- A. Generate unit-tests for ABAP classes and CDS views.
- B. Generate business objects using the ABAP RESTful application programming model.
- C. Generate digital assistants.
- D. Generate integrations with preconfigured connectors.

Answer: A,B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract: Generative AI enhancements in ABAP Cloud include generating unit tests for ABAP classes and CDS views to improve testing efficiency, and generating business objects using the ABAP RESTful Application Programming Model (RAP) to streamline development and maintain a clean core approach.
Exact extracts supporting this:
Generate unit-tests: "New generative AI capabilities are designed to help you write, optimize, and test ABAP code more efficiently."community.sap.com Generate business objects: "The first scope of features will cover business object ..."learning.sap.com "Generative AI for ABAP development. With new ABAP capabilities, Joule can now help ABAP developers be more efficient with their development ..."community.sap.com Other options are incorrect because:
Option A: Generating digital assistants is not a specific enhancement in ABAP Cloud; Joule is the assistant, but generation is for code artifacts.
Option D: Generating integrations is supported in broader SAP Build, but not highlighted as a generative AI enhancement specific to ABAP Cloud.
Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Extracted from SAP Help Portal "Generative AI in ABAP Cloud" and community blogs like "Unveiling today: SAP Build meets ABAP Cloud."
These position generative AI for code generation and testing in ABAP as part of custom AI solutions in the SAP Business Suite, per C_BCBAI_2502 certification.

Option C: SAP supports a range of LLMs, including proprietary ones, but does not position effective AI specifically on open-source models; focus is on secure, business-grounded AI.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from the SAP Learning Journey "Boosting Your Cloud Transformation Journey with SAP Business AI and Generative AI," specifically the unit "Building Custom SAP Business AI Solutions," which highlights effective AI's reliance on data foundations and integration.
