The Ideal Solution for ISACA CDPSE Exam Questions Preparation

The only way to save yourself from this scenario is by relying on ISACA CDPSE study material. DumpsMaterials equips you with the excellent ISACA CDPSE dumps material to help you clear the ISACA CDPSE real examination on the maiden attempt. One of the leading factors of DumpsMaterials in this industry is offering only top-rated and updated CDPSE Exams practice questions.

ISACA Certified Data Privacy Solutions Engineer Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which of the following would BEST ensure privacy when utilizing AI-based technologies?

- A. Pseudonymization
- B. Masking
- C. Minimization
- D. Encryption

Answer: C

Explanation:

Data minimization requires collecting and using only what is necessary for the stated purpose—directly limiting privacy risk in AI development and use. Encryption (A) and masking (D) protect data post-collection, and pseudonymization (B) reduces identifiability

but does not limit collection or use. Minimization addresses privacy by default at the source.
"Collect and process no more personal data than necessary for the specified purpose."

NEW QUESTION # 25

Which of the following can be used to assist with identity verification without access to the actual data?

- A. Passwordless authentication
- B. Digital signatures
- C. Zero-knowledge proofs
- D. Pretty Good Privacy (PGP)

Answer: C

Explanation:

Zero-knowledge proofs (ZKPs) allow a party to prove possession of a secret or attribute without revealing the secret itself, enabling privacy-preserving verification. Digital signatures (A) and PGP (B) still involve exposure of certain data elements/keys for validation; passwordless methods (D) change authentication factors, not zero-knowledge verification.
"Zero-knowledge proofs enable verification without disclosure of the underlying data."

NEW QUESTION # 26

Which party should data subject contact FIRST if they believe their personal information has been collected and used without consent?

- A. The organization's chief privacy officer (CPO)
- B. Outside privacy counsel
- C. Privacy rights advocate
- D. Data protection authorities

Answer: A

Explanation:

The data subject should contact the organization's chief privacy officer (CPO) first if they believe their personal information has been collected and used without consent. The CPO is the senior executive who is responsible for establishing and maintaining the organization's privacy vision, strategy, and program. The CPO oversees the development and implementation of privacy policies, procedures, standards, and controls, and ensures that they align with the organization's business objectives and legal obligations. The CPO also leads the privacy governance structure, such as the privacy steering committee, and coordinates with other stakeholders, such as the data protection authorities, the privacy rights advocates, and the outside privacy counsel, to ensure that privacy is integrated into all aspects of the organization's operations. The CPO is the primary point of contact for data subjects who have any questions, complaints, or requests regarding their personal information, and who can address their concerns and resolve their issues in a timely and effective manner. NEW QUESTION # 27

Which of the following should be used to address data kept beyond its intended lifespan?

- A. Data security
- B. Data normalization
- C. Data minimization
- D. Data anonymization

Answer: C

NEW QUESTION # 28

Which of the following would MOST effectively reduce the impact of a successful breach through a remote access solution?

- A. Monitoring and reviewing remote access logs
- B. Regular physical and remote testing of the incident response plan
