Through years of persistent efforts and centering on the innovation and the clients-based concept, our company has grown into the flagship among the industry. Our company struggles hard to improve the quality of our CDP-3002 study materials and invests a lot of efforts and money into the research and innovation of our CDP-3002 Study Materials. Our brand fame in the industry is like the Microsoft in the computer industry, Google in the internet industry and Apple in the cellphone industry. High quality, considerate service, constant innovation and the concept of customer first are the four pillars of our company.

Together, the after-sale service staffs in our company share a passion for our customers, an intense focus on teamwork, speed and agility, and a commitment to trust and respect for all individuals. At present, our company is a leading global provider of CDP-3002 preparation exam in the international market. Therefore, after buying our CDP-3002 Study Guide, if you have any questions about our CDP-3002 study materials, please just feel free to contact with our online after sale service staffs on our CDP-3002 exam questions.

100% Pass Quiz Cloudera - CDP-3002 - Reliable CDP Data Engineer - Certification Exam Minimum Pass Score

ExamsTorrent CDP-3002 practice material can be accessed instantly after purchase, so you won't have to face any excessive issues for preparation of your desired Cloudera CDP-3002 certification exam. The Cloudera CDP-3002 Exam Dumps of ExamsTorrent has been made after seeking advice from many professionals. Our objective is to provide you with the best learning material to clear the CDP-3002 exam.

Cloudera CDP Data Engineer - Certification Exam Sample Questions (Q66-Q71):

NEW QUESTION # 66

Which of the following is NOT a factor considered by the Optimization Framework when optimizing a query?

- A. User-defined functions (UDFs) complexity
- **B. The phase of the moon**
- C. Data skewness
- D. Network latency between nodes

Answer: B

Explanation:

The Optimization Framework considers various factors like data distribution (skewness), the complexity of operations (including UDFs), and network performance among nodes. The phase of the moon is irrelevant to query optimization and is not considered by the framework.

NEW QUESTION # 67

You're given a DataFrame containing information about flights, including columns "origin", "destination", and "delay_minutes". How can you find the top 5 origin airports with the most delayed flights on average?

- A. Leverage Spark SQL's RANK function along with windowing to identify top 5 origins
- B. Implement a custom function to calculate average delays for each origin and then sort and filter
- **C. Use groupBy and avg on "delay_minutes", then sort by the average in descending order and limit to top 5**
- D. Use Spark's machine learning library (MLlib) for ranking and classification

Answer: C

Explanation:

Option A provides a straightforward and efficient approach. Here's the code: `top_delayed_origins_df = df.groupBy("origin").agg(avg("delay_minutes").alias("avg_delay")) \ sort("avg_delay", ascending=False) \ .limit(5)`
`top_delayed_origins_df.show()`

NEW QUESTION # 68

Your Spark application encounters frequent failures during the execution of a specific stage. How can you utilize Spark's persistence mechanisms to improve the application's fault tolerance?

- A. Implement custom retry logic within the failing stage
- B. Increase the number of Spark executors to handle potential resource limitations
- C. Persist the RDDs used in the failing stage with MEMORY_ONLY storage level
- **D. Leverage Spark's checkpointing functionality to save application state periodically**

Answer: D

Explanation:

While custom retry logic A might help, it can be complex and error-prone. MEMORY_ONLY persistence B might not be reliable in case of node failures. Checkpointing C allows Spark to resume execution from the latest checkpoint after a failure, avoiding complete re-computation and improving fault tolerance. Increasing executors D might not address the specific issue of stage failures.

NEW QUESTION # 69

You're working with a team of data engineers who collaborate on developing and maintaining Airflow DAGs. How can you ensure version control and maintain a consistent development workflow?

- A. Implement a custom workflow management system outside of Airflow for managing DAG development.
- B. Grant full access to the Airflow web UI to all team members for code modifications, regardless of their roles.
- **C. Utilize a version control system like Git to track changes in the DAG code and enable collaborative development.**
- D. Store all DAG code in a shared folder on a local file system, relying on manual coordination between team members.

Answer: C

Explanation:

While option A might be necessary for specific metrics, option B and D highlight Airflow's built-in capabilities: Airflow Metrics: Allow you to track DAG run times, task execution times, and success/failure rates, providing insights into performance. Alerts and Notifications (Optional): Can be configured to trigger upon events like DAG failures or performance thresholds being breached, enabling proactive monitoring and troubleshooting.

NEW QUESTION # 70

When would it be advantageous to use both partitioning and bucketing on a Hive table?

- A. When data needs to be stored in a single file for archival purposes
- **B. When dealing with large datasets that require efficient querying and data sampling**
- C. When data security is a primary concern
- D. When managing small datasets to reduce complexity

Answer: B

Explanation:

Using both partitioning and bucketing on a Hive table is advantageous when dealing with large datasets that require efficient querying and data management. Partitioning allows for segregating data into logical segments based on column values, reducing the data scanned during queries. Bucketing further divides each partition into more manageable chunks (buckets) based on a hash function of a column, which can improve performance for certain types of queries and enable more efficient data sampling and join operations.

NEW QUESTION # 71

.....

All contents of the CDP-3002 exam questions are masterpieces from experts who imparted essence of the exam into our CDP-3002 study prep. So our high quality and high efficiency CDP-3002 practice materials conciliate wide acceptance around the world. By incubating all useful content CDP-3002 training engine get passing rate from former exam candidates of 98 which evince our accuracy rate and proficiency.
