

# Pass Guaranteed Quiz 2026 Cisco 300-535: Automating and Programming Cisco Collaboration Solutions Unparalleled Real Exam Questions

BTW, DOWNLOAD part of PracticeTorrent 300-535 dumps from Cloud Storage: [https://drive.google.com/open?id=1eK\\_jMAVyCVBNVACPi\\_u7QkfkB5GcI-RP](https://drive.google.com/open?id=1eK_jMAVyCVBNVACPi_u7QkfkB5GcI-RP)

As far as our Cisco 300-535 study guide is concerned, the PDF version brings you much convenience with regard to the following advantage. The PDF version of our 300-535 learning materials contain demo where a part of questions selected from the entire version of our 300-535 Exam Quiz is contained. In this way, you have a general understanding of our Cisco 300-535 actual prep exam, which must be beneficial for your choice of your suitable exam files.

Cisco 300-535 exam aims to validate the candidate's knowledge and skills in automating and programming Cisco collaboration solutions. Professionals who pass 300-535 exam demonstrate their ability to use various automation tools and programming languages to enhance the functionality of Cisco collaboration solutions. Automating and Programming Cisco Collaboration Solutions certification also validates the candidate's knowledge of various Cisco collaboration platforms such as Webex Teams, Unified Communications Manager, and Expressway. With the Cisco 300-535 Certification, professionals can enhance their career prospects and become valuable assets to their organizations.

One of the main objectives of the Cisco 300-535 certification exam is to validate the candidate's knowledge and skills in automating and programming Cisco Collaboration Solutions. 300-535 exam covers various topics such as Python programming, REST APIs, and scripting. Candidates are expected to be proficient in these areas and have hands-on experience in automating and programming Cisco Collaboration Solutions.

## Test 300-535 Vce Free & 300-535 Passing Score

The Cisco 300-535 exam practice questions are being offered in three different formats. These formats are Cisco 300-535 web-based practice test software, desktop practice test software, and PDF dumps files. All these three Cisco 300-535 exam questions format are important and play a crucial role in your Automating and Programming Cisco Collaboration Solutions (300-535) exam preparation. With the Cisco 300-535 exam questions you will get updated and error-free Automating and Programming Cisco Collaboration Solutions (300-535) exam questions all the time. In this way, you cannot miss a single 300-535 exam question without an answer.

## Resources Helping to Come Up With Flying Colours in Cisco 300-535 Exam

Success in the Cisco 300-535 exam will open-up many doors and possibilities as it is related to the three most notable Cisco certifications. However, it is not as easy as it sounds. One needs to access quality and updated study resources to secure passing grades.

- **Training**

The vendor offers a professionally designed training module to help you master the exam topics and successfully pass Cisco 300-535. It is a 3-day long course that is available via in-person instructor-led, online instructor-led, and e-learning mode. Candidates can choose the delivery method at their convenience. This program is useful for those willing to learn more about utilizing programmability to scale and streamline infrastructure for the Service Provider Network. Attending these sessions also earns one 24 CE credits towards re-certification.

This course is an ideal blend of lectures and lab sessions, so you'll be gaining experience in handling the modern data models hassle-free. Service Provider and Network Automation technology areas are well covered in it. However, before you think of enrolling in training, make sure you are skilled in Routing and Switching (R and S) as much as the CCNP network programmers are, and have good knowledge of Cisco Internetworking OS (IOS XE). Having the experience of working with Cisco IOS XR is also needed.

- **Books and Other Resources**

Books are useful resources when fruitful self-study is the aim. Candidates can refer to the exam guide, offered by the vendor, for knowing the topics in detail. Besides it, the material "How I Passed Automating and Programming Cisco Service Provider Solutions (300-535 SPAUTO) Exam" is also a good option for this purpose. Prepared by Rocismo Liolentz Publications details and tips for success in this test and is particularly helpful to understand how to acquire great scores. The book is available in the Kindle edition.

## **Cisco Automating and Programming Cisco Collaboration Solutions Sample Questions (Q49-Q54):**

### **NEW QUESTION # 49**

A user is debugging a problem with model-driven dial-in/out streams with gRPC for a Cisco IOS XR implementation. There is no streaming data and the path is not resolved when the show telemetry model-driven subscription command is issued on the router. What is the cause of the problem?

- A. There is no support for IOS XR 64-bit.
- B. SNMP is not enabled.
- C. There are polling interval problems.
- **D. The emsd process is not running.**

**Answer: D**

Explanation:

Reference: <https://community.cisco.com/t5/service-providers-documents/implementing-gRPC-telemetry-on-xr-devices/ta-p/3393966>

### **NEW QUESTION # 50**

```

module abc_service {
  namespace "http://com/abc/service";
  prefix abc_service;

  import ietf-inet-types { prefix inet; }
  import tailf-ncs { prefix ncs; }
  imports tailf-common { prefix tailf; }
  import tailf-ned-cisco-ios { prefix ios; }

  augment "/ncs:services" {

    list abc_service {
      key "name";
      ncs:servicepoint "abc_service";

      leaf name {
        mandatory true;
        type string;
      }
      list link {
        key "router_name";

        leaf router_name {
          mandatory true;
          type leafref {
            path "/ncs:devices/ncs:device/ncs:name";
          }
        }
      }
    }
  }
}

```

Refer to the exhibit. Based on the YANG presented, what is the correct xpath to retrieve the router named "ios-device" under the "CustomerA" service name?

- A. /ncs:abc\_service/CustomerA/ios-device
- B. /ncs:service/abc\_service/"CustomerA"/ios-device
- C. /ncs:services/abc\_service/CustomerA/ios-device
- D. /abc\_service/CustomerA/"ios-device"

**Answer: C**

Explanation:

Section: 3.0 Network Device Programmability

**NEW QUESTION # 51**

Refer to the exhibit.

```
tasks:
- name: run show version on remote devices
  iosxr_command:
  commands: show version
```

What must be added after the last line of the Ansible playbook to check if the output contains "IOS-XR"?

- A. `wait_for: result[0] contains IOS-XR`
- B. `wait_for_connection:`
- C. `notify: "IOS-XR"`
- D. `wait_for: result[1] contains "IOS-XR"`

**Answer: A**

#### NEW QUESTION # 52

Fill in the blank to complete the statement about NETCONF and Python libraries.

\_\_\_\_\_ is a Python library that facilitates client-side scripting and deploying changes to the network using the NETCONF protocol.

**Answer:**

Explanation:

ncclient

#### NEW QUESTION # 53

Refer to the exhibit.

```

def configure_ip_address(interface, ip, length):
    url = BASE_URL + "/data/ietf-interfaces:interfaces/interface={i}".format(
        i = interface
    )
    data = OrderedDict(
        [
            (
                "ietf-interfaces:interface",
                OrderedDict(
                    [
                        ("name", interface),
                        ("type", "iana-if-type:ethernetCsmacd"),
                        (
                            "ietf-ip:ipv6",
                            OrderedDict(
                                [
                                    (
                                        "address",
                                        OrderedDict([("ip", ip), ("prefix-length", length)]),
                                    )
                                ]
                            )
                        )
                    ]
                )
            )
        ]
    )

    response = requests.put(
        url, auth=(USERNAME, PASSWORD), headers=HEADERS, verify=False, json=data
    )

    print(response.status_code)

configure_ip_address("GigabitEthernet2", "2001:db8:636c:6179:2063:7572:7469:7300", "64")

```

What is the effect of the script on the device?

- A. All interfaces except GigabitEthernet2 are reset to their default configurations.
- **B. It merges the new configuration with the existing configuration on the device using RESTCONF.**
- C. It replaces the entire configuration for GigabitEthernet2 on the device using RESTCONF.
- D. It compares the configuration to the device. If it matches, the device sends back an HTTP 204 status code.

**Answer: B**
