

# Latest Juniper JN0-253 Test Voucher, JN0-253 Latest Test Experience

BTW, DOWNLOAD part of DumpsQuestion JN0-253 dumps from Cloud Storage: [https://drive.google.com/open?id=1KijKw\\_VwPumwKRJ3Q1pfnEhr4zpZ2qdU](https://drive.google.com/open?id=1KijKw_VwPumwKRJ3Q1pfnEhr4zpZ2qdU)

We believe that one of the most important things you care about is the quality of our JN0-253 exam materials, but we can ensure that the quality of it won't let you down. Many candidates are interested in our JN0-253 exam materials. What you can set your mind at rest is that the JN0-253 exam materials are very high quality. JN0-253 exam materials draw up team have a strong expert team to constantly provide you with an effective training resource. They continue to use their rich experience and knowledge to study the real exam questions of the past few years, to draw up such an exam materials for you. In other words, you can never worry about the quality of JN0-253 Exam Materials, you will not be disappointed.

A second format is a Juniper JN0-253 web-based practice exam that can take for self-assessment. However, it differs from desktop-based JN0-253 practice exam software as it can be taken via any browser, including Chrome, Firefox, Safari, and Opera. This Juniper JN0-253 web-based practice exam does not require any other plugins. It also includes all of the functionalities of desktop JN0-253 software and will assist you in passing the JN0-253 certification test.

## JN0-253 Latest Test Experience | Exam JN0-253 Question

Our JN0-253 study materials boost the function to stimulate the real exam. The clients can use our software to stimulate the real exam to be familiar with the speed, environment and pressure of the real JN0-253 exam and get a well preparation for the real exam. Under the virtual exam environment the clients can adjust their speeds to answer the JN0-253 Questions, train their actual combat abilities and be adjusted to the pressure of the real test. They can also have an understanding of their mastery degree of our JN0-253 study materials. The clients can use our software to stimulate the real exam at any time and there are no limits for the times of stimulation.

### Juniper JN0-253 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Juniper Mist Cloud Fundamentals: This domain covers Juniper's cloud-native platform architecture, focusing on AI and machine learning capabilities for intelligent network management and real-world deployment scenarios.</li> </ul>

Topic 2	<ul style="list-style-type: none"> <li>Juniper Mist Network Operations and Management: This domain examines operational features across Wi-Fi, Wired, WAN, Routing, and Access Assurance, delivering specialized management capabilities for different network infrastructure layers.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Location-based Services: This domain presents virtual Bluetooth Low Energy capabilities for asset tracking, visibility, and location-aware experiences that extend networking into physical space management.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Juniper Mist Cloud Operations: This domain covers three API types (RESTful, WebSocket, Webhook) for programmatic integration, plus support resources including ticketing systems and documentation.</li> </ul>

## Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q43-Q48):

### NEW QUESTION # 43

Which three components are used to deploy location-based services? (Choose three.)

- A. location sensors
- B. BLE tags
- C. compact flash
- D. SFP
- E. location engine

**Answer: A,B,E**

Explanation:

To deploy location-based services in Mist, the following components are used:

Location Sensors: These devices capture the location data from BLE tags and other devices.

BLE Tags: These are small devices that emit Bluetooth signals to be picked up by location sensors.

Location Engine: This software processes the data from the sensors and tags to determine precise locations and provide analytics.

### NEW QUESTION # 44

What is responsible for Mist AI data collection and analysis across the wireless, wired, and WAN domains?

- A. Predictive Analytics and Correlation Engine (PACE)
- B. Marvis VNA
- C. Data Science
- D. Juniper Mist Full Stack

**Answer: A**

Explanation:

The Predictive Analytics and Correlation Engine (PACE) is the core AI and data analytics component of the Juniper Mist Cloud architecture. It collects, processes, and correlates telemetry data across all managed domains - Wireless, Wired, and WAN Assurance- to deliver proactive insights and predictive network intelligence.

According to the Juniper Mist AI Operations and Architecture Guide:

"The Predictive Analytics and Correlation Engine (PACE) serves as the foundation of Mist AI, using continuous telemetry ingestion and machine learning algorithms to understand, correlate, and predict network behaviors across the wireless, wired, and WAN environments." PACE enables Mist AI to:

- \* Detect anomalies in user experience and device performance.
- \* Predict failures before they affect users.
- \* Correlate events across network domains for root-cause analysis.

Therefore, the correct answer is A. Predictive Analytics and Correlation Engine (PACE).

### NEW QUESTION # 45

In the Mist UI, which part of the system platform provides information about missing VLANs?

- A. Switch Insights
- B. Events
- C. Service-Level Exceptions
- **D. Marvis Actions**

**Answer: D**

Explanation:

System Platform Components in Mist UI:

Different components provide various insights and information about the network.

Component Descriptions:

Switch Insights: Provides detailed information about switch performance and status. Events: Logs and displays events occurring in the network but does not specifically highlight missing VLANs.

Marvis Actions: AI-driven insights and recommendations that include identifying and suggesting actions for missing VLANs.

Service-Level Exceptions (SLEs): Monitor and report on performance metrics, not specifically focused on VLAN issues.

#### **NEW QUESTION # 46**

Which Mist supported API is considered data-driven?

- A. gRPC
- B. WebSocket
- C. Webhook
- **D. RESTful**

**Answer: D**

#### **NEW QUESTION # 47**

You are asked to enable Mist management at an existing site with previously configured EX3400 brownfield switches, and to add a new greenfield switch.

Which statement is correct in this scenario?

- A. Brownfield switches can be adopted but not managed.
- B. You can mix brownfield switches and greenfield switches at the same site, but only if they are running the same version of Junos.
- **C. You can mix brownfield switches and greenfield switches as long as they are running a Mist- supported version of Junos.**
- D. You cannot mix greenfield and brownfield switches at the same site.

**Answer: C**

Explanation:

In the context of Mist management, "brownfield" switches refer to those that are already configured and deployed in a network, while "greenfield" switches are new and have no pre- existing configuration.

Mist supports the integration and management of both brownfield and greenfield switches within the same site. The crucial requirement is that all switches, regardless of their initial state, must be running a version of Junos that is supported by Mist. This compatibility ensures that Mist can apply policies, configurations, and monitoring uniformly across all devices, facilitating a seamless management experience.
