

Quick Preparation with RUCKUS RCWA Questions

P.S. Free & New RCWA dumps are available on Google Drive shared by DumpTorrent: <https://drive.google.com/open?id=1fSXGe1g2yJQEZutOqGhG0c4mi3bQnVrs>

Will you feel nervous for your exam? If you do, you can choose us, we will help you reduce your nerves as well as increase your confidence for the exam. RCWA Soft test engine can simulate the real exam environment, so that you can know the procedure for the exam, and your confidence for the exam will be strengthened. In addition, we offer you free demo to have try before buying, so that you can know the form of the complete version. Free update for one year is available for RCWA Exam Materials, and you can know the latest version through the update version. The update version for RCWA training materials will be sent to your email automatically.

We hope you can feel that we sincerely hope to help you. We hope that after choosing our RCWA study materials, you will be able to concentrate on learning our RCWA learning guide without worry. It is our greatest honor that you can feel satisfied. Of course, we will value every user. We will never neglect any user. Our RCWA Exam Braindumps will provide perfect service for everyone.

Top RCWA Exam Dumps - Latest RCWA Test Preparation

Actual and updated RCWA questions are essential for individuals who want to clear the RUCKUS Certified Wi-Fi Associate Exam (RCWA) examination in a short time. At DumpTorrent, we understand that the learning style of every RCWA exam applicant is different. That's why we offer three formats of RUCKUS RCWA Dumps. With our actual and updated RCWA questions, you can achieve success in the RUCKUS Certified Wi-Fi Associate Exam (RCWA) exam and accelerate your career on the first attempt.

RUCKUS Certified Wi-Fi Associate Exam Sample Questions (Q28-Q33):

NEW QUESTION # 28

A SmartZone Administrator has created a new GUEST WLAN as well as a new WLAN Group within a Zone.

APs are added to a new AP Group to limit areas where the GUEST WLAN is broadcast.

APs in the new AP Group are not broadcasting the GUEST WLAN.

What is the cause?

- A. The WLAN Group can only be associated with individual APs.
- B. The WLAN Group must be applied at the AP Zone.
- C. The WLAN Group has been created in the Domain.
- **D. The WLAN Group has not been associated with the AP radios in the AP Group.**

Answer: D

Explanation:

In SmartZone, WLAN Groups define which SSIDs (WLANs) are broadcast by specific APs or AP Groups. However, for an AP Group to actually broadcast the WLANs from a WLAN Group, that WLAN Group must be explicitly assigned to the AP Group's radio interfaces (2.4 GHz, 5 GHz, or 6 GHz).

According to RUCKUS One Online Help - WLAN Group Configuration and SmartZone Administrator Guide, when an AP Group does not have a WLAN Group bound to its radios, the SSIDs in that group will not be broadcast-even if both exist within the same Zone.

Creating the WLAN Group at the Domain level or Zone level is valid, but broadcasting depends on association at the AP Group radio level.

NEW QUESTION # 29

Which type of interference occurs when two APs are configured on channel 7 and channel 8 in the same physical space?

- A. Multipath
- **B. Adjacent**
- C. Co-channel
- D. Diffraction

Answer: B

Explanation:

When two access points operate on overlapping channels in the same frequency band-such as channel 7 and channel 8 in the 2.4 GHz range-they create Adjacent Channel Interference (ACI). Unlike co-channel interference (CCI), which occurs when APs share the exact same channel, ACI results from partial channel overlap that causes energy spillover between adjacent frequencies.

According to RUCKUS One Online Help - Radio Configuration and Channel Planning, adjacent channels in 2.4 GHz are only 5 MHz apart, while each Wi-Fi channel occupies 20-22 MHz of bandwidth. As a result, channels like 7 and 8 significantly overlap, creating degraded performance, retransmissions, and reduced throughput.

RUCKUS's ChannelFly technology in both RUCKUS AI and RUCKUS Analytics helps automatically select non-overlapping channels (such as 1, 6, and 11) to minimize ACI and optimize network capacity.

Therefore, the correct answer is A - Adjacent interference, which directly applies to overlapping channel configurations.

NEW QUESTION # 30

Which plane does a SmartZone Controller use to send configuration information to access points and switches?

- A. Management
- B. Data
- **C. Control**
- D. Cluster

Answer: C

Explanation:

The Control Plane in a SmartZone architecture handles all management and configuration communication between the controller and connected devices (APs and switches).

Per RUCKUS One Online Help - SmartZone Plane Architecture Overview, the Control Plane is responsible for:

Pushing configuration data, firmware updates, and policy settings to APs.

Receiving telemetry, performance metrics, and operational status from devices.

Managing secure communication channels via LWAPP or HTTPS/SSH tunnels.

In contrast, the Data Plane forwards user traffic, the Cluster Plane synchronizes data among controller nodes, and the Management Plane supports administrator access (GUI/CLI).

This division enhances scalability and fault tolerance-especially in vSZ-H multi-node clusters where data and control functions can be distributed.

NEW QUESTION # 31

Which RUCKUS technology helps optimize channel use by measuring actual throughput performance rather than noise levels alone?

- A. PD-MRC
- B. SmartCast
- C. ChannelFly
- D. BeamFlex+

Answer: C

Explanation:

ChannelFly is RUCKUS's machine learning-based dynamic channel selection technology. It evaluates real-time throughput on each channel rather than relying only on noise or interference metrics to determine the best operating channel.

As outlined in RUCKUS One Online Help - ChannelFly Operation and RUCKUS AI Documentation - Channel Optimization, ChannelFly continuously monitors channel conditions and switches to those offering higher capacity.

This ensures maximum real-world performance, especially in dense environments with unpredictable interference.

BeamFlex+ adjusts antenna patterns, SmartCast prioritizes traffic, and PD-MRC enhances signal reception but do not handle channel learning or selection.

NEW QUESTION # 32

Review the exhibit. What can be determined about this SmartZone? (Choose three.)

□

- A. The server has three physical 1 Gbps NICs.
- B. This is a virtual SmartZone Essentials (vSZ-E).
- C. The management, control, and cluster interfaces use a single NIC.
- D. This is a virtual SmartZone High-Scale (vSZ-H).
- E. The controller is part of a four-node cluster.
- F. The controller is using three port groups, one for each NIC/function.

Answer: A,D,F

Explanation:

The exhibit shows a virtual SmartZone (vSZ) configuration running in a VMware environment with three separate virtual NICs (vNICs), each mapped to a different port group: Management, Control, and Cluster.

According to RUCKUS One Online Help - SmartZone Interface Configuration and RUCKUS AI Documentation - SmartZone High-Scale Architecture, this design is specific to vSZ-H (High-Scale) deployments, which require three distinct network interfaces for distributed control, management, and cluster synchronization.

The three NIC mappings confirm physical or virtual separation of traffic for scalability and redundancy (A and E). vSZ-E (Essentials) requires only two interfaces (Management and Control) and does not use a dedicated cluster interface, distinguishing it from vSZ-H (D).

There is no indication of a four-node cluster in the exhibit, and SmartZone appliances typically show node counts under the Cluster Dashboard, not at the NIC configuration stage.

Thus, based on the configuration, this is a vSZ-H system with three NICs and three port groups, each serving a dedicated function.

NEW QUESTION # 33

.....

We are aimed to improve customer satisfaction and always put customers first. Our experts check daily whether there is an update to the RUCKUS Certified Wi-Fi Associate Exam torrent prep, and if there is an update system, we will automatically send it to you. So it can guarantee latest knowledge and keep up with the pace of change. Many people are worried that online shopping electronics have viruses. But you don't have to worry about our products. Our RCWA Exam Questions are absolutely safe and virus-free. If you have any questions during the installation process, we will arrange professional staff on guidance of your installation and use. We always put your needs first.
