector integrates with external systems to retrieve real-time data when needed. It allows Pega to interact with web services, REST APIs, and databases. This ensures that applications use the most up-to-date information. Connectors improve system interoperability and data accuracy.

NEW QUESTION # 45

Which Pega component is used to define user roles and access permissions?

- **A. Access Group**
- B. SLA Rule
- C. Case Lifecycle
- D. Work Queue

Answer: A

Explanation:

An Access Group defines user roles, application access, and security privileges. It determines what functionalities users can access, ensuring role-based control. Access Groups improve security by restricting unauthorized actions. They are critical for managing permissions in enterprise applications.

NEW QUESTION # 46

What is the benefit of adding instructions to case steps?

- **A. They ensure automated routing of tasks**

- B. They enforce security restrictions
- **C. They guide users in completing assignments**
- D. They replace validation rules in decision making

Answer: C

Explanation:

Instructions help guide users on what needs to be done at each step, reducing errors and improving efficiency. They provide clear contextual information, ensuring consistency in execution. Instructions can be customized per step or assignment. They do not affect security, automation, or validation rules.

NEW QUESTION # 47

Which feature allows reusing rules across multiple applications?

- A. Case Routing
- **B. Ruleset Versioning**
- C. SLA Deadline Manager
- D. Work Queue Distribution

Answer: B

Explanation:

Ruleset Versioning enables rules to be modular, reusable, and updated without affecting existing applications. This improves maintainability and reduces redundant rule creation. SLA deadlines, work queues, and case routing do not manage rule reuse.

NEW QUESTION # 48

.....

The PEGACPSA24V1 practice test is supported by all major browsers such as Chrome, IE, Firefox, Safari, and Opera. This Certified Pega System Architect 24 (PEGACPSA24V1) practice test consists of real Certified Pega System Architect 24 (PEGACPSA24V1) exam questions and thousands of customers have successfully cleared the PEGACPSA24V1 Exam with confidence.
