

JN0-232 Questions Answers, JN0-232 Real Dumps Free

P.S. Free 2026 Juniper JN0-232 dumps are available on Google Drive shared by BraindumpStudy: <https://drive.google.com/open?id=1QTDte95mC5Fm1HOJKtU9giR1KDAI9voM>

The price for JN0-232 training materials is quite reasonable, and no matter you are a student or you are an employee at school, you can afford it. JN0-232 exam dumps are edited by experienced experts, therefore the quality can be guaranteed. JN0-232 training materials contain both questions and answers, and it's convenient for you to check the answers after finish practicing. In addition, JN0-232 Exam Dumps cover most knowledge points of the exam, and you can also improve your ability in the process of learning.

After you enter the examination room and get the exam paper, you must be sighed that the gold content of our JN0-232 learning guide is too high. Our JN0-232 study materials are really magic weapon for you to quickly pass the exam. Just come and buy our JN0-232 Exam Questions, then you can pass the exam by 100% success guarantee after you prapare with them for 20 to 30 hours. This data is created by our loyal customers who had bought our JN0-232 training engine and passed the exam.

JN0-232 Questions Answers Will Be Your Sharpest Sword to Pass Security, Associate (JNCIA-SEC)

Many clients worry that after they our JN0-232 exam simulation they may fail in the test and waste their money and energy. There are no needs to worry about that situation because our study materials boost high passing rate and hit rate and the possibility to fail in the JN0-232 test is very little. Just consider that our pass rate of the JN0-232 study guide is high as 98% to 100%, which is unique in the market. And you will get the best pass percentage with our JN0-232 learning questions.

Juniper Security, Associate (JNCIA-SEC) Sample Questions (Q31-Q36):

NEW QUESTION # 31

Which security policy action will cause traffic to drop and a message to be sent to the source?

- A. next-policy
- B. deny
- C. permit

- D. reject

Answer: D

Explanation:

Security policies on SRX support several actions:

- * Permit:Allows traffic to pass according to the rule.
- * Deny:Silently drops the traffic without notifying the source.
- * Reject:Drops the traffic and sends a TCP RST (for TCP) or ICMP unreachable (for UDP/other protocols) back to the source. This provides feedback to the sending host.
- * Next-policy:Allows policy chaining to evaluate the next policy set.

Therefore, the action that causes traffic to drop and a message to be sent to the source is reject.

Reference:Juniper Networks -Security Policy Actions, Junos OS Security Fundamentals.

NEW QUESTION # 32

Which two statements are true about the NextGen Web Filtering (NGWF) feature on an SRX Series device?

(Choose two.)

- A. The NGWF feature does not require a license.
- B. The NGWF feature consults your local lists before consulting the Juniper cloud.
- C. The NGWF feature consults the Juniper cloud before consulting your local lists.
- D. The NGWF feature requires a license.

Answer: B,D

Explanation:

* License Requirement (Option B):NextGen Web Filtering (NGWF) is a licensed feature on SRX devices. Without a license, the service cannot operate.

* Local vs. Cloud Lists (Option C):NGWF checks local block/allow lists first. If the URL does not match locally, the request is then checked against the Juniper cloud database.

* Option A:Incorrect, since the cloud is only consulted if the URL is not in the local list.

* Option D:Incorrect, as NGWF requires a valid subscription/license.

Correct Statements:NGWF requires a license, and it checks local lists before cloud lookup.

NEW QUESTION # 33

Which statement is correct about capturing transit packets on an SRX Series Firewall?

- A. You can capture transit packets using sampling and port mirroring.
- B. You can capture transit packets on the egress interface using a firewall filter.
- C. You can capture transit packets by using a firewall filter on the loopback interface.
- D. You can capture transit packets by using the tcpdump utility in the shell.

Answer: A

Explanation:

Transit traffic is defined as traffic that passes through the SRX (not destined to the Routing Engine). To capture transit traffic:

* Sampling and port mirroring (Option D) are the correct supported methods for capturing or exporting transit traffic. Sampling allows captured packets to be sent to a file or collector, while port mirroring sends a copy to a monitoring interface.

* Option A:Firewall filters on an egress interface cannot directly capture packets; they can only count, accept, discard, or sample. Sampling itself is separate.

* Option B:Loopback interface (lo0) is for control-plane traffic, not transit traffic.

* Option C:tcpdump is not supported on SRX as a tool for capturing transit packets; the operational command monitor traffic interface is used, but sampling/port mirroring is the recommended scalable approach.

Correct Method:Sampling and port mirroring

NEW QUESTION # 34

Which two statements about management functional zones are correct? (Choose two.)

- A. The management functional zone contains all available revenue ports until they are assigned to a user-defined security zone.
- B. The management functional zone cannot be referenced in any security policies.
- C. The management functional zone is automatically created on the SRX Series Firewalls.
- D. The management functional zone is used to control the management-related traffic that is allowed to access your device.

Answer: C,D

Explanation:

The management functional zone on SRX devices is a special predefined zone with unique characteristics:

- * It is automatically created (Option C) and cannot be deleted.
- * It is used specifically for management-related traffic (Option A), such as SSH, Telnet, web management (J-Web), SNMP, and other control-plane services.
- * It does not contain revenue (data) interfaces (Option B is incorrect). Interfaces must be explicitly configured into user-defined zones.
- * The management zone can be referenced in policies if inter-zone communication involving management traffic is needed (Option D is incorrect).

Correct Statements: A and C

Reference: Juniper Networks - Security Zones and Management Functional Zone, Junos OS Security Fundamentals.

NEW QUESTION # 35

Which UI enables you to manage, monitor, and maintain multiple firewalls using a single interface?

- A. Juniper Secure Analytics
- B. Secure Connect
- C. Juniper Identity Management Service
- D. Security Director

Answer: D

Explanation:

* Security Director (Option B): A Junos Space application that provides a centralized interface for managing, monitoring, and maintaining multiple SRX firewalls.

* Juniper Secure Analytics (Option A): Focuses on SIEM/log analysis, not centralized firewall management.

* Identity Management Service (Option C): Provides user identity integration for policy enforcement, not a management UI.

* Secure Connect (Option D): A VPN client solution, not a firewall management platform.

Correct UI: Security Director

Reference: Juniper Networks - Junos Space Security Director Overview, Junos OS Security Fundamentals.

NEW QUESTION # 36

.....

The best news is that during the whole year after purchasing, you will get the latest version of our JN0-232 exam prep study materials for free, since as soon as we have compiled a new version of the study materials, our company will send the latest one of our study materials to your email immediately. The experts in our company are always keeping a close eye on even the slightest change in the field. Therefore, we can assure that you will miss nothing needed for the JN0-232 Exam. What's more, the latest version of our study materials will be a good way for you to broaden your horizons as well as improve your skills.
