With all of these NCP-CN study materials, your success is 100% guaranteed. Moreover, we have Demos as freebies. The free demos give you a prove-evident and educated guess about the content of our NCP-CN practice materials. As long as you make up your mind on this exam, you can realize their profession is unquestionable. And their profession is expressed in our NCP-CN training prep thoroughly. They are great help to pass the NCP-CN exam and give you an unforgettable experience.

We have a lot of regular customers for a long-term cooperation now since they have understood how useful and effective our NCP-CN actual exam is. In order to let you have a general idea about the shining points of our NCP-CN training materials, i would like to introduce the free demos of our NCP-CN study engine for you. There are the real and sample questions in the free demos to show you that how valid and latest our NCP-CN learning dumps are. So just try now!

Reliable NCP-CN Study Notes | NCP-CN Mock Exams

Our company has successfully launched the new version of the NCP-CN study materials. Perhaps you are deeply bothered by preparing the NCP-CN exam. Now, you can totally feel relaxed with the assistance of our NCP-CN study materials. Our products

are reliable and excellent. What is more, the passing rate of our NCP-CN Study Materials is the highest in the market. Purchasing our NCP-CN study materials means you have been half success. Good decision is of great significance if you want to pass the NCP-CN exam for the first time.

Nutanix NCP-CN Exam Syllabus Topics:

Topic	Details
Topic 1	• Perform Day 2 Operations: This part assesses the expertise of site reliability engineers and cluster operators in ongoing cluster management tasks after deployment. It includes configuring authentication and authorization mechanisms, setting up logging systems, and implementing cluster backup and recovery procedures. Candidates also need to demonstrate skills in monitoring cluster performance and health, configuring autoscaling to handle workload changes, and performing lifecycle management functions such as upgrades and maintenance.
Topic 2	• Conduct NKP Fleet Management: This section tests the abilities of platform administrators and cloud operations engineers in managing multiple clusters as a fleet. It focuses on configuring workspaces to organize clusters, deploying workload clusters within these workspaces, and attaching or detaching clusters as needed. Additionally, candidates must be able to configure projects for workload segmentation and manage platform applications that support the overall NKP environment.
Topic 3	• Manage Building an NKP Cluster: This section evaluates the skills of Kubernetes administrators and platform engineers in customizing and deploying NKP clusters. Candidates must show proficiency in tailoring cluster configurations to meet specific requirements and deploying Kommander, the management platform, while applying the appropriate licenses to enable cluster features and management capabilities.
Topic 4	• Prepare the Environment for an NKP Deployment: This section of the exam measures the skills of infrastructure engineers and cloud administrators and covers the initial setup tasks needed for NKP deployment. Candidates must demonstrate the ability to seed a private container registry, create a bootstrap Kubernetes cluster, and determine license tiers suitable for clusters. They also need to prepare a bastion host for secure access, build machine images or prepare nodes for deployment, and gather all necessary information to build a cluster on the target cloud or on-premises provider.

Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q34-Q39):

NEW QUESTION # 34
A company uses an Artifactory private registry for development. The NKP deployment must use this private registry since the Security Administrator has the firewall configured to reject connections to public container registries. The first task is to push the NKP bundle to this private registry.
What options should be used to push the NKP bundle to this private registry?

- A. --mirror-url, --mirror-username and --mirror-password
- B. --registry-url, --registry-username and --registry-password
- C. --registry-mirror-url, --registry-mirror-username and --registry-mirror-password
- D. --to-registry, --to-registry-username and --to-registry-password

Answer: D

NEW QUESTION # 35
A company has enabled auto-scaling within an NKP cluster. What is the behavior for auto-scaling?

- A. The Power-On Status/Mode of a node is changed to meet load conditions.
- B. Nodes will be CAPI-created or CAPI-deleted as needed by the cluster.
- C. CPU is hot-added or hot-removed from a node.
- D. Memory is hot-added or hot-removed from a node.

Answer: B

NEW QUESTION # 36
A company has decided to expand NKP to features that require higher product tiers, like fleet-management and additional infrastructure providers. The company has already obtained the necessary licensing. Which action is required when adding and activating a license from NKP Starter to a higher-tier product?

- A. Log out and log back in as a Global License Administrator.
- B. Ensure that worker nodes are sized appropriately.
- C. Regenerate the ACME-based certificate for NKP.
- D. Contact Nutanix Support.

Answer: A

NEW QUESTION # 37
A Platform Engineer has deployed NKP and wants to utilize its OOB data storage feature.
What should the engineer enable to support backups within the NKP environment?

- A. Volumes iSCSI
- B. MinIO
- C. Rook Ceph
- D. Objects S3

Answer: C

NEW QUESTION # 38
A company has different Kubernetes clusters for different business units. Every business unit has separate Kubernetes clusters for production and development because the software deployed in production is different than development. Now, all production clusters for all business units are standardized and all clusters for development are standardized as well.
The company recently acquired NKP Ultimate licenses for all Kubernetes clusters.
How can the company control the standard configuration for both environments in all clusters (production and development)?

- A. Install Flux in every Kubernetes cluster and configure the appropriate kustomize.yaml in every Kubernetes cluster.
- B. Configure a production workspace and a development workspace and attach each Kubernetes cluster to the corresponding workspace.
- C. Create new Kubernetes clusters for production and development with NKP for every business unit.
- D. Install Flux in every Kubernetes cluster with the appropriate kustomize.yaml, with nkp install flux --kustomize=kustomize.yaml --kubeconfig=<cluster>.conf

Answer: B

NEW QUESTION # 39
......

No matter on any condition, our company will not use your information to make profits. As already mentioned above, our NCP-CN learning materials attach great importance to the interests of customers. A product can develop for so many years, and ultimately the customer's trust and support. Many of the users of NCP-CN training prep were introduced by our previous customers. They truly trust our NCP-CN exam questions. And as long as you buy our NCP-CN practice guide, we believe you will trust them as well.
