### PRINCE2 Agile Foundation Sample Questions (Q16-Q21):

#### NEW QUESTION # 16

In which process should the requirements for delivery of specialist products be agreed?

- A. Initiating a project
- B. Managing product delivery
- C. Starting up a project
- D. Managing a stage boundary

**Answer: B**

Explanation:

The Managing Product Delivery process includes agreeing on and controlling the requirements for the delivery of specialist products. This process ensures that team managers understand the scope and quality expectations before work begins and that delivery aligns with the project plan.

Initiating a project and starting up a project establish overall direction but do not handle detailed delivery requirements. Managing a stage boundary reviews progress and plans the next stage.

This process maintains clarity and accountability for delivery within PRINCE2's framework, facilitating effective control over specialist products.

### NEW QUESTION # 18

Which workshop focuses on team growth and improvements in working practices?

- A. Project kickoff workshop
- B. Team planning workshop
- C. Team retrospective workshop
- D. Progress review workshop

**Answer: C**

Explanation:

The Team Retrospective Workshop is explicitly designed to facilitate team growth and continuous improvement in working practices. It is a fundamental agile practice where the team reflects on the recently completed work or sprint to identify what went well, what didn't, and what could be improved. The goal is to foster an environment of trust and openness, enabling teams to discuss challenges and successes honestly.

Retrospectives promote inspect and adapt principles by encouraging teams to continuously evaluate their processes, collaboration, and tools. They help uncover systemic issues, process bottlenecks, or interpersonal challenges that may be impeding productivity or quality. Teams use this feedback to implement actionable improvements, which can range from adjusting communication methods to refining definitions of done or ready.

This workshop supports a key agile mindset-continuous learning and improvement-which directly contributes to team maturity, performance, and morale. Importantly, retrospectives are not about assigning blame but rather about fostering a growth mindset that accepts change as an opportunity to evolve.

While Project Kickoff Workshops (A) initiate project alignment and Progress Review Workshops (C) monitor project status, they do not primarily focus on team process improvements. The Team Planning Workshop (D) is concerned with planning upcoming work, not retrospection.

In PRINCE2 Agile, retrospectives are a critical tool to blend traditional project management with agile principles by promoting regular reflection and incremental enhancements.

Reference: PRINCE2 Agile Foundation Version 2, Section 6.5 "Retrospectives and Continuous Improvement," and PRINCE2 Agile Study Guide, Chapter 6.

### NEW QUESTION # 19
