Perfect Passing Arch-303 Score Feedback - Pass Arch-303 Exam

According to the different demands from customers, the experts and professors designed three different versions for all customers. According to your need, you can choose the most suitable version of our Salesforce Certified B2C Commerce Architect guide torrent for yourself. The three different versions have different functions. If you decide to buy our Arch-303 Test Guide, the online workers of our company will introduce the different function to you. You will have a deep understanding of the three versions of our Arch-303 exam questions. We believe that you will like our products.

Salesforce Certified B2C Commerce Architect Sample Questions (Q52-Q57):

NEW QUESTION # 52

During discovery, the customer required a feature that is not inducted in the standard Storefront Reference Architecture (SFRA). In order to save budget, the Architect needs to find the quickest way to implement this feature.

What is the primary resource the Architect should use to search for an existing community implementation of the requested feature?

- A. Salesforce Trailblazer Portal
- B. Salesforce Commerce Cloud Trailblazer community
- **C. Salesforce Commerce Cloud GitHub repository**
- D. Salesforce B2C Commerce Documentation

Answer: C

Explanation:

When seeking a community implementation of a feature not included in the standard Storefront Reference Architecture (SFRA), the primary resource should be the Salesforce Commerce Cloud GitHub repository (Answer A). This repository often contains projects and code samples contributed by other developers in the community, which might include custom implementations that could be

adapted to meet the customer's requirements. This approach not only leverages existing solutions that have been shared publicly but also can significantly save time and resources in development.

NEW QUESTION # 53

The client provided these business requirements:

- * The B2C Commerce platform will integrate with the client's Order Management System (OMS).
- * The OMS supports Integration us-no legacy RPC style SOAP services.
- * The OMS is hosted on client s infrastructure.

What is the right cartridge folder to place the WSDL provided for the OMS service?

- A. /cartridge/webreferences
- B. /cartridge
- C. /cartridge/services
- D. /cartridge/webreferences2

Answer: A

Explanation:

In Salesforce Commerce Cloud, the standard practice for organizing WSDL files for SOAP services is to place them in the /cartridge/webreferences directory. This folder is specifically designed for storing web service definitions (WSDLs), ensuring they are managed in a structured manner within the cartridge. This organization aids in maintaining clean architecture and simplifies access to these service definitions for development and maintenance purposes.

NEW QUESTION # 54

The following promotions are configured with no exclusivity (can be combined with any other promotion) in a - 1 month campaign:

- * Free correct- in -store shipping
- * 20% accessories products discount, applies for all customers
- * \$5 off coupon based discount, sent to a selected group of customers

The combination of above promotions allows customers to get 16 socks for free in store. This was unintended, and the Client If considering disabling the coupon. The Client is concerned about a potential spike in the number of Call Center calls from customers who had the coupon code added to their baskets before it was disabled. As basket lifetime is set to 30 days for all customers, this can continue for the full length of the campaign.

What solutions should the Architect suggest to keep the Call Center calls to a minimum?

- A. Disable the coupon code. Reduce the basket lifetime in Business Manager to expire some of the existing baskets
- B. Disable the coupon code. Email all the customers to not use the coupon code in their baskets.
- C. Disable the coupon code. Clear the production cache from the Business Manager to clear existing baskets.
- D. Disable the coupon code. Restart the production instance from control Center to clear existing baskets.

Answer: A

Explanation:

Reducing the basket lifetime is a strategic approach to minimizing the impact of disabling a promotional coupon. This action will cause baskets that may still contain the now-disabled coupon to expire sooner, thereby reducing the potential volume of calls to the Call Center from customers inquiring about the coupon.

This method also avoids the drastic measure of clearing all existing baskets or restarting the production instance, which could disrupt user experience and lead to further customer dissatisfaction.

NEW QUESTION # 55

There Is an Issue with the site when the domain Is opened from Google search results. After researching the problem. It turns out that the site returns * 404 page error when accessed with a parameter in the URL.

What should the Architect recommend to fix that issue?

- A. Add dynamic redirect if the URL contains parameter to Home Show. Add this snippet to the aliases configuration for the domain
- B. Add this snippet to the aliases configuration for the domain
- C. Add this snippet to the aliases configuration for the domain:

- **D. Add dynamic catch-all rule to redirect to home page.**

Answer: D

Explanation:

To address the issue of the site returning a 404 error when accessed with a parameter from Google search results, a dynamic catch-all rule to redirect such requests to the homepage is an effective solution (Answer A).

This approach ensures that users landing from external links with appended parameters, which might not match any configured route or alias, are redirected to a valid page instead of seeing an error page. This improves the user experience and minimizes potential bounce rates caused by broken links or outdated URLs.

NEW QUESTION # 56

a B2C Commerce developer has Implemented a job that connects to an SFTP, loops through a specific number of .csv files. and Generates a generic mapping for every file. In order to keep track of the mappings imported, if a generic mapping is created successfully, a custom object instance is created with the .

csv file name. After running the job in the Development instance, the developer checks the Custom Objects in Business Manager and notices there isn't a Custom Object for each csv file that was on SFTP.

What are two possible reasons that some generic mappings were not created? Choose 2 answers

- **A. The maximum number of generic mappings was reached.**
- B. The generic mappings definition need to be replicated from Staging before running the job.
- **C. Invalid format in one or more of the .csv files.**
- D. The job needs to run on Staging and then replicate the generic mappings and custom objects on Development

Answer: A,C

Explanation:

Two plausible reasons for some generic mappings not being created despite the SFTP job running are: A) the system reached its limit for the maximum number of generic mappings allowed, and C) there was an invalid format in one or more of the .csv files processed. When the maximum threshold for mappings is reached, the system cannot create additional mappings, thus stopping any further imports from being registered as custom objects. Additionally, if .csv files are incorrectly formatted, the job would fail to create mappings for those files, leading to the absence of corresponding custom objects in Business Manager. It's crucial to ensure that file formats adhere to expected specifications and that system limits are adequately managed to avoid such issues.

NEW QUESTION # 57

.....

If you have interests with our Arch-303 practice materials, we prefer to tell that we have contacted with many former buyers of our Arch-303 exam questions and they all talked about the importance of effective Arch-303 learning prep playing a crucial role in your preparation process. Our practice materials keep exam candidates motivated and efficient with useful content based wholly on the real Arch-303 Guide materials.
