Nowadays, using electronic CPIM-8.0 exam materials to prepare for the exam has become more and more popular, so now, you really should not be restricted to paper materials any more, our electronic APICS CPIM-8.0 preparation dumps will surprise you with their effectiveness and usefulness. I can assure you that you will pass the exam as well as getting the related CPIM-8.0 Certification under the guidance of our CPIM-8.0 training materials as easy as pie.

APICS CPIM-8.0 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Quality, Technology, and Continuous Improvement: This section assesses skills of Quality Assurance Specialists, focusing on quality assurance methodologies enhanced by technology to drive continuous improvement efforts. A key skill measured here is "enhancing quality metrics."
Topic 2	<ul style="list-style-type: none"> Supply: This module tests the competencies of Procurement Specialists in managing supply chains effectively. It involves creating master schedules for production planning, maintaining these schedules over time, material requirements planning (MRP), capacity requirements planning (CRP), supplier management practices, and purchasing strategies during product life cycle changes. A key skill measured here is "validating master schedules."

Topic 3	<ul style="list-style-type: none"> • Demand: This section evaluates the abilities of Demand Analysts in managing demand through forecasting techniques. It explores sources of demand data for accurate forecasting and evaluating forecast performance to improve future predictions. One important skill evaluated is "forecasting demand accurately."
Topic 4	<ul style="list-style-type: none"> • Sales and Operations Planning: This module assesses the skills of Operations Planners in terms of sales and operations planning processes. It includes understanding the purpose of S&OP, creating aggregate demand plans, and reconciling these plans to ensure alignment between sales forecasts and operational capabilities. A crucial skill measured is "reconciling supply-demand gaps."
Topic 5	<ul style="list-style-type: none"> • Inventory: The inventory module evaluates the skills of Inventory Controllers, covering inventory planning principles such as determining optimal stock levels based on costs versus benefits analysis metrics like ABC classification systems used globally today along with itemized inventory control mechanisms ensuring efficient stock turnover rates while minimizing holding costs. Distribution: This section measures the abilities of Logistics Coordinators, focusing on distribution network design principles that optimize replenishment orders efficiently while considering reverse logistics practices aimed at reducing waste through proper disposal methods according to environmental regulations.
Topic 6	<ul style="list-style-type: none"> • Supply Chains and Strategy: This section of the exam measures the skills of Supply Chain Managers and covers various aspects related to supply chains, including their interaction with the environment and strategic objectives. It delves into developing organizational strategies, functional strategies, performance monitoring using KPIs, risk management, capital equipment management, and sustainability strategies. A key skill assessed here is "analyzing market trends."

APICS Certified in Planning and Inventory Management (CPIM 8.0) Sample Questions (Q518-Q523):

NEW QUESTION # 518

A large organization that processes protected data issues preconfigured laptops to workers who then access systems and data based on their role. As their technology ages, these laptops are replaced with newer devices. What is the BEST solution to mitigate risk associated with these devices?

- A. Establish a physical destruction process for the storage medium
- B. Establish a process preventing credential storage on devices.
- C. Establish a process for check in and check out of devices.
- D. Establish a device recycle process.

Answer: A

NEW QUESTION # 519

Long lead-time items with stable demand would best be supported by a supply chain:

- A. linked through an enterprise resources planning (ERP) system.
- B. designed to be responsive.
- C. using a pull system.

- **D. positioning inventory close to the consumer.**

Answer: D

Explanation:

Long lead-time items with stable demand are best supported by a supply chain that positions inventory close to the consumer. This reduces the risk of stockouts and improves customer service levels. It also allows the supply chain to buffer against demand variability and supply disruptions. Positioning inventory close to the consumer is a form of postponement strategy, where the final assembly or customization of products is delayed until the customer order is received¹². Reference: EXAM CONTENT MANUAL PREVIEW, page 9, section 3.1.2. [Strategic Supply Chain Management: The Five Core Disciplines for Top Performance, Second Edition], page 63, section 3.2.

NEW QUESTION # 520

The results of a threat campaign show a high risk of potential intrusion. Which of the following parameters of the Common Vulnerability Scoring System (CVSS) will MOST likely provide information on threat conditions for the organization to consider?

- A. Modified base metrics
- B. Remediation level
- **C. Attack complexity**
- D. Integrity requirements

Answer: C

NEW QUESTION # 521

The primary benefit that results from the cross-training of employees is:

- **A. improved flexibility.**
- B. improved capacity.
- C. shortened lead time.
- D. effective problem-solving.

Answer: A

Explanation:

Cross-training employees is the process of training employees for skills and job roles they weren't initially hired for. This allows them to switch between different tasks and roles when needed, which increases the flexibility and adaptability of the workforce. Cross-training also enhances the problem-solving, communication, and collaboration skills of the employees, but the primary benefit is improved flexibility¹² Reference: 1: 9 Major Benefits of Cross-Training Employees Effectively 2: Employee cross-training: 8 benefits you can't afford to miss

NEW QUESTION # 522

A security engineer is implementing a Supervisory Control and Data Acquisition (SCADA) system. What is the BEST action the engineer can take to ensure secure operations?

- **A. Conduct logging and monitoring of the system and apply need to know and least privileges.**
- B. Refer to the SCADA risk assessment and industry standards.
- C. Review the organizational Standard Operating Procedures (SOP).
- D. Refer to the organization's SCADA security standards and policies.

Answer: A

NEW QUESTION # 523
