

NS0-185 Guaranteed Questions Answers & NS0-185 Valid Exam Preparation

1 | Page

NUR 185 FINAL EXAM 1 NEWEST 2025 ACTUAL EXAM COMPLETE 100 QUESTIONS AND CORRECT DETAILED ANSWERS (VERIFIED ANSWERS) |100% GUARANTEED PASS!

What does oral care in prevention of VAP include?

Clean mouth with chlorhexidine daily

Brush twice a day

Rinse their mouth four times a day

What are interventions for a patient on restraints?

Assess circulation

Give fluids

Use a slip knot

check every 1-2 hours

We are constantly updating our Network Appliance NS0-185 practice material to ensure that students receive the latest NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) Questions based on the actual Building NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) exam content. Moreover, we also offer up to 1 year of free updates and free demos. Real4exams also offers a money-back guarantee (terms and conditions apply) for applicants who fail to pass the NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) test on the first try.

We provide 1 year of free updates. In conclusion, Real4exams guarantees that if you use the product, you will pass the NS0-185 exam on your first try. Its primary goal is to save students time and money, not just conduct a business transaction. Candidates can take advantage of the free trials to evaluate the quality and standard of the NS0-185 Dumps before making a purchase. With the right NS0-185 study material and support team passing the examination at first attempt is an achievable goal.

>> NS0-185 Guaranteed Questions Answers <<

Network Appliance - NS0-185 - Useful NetApp Storage Installation Engineer, ONTAP Professional Exam Guaranteed Questions Answers

Our NS0-185 study practice guide takes full account of the needs of the real exam and conveniences for the clients. Our NS0-185 certification questions are close to the real exam and the questions and answers of the test bank cover the entire syllabus of the real

exam and all the important information about the exam. Our NS0-185 learning dump can stimulate the real exam's environment to make the learners be personally on the scene and help the learners adjust the speed when they attend the real exam. To be convenient for the learners, our NS0-185 Certification Questions provide the test practice software to help the learners check their learning results at any time.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q119-Q124):

NEW QUESTION # 119

You have added two new AFF A250 nodes to an existing 4-node cluster with NetApp CN1610 cluster network switches. Although the nodes can join the cluster, the storage failover show command output shows that the NVRAM log is not synchronized, and it cannot reach the partner over an HA interconnect.

In this scenario, which two statements are true? (Choose two.)

- A. The AFF A250 uses different ports for the cluster and the HA interconnect.
- B. The AFF A250 requires switches with 25GbE port support.
- C. The AFF A250 uses the same port for the cluster and the HA interconnect.
- D. The AFF A250 requires switches with 40GbE port support.

Answer: B,C

Explanation:

AFF A250 systems use a converged networking design, where the same physical ports are used for both cluster interconnect traffic and HA interconnect traffic. This differs from older platforms that used dedicated HA interconnect ports.

The NetApp CN1610 switches only support 10GbE, which is insufficient for AFF A250 systems. AFF A250 platforms require 25GbE-capable cluster switches to support both cluster and HA interconnect traffic.

Because the cluster ports are operational, the nodes can join the cluster. However, the HA interconnect traffic cannot be established due to insufficient switch capability, which explains why the NVRAM log cannot synchronize and the HA partner is unreachable.

Therefore:

- * The AFF A250 requires switches with 25GbE port support
- * The AFF A250 uses the same ports for cluster and HA interconnect

Statements involving 40GbE or separate HA ports are incorrect.

The correct answers are C and D.

NEW QUESTION # 120

After the installation of a new 2-node cluster, you want to ensure AutoSupport is working as expected.

Which two ways can you trigger a new AutoSupport? (Choose two.)

- A. Use the ping command on the mailhost.
- B. Use the system node autosupport invoke -type test command.
- C. Use the OnCommand Unified Manager GUI.
- D. Use the OnCommand System Manager GUI.

Answer: B,D

Explanation:

AutoSupport can be manually triggered using the ONTAP CLI command or via System Manager. Ping tests and Unified Manager do not trigger AutoSupport generation.

NEW QUESTION # 121

You are installing a new six-node ONTAP 9.8 cluster. You have completed the initial configuration of the cluster interconnect switches and the ONTAP cluster.

In this scenario, which feature should you enable?

- A. IPv6 on all cluster ports
- B. cluster switch logging
- C. cluster switch health monitor
- D. data center bridging protocol

Answer: C**Explanation:**

After completing the initial configuration of a multi-node ONTAP cluster and its cluster interconnect switches, NetApp installation best practices require enabling proactive monitoring of the cluster network. The Cluster Switch Health Monitor (CSHM) is the ONTAP feature designed specifically for this purpose.

CSHM continuously monitors the health of supported cluster switches by collecting information such as switch configuration, port status, firmware versions, cabling, and error conditions. It validates this information against NetApp-supported configurations and best practices. When deviations or risks are detected, CSHM generates alerts and EMS messages that allow administrators to take corrective action before cluster communication is affected.

Cluster switch logging alone does not provide health analysis or proactive validation; it only records switch events. IPv6 is not required or recommended for cluster interconnect networks in standard ONTAP installations. Data Center Bridging (DCB) is used for specific Ethernet storage protocols and is not applicable to ONTAP cluster interconnect networks.

Therefore, enabling the cluster switch health monitor is the correct and required post-installation step.

NEW QUESTION # 122

Which two switch operating systems are supported on ONTAP cluster switches?(Choose two.)

- A. Brocade FOS
- B. Cisco IOS
- C. Cisco NX-OS
- D. Broadcom EFOS

Answer: C,D**NEW QUESTION # 123**

A customer is asked to install a new AFF ASA A700 system. During the installation, the customer asks if ONTAP 9.8 is supported with their host's OS version running Windows 2016.

In this scenario, which NetApp tool would verify supportability?

- A. Active IQ Unified Manager
- B. ONTAP System Manager
- C. Active IQ OneCollect
- D. Interoperability Matrix Tool

Answer: D**Explanation:**

Verifying interoperability between ONTAP versions, storage platforms, host operating systems, protocols, and host utilities is a mandatory step in NetApp solution assessment and installation planning. The Interoperability Matrix Tool (IMT) is the authoritative NetApp resource used to confirm whether a specific combination of components is supported.

In this scenario, the customer needs to verify that ONTAP 9.8 is supported with Windows Server 2016 on an AFF ASA A700 system. IMT allows administrators to search by storage OS version, platform model, host OS, protocol (iSCSI, FC, NVMe), and host utilities to ensure the configuration is supported.

ONTAP System Manager is used for system administration, not supportability validation. Active IQ Unified Manager focuses on monitoring and performance. Active IQ OneCollect is used for data collection, not compatibility verification.

Therefore, the correct tool is the Interoperability Matrix Tool.

NEW QUESTION # 124

.....

The NS0-185 practice questions at Real4exams NS0-185 cover all the key topics and areas of knowledge necessary to get success on the first try. The product of Real4exams is designed by professionals and is regularly updated to reflect the latest changes in the content. The Real4exams recognizes that students may have different learning styles and preferences. Therefore, the Real4exams offers PDF format, desktop practice exam software, and NS0-185 Exam Questions to help customers prepare for the NS0-185 exam successfully.
