ユニークPalo Alto Networks PCNSE｜高品質なPCNSE日本語版試験｜試験の準備方法Palo Alto Networks Certified Network Security Engineer Exam無料試験

弊社のPalo Alto Networks　PCNSE問題集を使用した後、PCNSE試験に合格するのはあまりに難しくないことだ

と知られます。我々Jpexam提供するPCNSE問題集を通して、試験に迅速的にパースする技をファンドできます。あなたのご遠慮なく購買するために、弊社は提供する無料のPalo Alto Networks　PCNSE問題集デーモをダウンロードします。

PCNSE認定は、セキュリティの専門家がネットワークセキュリティおよびPalo Alto Networksソリューションの専門知識を実証する優れた方法です。あなたがセキュリティアナリスト、エンジニア、またはコンサルタントであるかどうかにかかわらず、この認定は、最新のセキュリティテクノロジーとソリューションに関する知識を実証することで、キャリアを向上させるのに役立ちます。

Palo Alto NetworksのPCNSE認定は、サイバーセキュリティ業界において雇用主に高く評価されています。それは候補者が必要なスキルと知識を持ち、Palo Alto Networksの製品に取り組んで組織のネットワークをサイバー脅威から守る能力を持つことを証明します。その認定は、候補者のキャリアを推進し、収入を増やすのに役立ちます。

Palo Alto Networks Certified Network Security Engineer Exam 認定 PCNSE 試験問題 (Q179-Q184):

質問 # 179
Which three items must be configured to implement application override? (Choose three)

- A. Security policy rule
- B. Custom app
- C. Application filter
- D. Decryption policy rule
- E. Application override policy rule

正解：A、B、E

解説：
Explanation
According to the Palo Alto Networks documentation1, application override is where the firewall is configured to override the normal application identification (App-ID) of specific traffic passing through the firewall. To implement application override, the following items must be configured:
Custom app: This is a user-defined application that is used to identify the traffic that needs to be overridden. It is recommended to create a custom app for the applicationoverride policy, rather than using a predefined app that may have different default ports and threat inspection capabilities2.
Security policy rule: This is a rule that allows the traffic that matches the custom app through the firewall. The security policy rule must use the custom app as the application filter and specify the source and destination zones, addresses, and users as needed
Application override policy rule: This is a rule that defines the criteria for overriding the App-ID of the traffic. The application override policy rule must use the custom app as the application filter and specify the source and destination zones, addresses, ports, and protocols as needed2.
The other options are not required or relevant for implementing application override:
Decryption policy rule: This is a rule that defines the criteria for decrypting encrypted traffic. It is not related to application override, although decryption may be needed to identify some applications that use encryption.
Application filter: This is an object that groups applications based on various criteria, such as category, subcategory, technology, or risk. It is not an item that must be configured for application override, although it can be used as a reference in security policy rules or custom apps.

質問 # 180
A company wants to install a PA-3060 firewall between two core switches on a VLAN trunk link. They need to assign each VLAN to its own zone and to assign untagged (native) traffic to its own zone which options differentiates multiple VLAN into separate zones?

- A. Create V-Wire objects with two V-Wire sub interface and assign only a single VLAN ID to the "Tag Allowed field one of

the V-Wire object Repeat for every additional VLAN and use a VIAN ID of 0 for untagged traffic. Assign each interface/subinterfaceto a unique zone.

- B. Create Layer 3 sub interfaces that are each assigned to a single VLAN ID and a common virtual router. The physical Layer 3interface would handle untagged traffic. Assign each interface /subinterface to a unique zone. Do not assign any interface anIP address
- C. Create VLAN objects for each VLAN and assign VLAN interfaces matching each VLAN ID. Repeat for every additional VLANand use a VLAN ID of 0 for untagged traffic. Assign each interface/subinterface to a unique zone.
- D. Create V-Wire objects with two V-Wire interfaces and define a range "0- 4096" in the 'Tag Allowed filed of the V-Wire object.

正解：D

質問 # 181
An administrator needs to assign a specific DNS server to one firewall within a device group. Where would the administrator go to edit a template variable at the device level?

- A. PDF Export under Panorama > templates
- B. Manage variables under Panorama > templates
- C. Managed Devices > Device Association
- D. Variable CSV export under Panorama > templates

正解：B

解説：
Explanation
To edit a template variable at the device level, you need to go to Manage variables under Panorama > templates. This allows you to override the default value of a variable for a specific device or device group. For example, you can assign a specific DNS server to one firewall within a device group by editing the
${dns-primary} variable for that device. References:

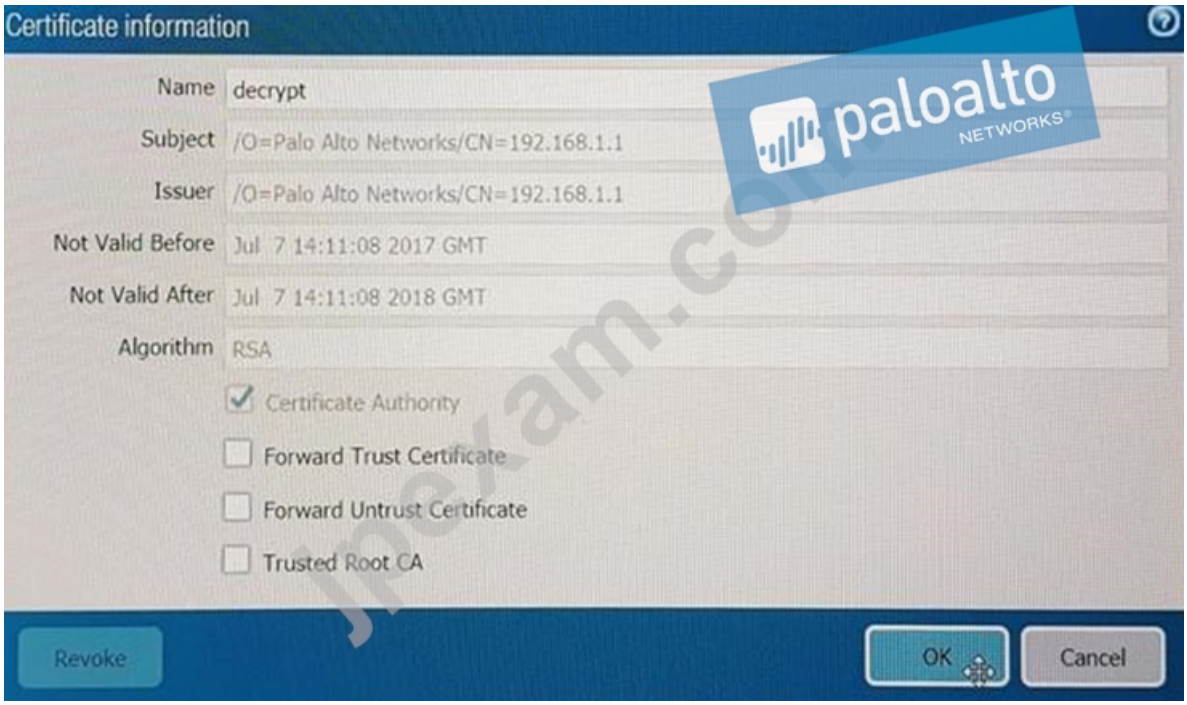
質問 # 182
The certificate information displayed in the following image is for which type of certificate?
Exhibit:



- A. Forward Trust certificate
- B. Self-Signed Root CA certificate

- C. Public CA signed certificate
- D. Web Server certificate

正解： B

質問 # 183
What are three valid qualifiers for a Decryption Policy Rule match? (Choose three)

- A. User-ID
- B. Source Interface
- C. Custom URL Category
- D. App-ID
- E. Destination Zone

正解： A、B、E
