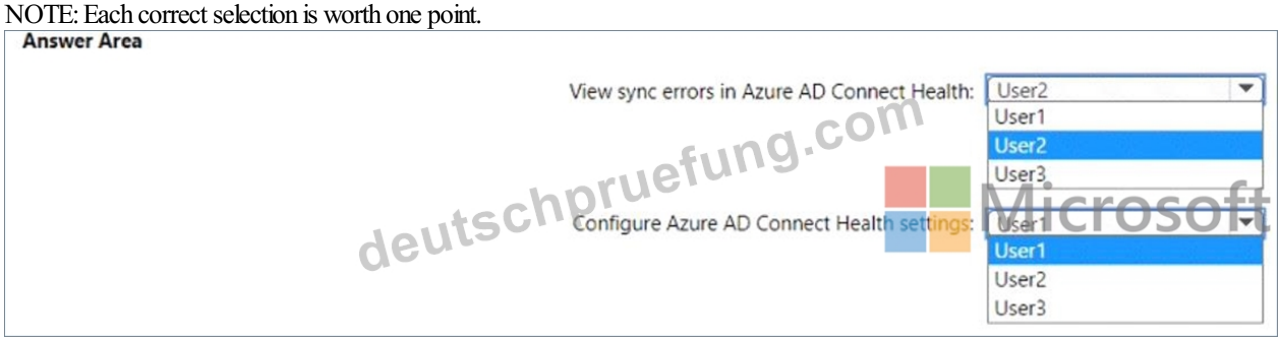
Microsoft 365 Administrator MS-102 Prüfungsfragen mit Lösungen (Q68-Q73):

68. Frage
You have a hybrid deployment of Azure AD that contains the users shown in the following table.

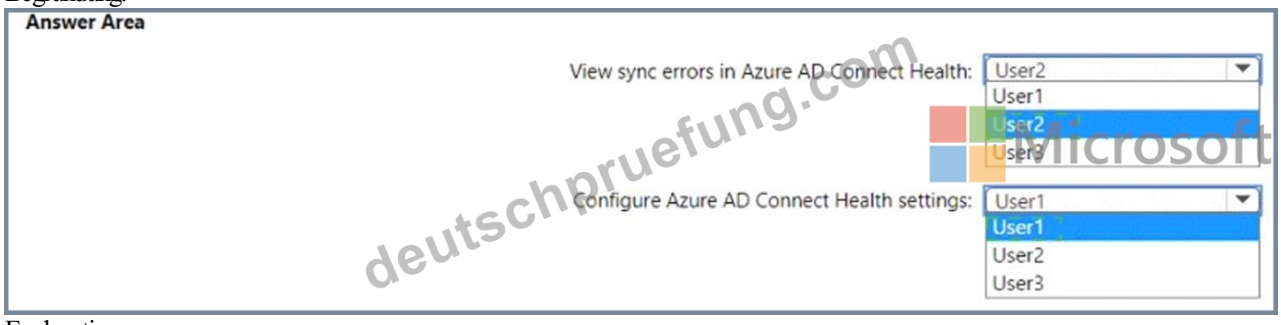
Name	Description
User1	Azure AD Connect sync account
User2	Contributor for Azure AD Connect Health
User3	Application administrator in Azure AD

You need to identify which users can perform the following tasks:
* View sync errors in Azure AD Connect Health.
* Configure Azure AD Connect Health settings.
Which user should you identify for each task? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

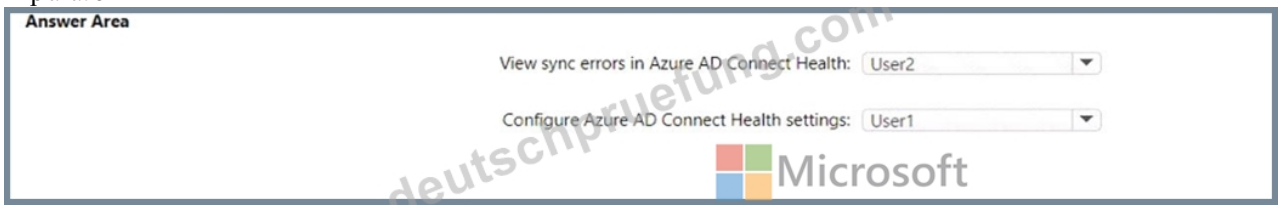


Antwort:

Begründung:

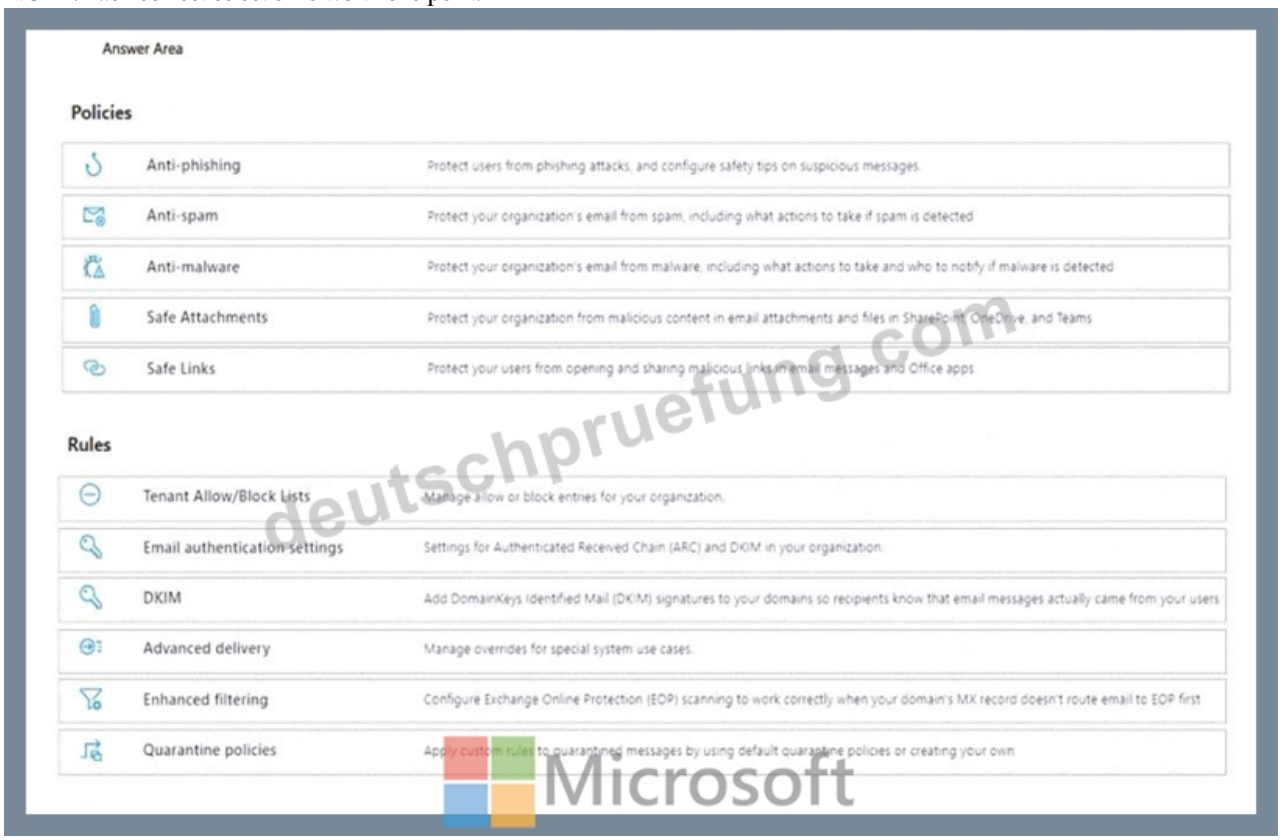


Explanation



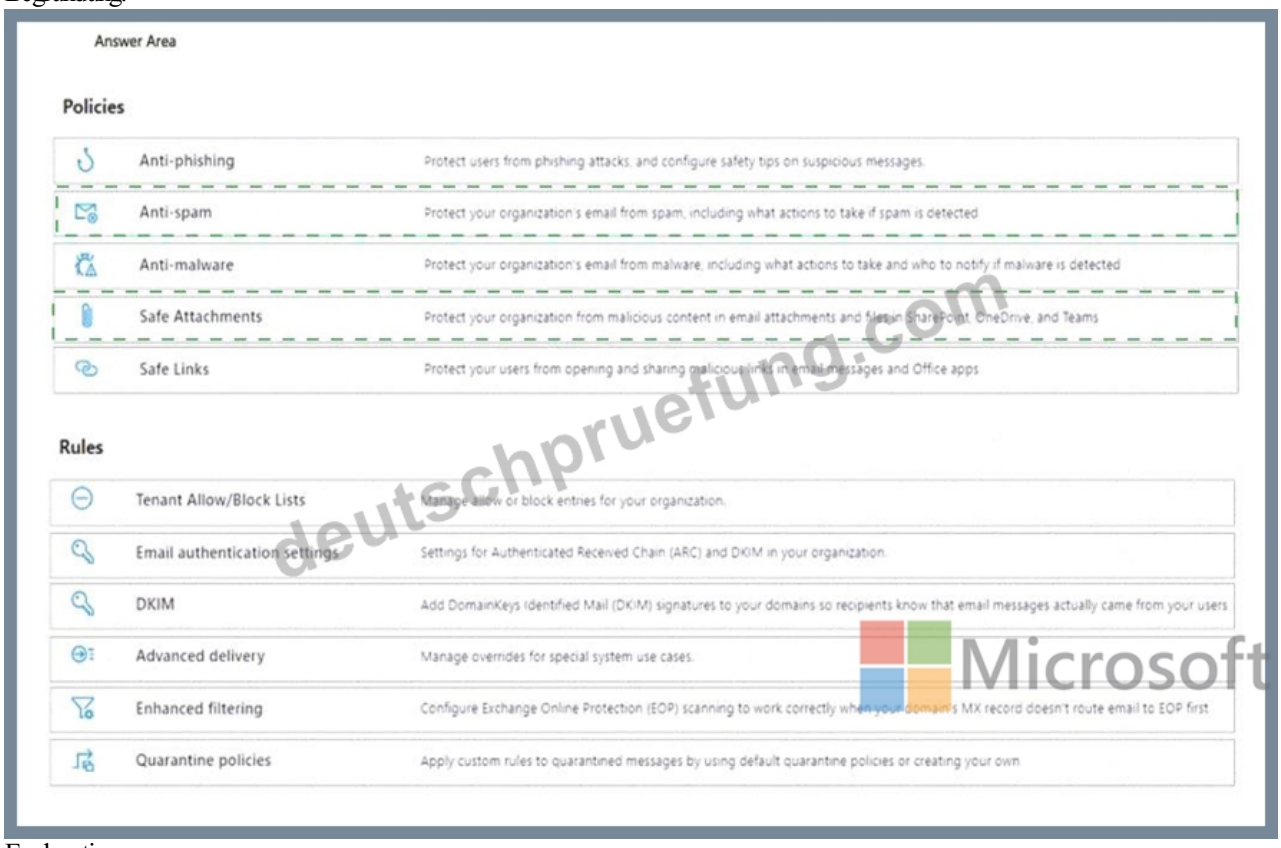
69. Frage
You have a Microsoft 365 E5 subscription.
You need to configure threat protection tor Microsoft 365 to meet the following requirements:
* Limit a user named User 1 from sending more than 30 email messages per day.
* Prevent the delivery of a specific file based on the file hash.
Which two threat policies should you configure in Microsoft Defender for Office 365? To answer, select the appropriate threat policies in the answer area.

NOTE: Each correct selection is worth one point.



Antwort:

Begründung:



Explanation:

Limit a user named User 1 from sending more than 30 email messages per day: Anti-spam policy The anti-spam policy in Microsoft Defender for Office 365 allows you to configure outbound spam settings, including limiting the number of email messages a user can send per day. This helps prevent spam and potential email abuse within the organization.

Prevent the delivery of a specific file based on the file hash: Safe Attachments policy The Safe Attachments policy in Microsoft Defender for Office 365 can be configured to block or quarantine emails with attachments that match specific file hashes. This ensures that potentially malicious files are not delivered to users' inboxes.

70. Frage

You have a Microsoft 365 E5 subscription that contains the security groups shown in the following table.

Name	Membership type	Membership rule
Group1	Assigned	*Not applicable*

Topic 3, Litware Inc.
Case Study
This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.
To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.
At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.
To start the case study
To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.
Overview
General Overviews
Litware, Inc. is a technology research company. The company has a main office in Montreal and a branch office in Seattle.
Environment
Existing Environment
The network contains an on-premises Active Directory domain named litware.com. The domain contains the users shown in the following table.

Name	Office
User1	Montreal
User2	Montreal
User3	Seattle
User4	Seattle

Microsoft Cloud Environment
Litware has a Microsoft 365 subscription that contains a verified domain named litware.com. The subscription syncs to the on-premises domain.

Litware uses Microsoft Intune for device management and has the enrolled devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Windows 8.1
Device3	MacOS
Device4	iOS
Device5	Android

Litware.com contains the security groups shown in the following table.

Name	Members
UserGroup1	All the users in the Montreal office
UserGroup2	All the users in the Seattle office
DeviceGroup1	All the devices in the Montreal office
DeviceGroup2	All the devices in the Seattle office

Litware uses Microsoft SharePoint Online and Microsoft Teams for collaboration.
The verified domain is linked to an Azure Active Directory (Azure AD) tenant named litware.com. Audit log search is turned on for the litware.com tenant.
Problem Statements
Litware identifies the following issues:
* Users open email attachments that contain malicious content.
* Devices without an assigned compliance policy show a status of Compliant.
* User1 reports that the Sensitivity option in Microsoft Office for the web fails to appear.
* Internal product codes and confidential supplier ID numbers are often shared during Microsoft Teams meetings and chat sessions that include guest users and external users.
Requirements
Planned Changes
Litware plans to implement the following changes:
* Implement device configuration profiles that will configure the endpoint protection template settings for supported devices.
* Configure information governance for Microsoft OneDrive, SharePoint Online, and Microsoft Teams.
* Implement data loss prevention (DLP) policies to protect confidential information.
* Grant User2 permissions to review the audit logs of he litware.com tenant.
* Deploy new devices to the Seattle office as shown in the following table.

Name	Platform
Device6	Windows 10
Device7	Windows 10
Device8	iOS
Device9	Android
Device10	Android

* Implement a notification system for when DLP policies are triggered.
* Configure a Safe Attachments policy for the litware.com tenant.
Technical Requirements
Litware identifies the following technical requirements:
* Retention settings must be applied automatically to all the data stored in SharePoint Online sites, OneDrive accounts, and Microsoft Teams channel messages, and the data must be retained for five years.
* Emails messages that contain attachments must be delivered immediately, and placeholder must be provided for the attachments until scanning is complete.
* All the Windows 10 devices in the Seattle office must be enrolled in Intune automatically when the devices are joined to or registered with Azure AD.
* Devices without an assigned compliance policy must show a status of Not Compliant in the Microsoft Endpoint Manager admin center.
A notification must appear in the Microsoft 365 compliance center when a DLP policy is triggered.
User2 must be granted the permissions to review audit logs for the following activities:
- Admin activities in Microsoft Exchange Online
- Admin activities in SharePoint Online
- Admin activities in Azure AD
Users must be able to apply sensitivity labels to documents by using Office for the web.
Windows Autopilot must be used for device provisioning, whenever possible.
A DLP policy must be created to meet the following requirements:
- Confidential information must not be shared in Microsoft Teams chat sessions, meetings, or channel messages.

- Messages that contain internal product codes or supplier ID numbers must be blocked and deleted.
The principle of least privilege must be used.

73. Frage

.....
