Examcollection Amazon AWS-Solutions-Associate Questions Answers | AWS-Solutions-Associate Current Exam Content

Are you worried about insufficient time to prepare the exam? Do you have a scientific learning plan? Maybe you have set a series of to-do list, but it's hard to put into practice for there are always unexpected changes during the AWS-Solutions-Associate exam.

Here we recommend our AWS-Solutions-Associate test prep to you. With innovative science and technology, our study materials have grown into a powerful and favorable product that brings great benefits to all customers. We are committed to designing a kind of scientific study material to balance your business and study schedule. With our AWS-Solutions-Associate Exam Guide, all your learning process includes 20-30 hours. As long as you spare one or two hours a day to study with our latest AWS-Solutions-Associate quiz prep, we assure that you will have a good command of the relevant knowledge before taking the exam. What you need to do is to follow the AWS-Solutions-Associate exam guide system at the pace you prefer as well as keep learning step by step.

Amazon AWS Certified Solutions Architect - Associate (SAA-C03) Sample Questions (Q209-Q214):

NEW QUESTION # 209

Identify a true statement about the On-Demand instances purchasing option provided by Amazon EC2.

- A. Pay for the instances that you use by the hour, with long-term commitments or up-front payments.
- **B. Pay for the instances that you use by the hour, with no long-term commitments or up-front payments.**
- C. Make a low, one-time, up-front payment for an instance, reserve it for a one- or three-year term, and pay a significantly lower hourly rate for these instances.
- D. Make a high, one-time, all-front payment for an instance, reserve it for a one- or three-year term, and pay a significantly higher hourly rate for these instances.

Answer: B

Explanation:

On-Demand instances allow you to pay for the instances that you use by the hour, with no long-term commitments or up-front payments.

NEW QUESTION # 210

A company runs an application on a large fleet of Amazon EC2 instances. The application reads and write entries into an Amazon DynamoDB table. The size of the OynamoDB table continuously grows but the application needs only data from the last 30 days. The company needs a solution that minimizes cost and development effort. Which solution meets these requirements'?

- A. Use an AWS CloudFormation template to deploy the complete solution. Redeploy the Cloud Formation stack every 30 days, and delete the original stack.
- B. Configure Amazon DynamoDB Streams to invoke an AWS Lambda function when a new item is created in the table. Configure the Lambda function to delete items in the table that are older than 30 days.
- C. Extend the application to add an attribute that has a value of the current timestamp plus 30 days to each new item that is created in the table. Configure DynamoDB to use the attribute as the TTL attribute.
- **D. Use an EC2 instance that runs a monitoring application from AWS Marketplace. Configure the monitoring application to use Amazon DynamoDB Streams to store the timestamp when a new item is created in the table. Use a script that runs on the EC2 instance to delete items that have a timestamp that is older than 30 days.**

Answer: D

NEW QUESTION # 211

A company's website provides users with downloadable historical performance reports. The website needs a solution that will scale to meet the company's website demands globally. The solution should be cost effective, limit the provisioning of into and provide the fastest possible response time.

Which combination should a solutions architect recommend to meet these requirements?

- **A. Application Load Balancer with Amazon EC2 Auto Scaling**
- B. Amazon CloudFront and Amazon S3
- C. AWS Lambda and Amazon Dynamo
- D. Amazon Route 53 with internal Application Load Balances

Answer: A

NEW QUESTION # 212

AWS Direct Connect itself has NO specific resources for you to control access to. Therefore, there are no AWS Direct Connect Amazon Resource Names (ARNs) for you to use in an Identity and Access Management (IAM) policy. With that in mind, how is it possible to write a policy to control access to AWS Direct Connect actions?

- A. You can use an asterisk (*) as the resource.
- B. You can choose the name of the AWS Direct Connection as the resource.
- C. You can leave the resource name field blank.
- D. You can create a name for the resource.

Answer: A

Explanation:

AWS Direct Connect itself has no specific resources for you to control access to. Therefore, there are no AWS Direct Connect ARNs for you to use in an IAM policy. You use an asterisk (*) as the resource when writing a policy to control access to AWS Direct Connect actions.

NEW QUESTION # 213

A solutions architect needs to design a system to store client case files. The files are core company assets and are important. The number of files will grow over time.

The files must be simultaneously accessible from multiple application servers that run on Amazon EC2 instances. The solution must have built-in redundancy.

Which solution meets these requirements?

- A. Amazon Elastic File System (Amazon EFS)
- B. Amazon Elastic Block Store (Amazon EBS)
- C. Amazon S3 Glacier Deep Archive
- D. AWS Backup

Answer: A

Explanation:

Amazon EFS provides a simple, scalable, fully managed file system that can be simultaneously accessed from multiple EC2 instances and provides built-in redundancy. It is optimized for multiple EC2 instances to access the same files, and it is designed to be highly available, durable, and secure. It can scale up to petabytes of data and can handle thousands of concurrent connections, and is a cost-effective solution for storing and accessing large amounts of data.

NEW QUESTION # 214
