# Valid Professional-Cloud-Database-Engineer Dumps & Professional-Cloud-Database-Engineer Paper

P.S. Free & New Professional-Cloud-Database-Engineer dumps are available on Google Drive shared by Lead1Pass: https://drive.google.com/open?id=1yWuytvTPJtoyyjoLGVzoKDJflYFLuYmP

With our software version of our Professional-Cloud-Database-Engineer guide braindumps, you can practice and test yourself just like you are in a real exam for our Professional-Cloud-Database-Engineer study materials have the advandage of simulating the real exam. The results of your Professional-Cloud-Database-Engineer Exam will be analyzed and a statistics will be presented to you. So you can see how you have done and know which kinds of questions of the Professional-Cloud-Database-Engineer exam are to be learned more.

Our Professional-Cloud-Database-Engineer exam questions boost 3 versions and varied functions. The 3 versions include the PDF version, PC version, APP online version. You can use the version you like and which suits you most to learn our Professional-Cloud-Database-Engineer test practice materials. The 3 versions support different equipment and using method and boost their own merits and functions. For example, the PC version supports the computers with Window system and can stimulate the real exam. Each version of our Professional-Cloud-Database-Engineer Study Guide provides their own benefits to help the clients learn the Professional-Cloud-Database-Engineer exam questions efficiently.

Professional-Cloud-Database-Engineer Paper, Professional-Cloud-Database-Engineer New Cram Materials

The free demo Google Professional-Cloud-Database-Engineer exam questions are available for instant download. Download the Google Certification Exams dumps demo free of cost and explores the top features of Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) exam questions and if you feel that the Professional-Cloud-Database-Engineer exam questions can be helpful in Google Professional-Cloud-Database-Engineer exam preparation then take your buying decision. Best of luck!!!

Achieving the Google Professional-Cloud-Database-Engineer Certification can help database engineers demonstrate their expertise and advance their careers. Certified professionals are recognized as experts in their field and are often sought after by employers looking for skilled database engineers who can work with GCP.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q43-Q48):

NEW QUESTION # 43

You have a large Cloud SQL for PostgreSQL instance. The database instance is not mission-critical, and you want to minimize operational costs. What should you do to lower the cost of backups in this environment?

- A. Change the storage tier of the automated backups from solid-state drive (SSD) to hard disk drive (HDD).
- B. Set the automated backups to occur every other day to lower the frequency of backups.
- C. Select a different region to store your backups.
- D. Reduce the number of automated backups that are retained to two (2).

Answer: D

Explanation:
By default, for each instance, Cloud SQL retains seven automated backups, in addition to on-demand backups. You can configure how many automated backups to retain (from 1 to 365). We charge a lower rate for backup storage than for other types of instances. https://cloud.google.com/sql/docs/mysql/backup-recovery/backups

NEW QUESTION # 44
During an internal audit, you realized that one of your Cloud SQL for MySQL instances does not have high availability (HA) enabled. You want to follow Google-recommended practices to enable HA on your existing instance. What should you do?

- A. Use the gcloud instances patch command to update your existing Cloud SQL for MySQL instance.
- B. Shut down your existing Cloud SQL for MySQL instance, and enable HA.
- C. Create a new Cloud SQL for MySQL instance, enable HA, and use the export and import option to migrate your data.
- D. Create a new Cloud SQL for MySQL instance, enable HA, and use Cloud Data Fusion to migrate your data.

Answer: A

Explanation:
Creating a new instance and migrating data can be time-consuming and disruptive to your application's availability. Shutting down the existing instance is not a recommended approach, as it will cause downtime for your application.
The recommended approach is to use the gcloud instances patch command to enable high availability on your existing Cloud SQL for MySQL instance. This command updates the instance's configuration to enable the failover replica, configure it, and enable automatic failover.
By following this approach, you can ensure minimal downtime, and your application can continue to operate during the process.

NEW QUESTION # 45
You are managing two different applications: Order Management and Sales Reporting. Both applications interact with the same Cloud SQL for MySQL database. The Order Management application reads and writes to the database 24/7, but the Sales Reporting application is read-only. Both applications need the latest dat a. You need to ensure that the Performance of the Order Management application is not affected by the Sales Reporting application. What should you do?

- A. Create a read replica for the Sales Reporting application.
- B. Queue up all the requested reports in PubSub, and execute the reports at night.
- C. Create two separate databases in the instance, and perform dual writes from the Order Management application.
- D. Use a Cloud SQL federated query for the Sales Reporting application.

Answer: D

NEW QUESTION # 46
An analytics team needs to read data out of Cloud SQL for SQL Server and update a table in Cloud Spanner.
You need to create a service account and grant least privilege access using predefined roles. What roles should you assign to the service account?

- A. roles/cloudsql.viewer and roles/spanner.databaseUser
- B. roles/cloudsql.client and roles/spanner.databaseReader
- C. roles/cloudsql.editor and roles/spanner.admin
- D. roles/cloudsql.instanceUser and roles/spanner.databaseUser

Answer: A

Explanation:
To read data out of Cloud SQL for SQL Server, you need to use a service account with the roles/cloudsql.
viewer role on the Cloud SQL instance. This role grants the service account permission to read data from the instance. Whereas
roles/cloudsql.instanceUser will only allow to login to cloud SQL instance. No resource will be allowed to view.

NEW QUESTION # 47

You need to migrate existing databases from Microsoft SQL Server 2016 Standard Edition on a single Windows Server 2019
Datacenter Edition to a single Cloud SQL for SQL Server instance. During the discovery phase of your project, you notice that your
on-premises server peaks at around 25,000 read IOPS. You need to ensure that your Cloud SQL instance is sized appropriately to
maximize read performance. What should you do?

- A. Create a SQL Server 2019 Standard on High Memory machine type with 16 vCPUs, 104 GB of RAM, and 4 TB of
  SSD.
- B. Create a SQL Server 2019 Standard on Standard machine type with 4 vCPUs, 15 GB of RAM, and 800 GB of solid-
  state drive (SSD).
- C. Create a SQL Server 2019 Enterprise on High Memory machine type with 16 vCPUs, 104 GB of RAM, and 500 GB of
  SSD.
- D. Create a SQL Server 2019 Standard on High Memory machine type with at least 16 vCPUs, 104 GB of RAM, and 200
  GB of SSD.

Answer: A

Explanation:
Given that Google SSD performance is related to the size of the disk in an order of 30 IOPS for each GB, ti would require at least
833 GB to handle 25000 IOPS, the only answer that exceeds this value is C.
https://cloud.google.com/compute/docs/disks/performance

NEW QUESTION # 48

......

Even if you spend a small amount of time to prepare for Professional-Cloud-Database-Engineer certification, you can also pass the
exam successfully with the help of Lead1Pass Google Professional-Cloud-Database-Engineer braindump. Because Lead1Pass
exam dumps contain all questions you can encounter in the actual exam, all you need to do is to memorize these questions and
answers which can help you 100% pass the exam. This is the royal road to Pass Professional-Cloud-Database-Engineer Exam.
Although you are busy working and you have not time to prepare for the exam, you want to get Google Professional-Cloud-
Database-Engineer certificate. At the moment, you must not miss Lead1Pass Professional-Cloud-Database-Engineer certification
training materials which are your unique choice.
