

New NCP-CN Test Testking | Exam NCP-CN Simulator Fee

What's more, part of that ActualCollection NCP-CN dumps now are free: <https://drive.google.com/open?id=1EnBX7oBz3C4W2o5j-jCXUo7F11tFO6zj>

In this high-speed world, a waste of time is equal to a waste of money. As an electronic product, our NCP-CN real study dumps have the distinct advantage of fast delivery. On one hand, we adopt a reasonable price for you, ensures people whoever is rich or poor would have the equal access to buy our useful NCP-CN real study dumps. On the other hand, we provide you the responsible 24/7 service. Our candidates might meet so problems during purchasing and using our NCP-CN Prep Guide, you can contact with us through the email, and we will give you respond and solution as quick as possible. With the commitment of helping candidates to pass NCP-CN exam, we have won wide approvals by our clients. We always take our candidates' benefits as the priority, so you can trust us without any hesitation.

If you want to pass your exam and get the certification in a short time, choosing the suitable NCP-CN exam questions are very important for you. You must pay more attention to the Nutanix NCP-CN Study Materials. In order to provide all customers with the suitable study materials, a lot of experts from our company designed the NCP-CN training materials.

Exam NCP-CN Simulator Fee & Valid Exam NCP-CN Practice

Don't let the Nutanix Certified Professional - Cloud Native v6.10 exam stress you out! Prepare with our NCP-CN exam dumps and boost your confidence in the NCP-CN exam. We guarantee your road toward success by helping you prepare for the NCP-CN exam. Use the best Nutanix NCP-CN practice questions to pass your NCP-CN Exam with flying colors! In this way, the Nutanix Certified Professional - Cloud Native v6.10 certified professionals can not only validate their skills and knowledge level but also put their careers on the right track. By doing this you can achieve your career objectives.

Nutanix NCP-CN Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Prepare the Environment for an NKP Deployment: This section of the exam measures the skills of infrastructure engineers and cloud administrators and covers the initial setup tasks needed for NKP deployment. Candidates must demonstrate the ability to seed a private container registry, create a bootstrap Kubernetes cluster, and determine license tiers suitable for clusters. They also need to prepare a bastion host for secure access, build machine images or prepare nodes for deployment, and gather all necessary information to build a cluster on the target cloud or on-premises provider.
Topic 2	<ul style="list-style-type: none"> Perform Day 2 Operations: This part assesses the expertise of site reliability engineers and cluster operators in ongoing cluster management tasks after deployment. It includes configuring authentication and authorization mechanisms, setting up logging systems, and implementing cluster backup and recovery procedures. Candidates also need to demonstrate skills in monitoring cluster performance and health, configuring autoscaling to handle workload changes, and performing lifecycle management functions such as upgrades and maintenance.

Topic 3	<ul style="list-style-type: none"> • Conduct NKP Fleet Management: This section tests the abilities of platform administrators and cloud operations engineers in managing multiple clusters as a fleet. It focuses on configuring workspaces to organize clusters, deploying workload clusters within these workspaces, and attaching or detaching clusters as needed. Additionally, candidates must be able to configure projects for workload segmentation and manage platform applications that support the overall NKP environment.
Topic 4	<ul style="list-style-type: none"> • Manage Building an NKP Cluster: This section evaluates the skills of Kubernetes administrators and platform engineers in customizing and deploying NKP clusters. Candidates must show proficiency in tailoring cluster configurations to meet specific requirements and deploying Kommander, the management platform, while applying the appropriate licenses to enable cluster features and management capabilities.

Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q19-Q24):

NEW QUESTION # 19

A Platform Engineer is deploying a new NKP cluster that has internet connectivity. Now, a Cloud Administrator and Security Administrator are discussing the security of communications between the NKP Kubernetes cluster and the container registry. The engineer proposes to have an on-prem private registry.

What is the most significant reason that the engineer should create a private registry instead of configuring a secure connection between the NKP cluster and Github (SaaS)?

- A. NKP requires specific registry versions.
- B. Private registry license is included with NKP.
- **C. Private registry provides security and privacy.**
- D. NKP cannot connect to public clouds.

Answer: C

NEW QUESTION # 20

A company has been modernizing on cloud-native platforms for the past few years and has been running some small consumer support utilities on their production NKP cluster. After a thorough testing and QA cycle with simulated workloads on a development cluster, the company is ready to bring their online retail application into the fold. While they have sufficient system resources to scale the NKP cluster properly from a performance standpoint, they also want to ensure they properly scale their monitoring stack's resource settings to retain a sufficient amount of data to see how overall system resource utilization trends for the NKP cluster over several months' time with the added workloads. Which NKP Platform Application component should the company be most concerned with adjusting, and how should their Platform Engineer adjust it?

- A. Adjust the resource settings for Fluent Bit by increasing its container resource limits and memory settings, as well as its storage.
- B. Adjust the number of replicas for the Fluent Bit deployment, as well as increase the amount of storage available for use by the NKP cluster.
- C. Adjust the number of replicas for the Prometheus deployment, as well as increase the amount of storage available for use by the NKP cluster.
- **D. Adjust the resource settings for Prometheus by increasing its container resource limits and memory settings, as well as its storage.**

Answer: D

NEW QUESTION # 21

When deploying NKP using the Nutanix provisioning method (CAPX), what are the supported OS platforms?

- A. Flatcar, Rocky Linux, and Ubuntu
- B. CentOS and Ubuntu
- C. CentOS and Rocky Linux
- **D. Rocky Linux and Ubuntu**

Answer: D

NEW QUESTION # 22

Prior to implementing NKP, a company had created a number of Kubernetes (K8s) clusters using kubeadm.

While they are deploying new managed clusters via NKP, the company does not wish to migrate workloads from these pre-existing native K8s clusters over to new NKP clusters just yet.

What are the requirements to have these clusters attached to their NKP management cluster?

- A. An NKP management cluster admin account must be established on the K8s clusters.
- **B. The NKP management cluster must be able to reach the services and api-server of the target cluster.**
- C. The version of the K8s clusters must be within N - 1 of the Kubernetes version of the NKP management cluster.
- D. The version of the K8s clusters must match the Kubernetes version of the NKP management cluster.

Answer: B

Explanation:

As per the NKPA 6.10 documentation, the primary requirement for attaching external (self-managed) Kubernetes clusters to NKP is network connectivity. Specifically, the NKP management cluster must be able to communicate with the Kubernetes API server and relevant services of the target cluster. This allows NKP to collect metrics, perform health checks, and manage the attached cluster through Kommander and associated tools.

Exact extract:

"For attaching existing Kubernetes clusters, ensure the NKP management cluster can reach the Kubernetes API server of the target cluster and that the kubeconfig used has sufficient permissions." There is no requirement that the Kubernetes versions be exactly matched or within N-1, nor that an NKP admin account be directly established on the target clusters; the connectivity and valid kubeconfig file are the essential requirements.

NEW QUESTION # 23

A Cloud Engineer is deploying an NKP Cluster in AWS. The environment is for testing purposes only, so the AWS team has requested it be deployed to use a minimal set of system resources to reduce cloud subscription fees. Which two parameters should be specified when initializing a Kommander installation, using the `nkp install kommander` command set? (Choose two.)

- A. `--yaml`
- B. `--request-timeout`
- **C. `--init`**
- **D. `--wait-timeout`**

Answer: C,D

NEW QUESTION # 24

.....

The pass rate is 98% for NCP-CN exam bootcamp, and if you choose us, we can ensure you that you can pass the exam and obtain the certification successfully. In addition, NCP-CN exam materials are edited by professional experts, therefore they are high-quality, and you can improve your efficiency by using NCP-CN Exam braindumps of us. We offer you free demo to have a try before buying NCP-CN training materials, so that you can know what the complete version is like. We have online and offline chat service for NCP-CN training materials, and if you have any questions, you can consult us.
