Where is the initial list of known integrations documented?

- A. In SAP Cloud ALM
- B. In the Fit-to-Standard Workshops
- C. In the Digital Discovery Assessment
- **D. In the Business Driven Configuration Questionnaire**

Answer: D

Explanation:

The initial list of known integrations is documented in the Business Driven Configuration Questionnaire (BDCQ). The BDCQ is a tool that helps you to capture the business requirements and scope of your SAP S/4HANA Cloud Public Edition project. It contains a series of questions that cover different aspects of your business processes, such as organizational structure, master data, configuration settings, and integration scenarios. The BDCQ also provides guidance on the best practices and recommendations for your project¹².

One of the sections in the BDCQ is the Integration section, where you can document the initial list of known integrations that are relevant for your project. The Integration section contains questions about the integration scenarios that you want to enable, such as cross-system process integration, data replication, data migration, and third-party integration. The Integration section also provides information on the available integration options, such as SAP Cloud Platform Integration, SAP API Business Hub, and SAP Cloud ALM¹³.

The initial list of known integrations is important for your project, as it helps you to identify the integration requirements,
