The Configuring and Operating Microsoft Azure Virtual Desktop certification exam is designed to validate the candidate's proficiency in various areas such as configuring virtual desktops, managing user identities and access, managing storage solutions, and monitoring and maintaining the virtual desktop environment. Furthermore, the certification exam also covers topics related to deploying and managing applications on virtual desktops, configuring networking and security, and managing virtual desktop solutions using automation and scripting. The Microsoft AZ-140 Certification is ideal for IT professionals who want to specialize in virtual desktop infrastructure management and gain recognition for their skills and expertise in the field.

## Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q98-Q103):

### NEW QUESTION # 98

You have an Azure Virtual Desktop host pool named Pool1 that contains three session hosts. The session hosts are configured to use FSLogix profiles.

On a management computer, you create an Application Masking rule and assignment files.

You need to apply Application Masking to the session hosts in Pool1.

What should you do?

- A. Install the FSLogix agent on the session hosts in Pool1.
- B. Copy the files to the session hosts in Pool1.

- C. Compile the rule and assignment files.
- D. Generate a registration token.

**Answer: B**

Explanation:

<https://docs.microsoft.com/en-us/fslogix/application-masking-rules-ht#deploying-rule-sets>

#### NEW QUESTION # 99

You have a Windows Virtual Desktop deployment.

You need to ensure that all the connections to the managed resources in the host pool require multi-factor authentication (MFA).

Which two settings should you modify in a conditional access policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**
