## ED-Con-101 Examcollection, New ED-Con-101 Braindumps

Our ED-Con-101 exam questions have a 99% pass rate. What does this mean? As long as you purchase our ED-Con-101 exam simulating and you are able to persist in your studies, you can basically pass the exam. This passing rate is not what we say out of thin air. This is the value we obtained from analyzing all the users' exam results. It can be said that choosing ED-Con-101 study engine is your first step to pass the exam. Don't hesitate, just buy our ED-Con-101 practice engine and you will succeed easily!

## Salesforce Certified Education Cloud Consultant Sample Questions (Q128-Q133):

### NEW QUESTION # 128

The VP of Development is preparing to visit the university's top supporters. The VP wants to maximize travel time by prioritizing pledges. that are most likely to close.

Which reporting solution should the consultant recommend?

- A. Opportunity Funnel Report
- B. Salesforce Maps
- C. Einstein Forecasting
- D. Einstein Opportunity Scoring

**Answer: D**

Explanation:

Einstein Opportunity Scoring is a reporting solution that the consultant can recommend to help the VP of Development prioritize pledges that are most likely to close. Einstein Opportunity Scoring is a feature that uses artificial intelligence to analyze historical data

and assign a score to each Opportunity, indicating how likely it is to be won. Einstein Opportunity Scoring also provides insights and explanations for the score, such as key factors and trends. The VP of Development can use Einstein Opportunity Scoring to sort and filter Opportunities by their score and focus on the ones with the highest probability of closing. Salesforce Maps, Opportunity Funnel Report, and Einstein Forecasting are not reporting solutions that can help the VP of Development prioritize pledges that are most likely to close. Reference:

#### NEW QUESTION # 129

A consultant is working with a university that uses Salesforce and wants to install the Education Data Architecture (EDA) in that environment.

What does the consultant need to do after installing EDA to ensure it is set up correctly?

- **A. Make the EDA record types available to profiles.**
- B. Assign EDA access to a cloned System Admin profile.
- C. Assign EDA layouts to the Cases object.
- D. Create and assign roles to all users who have access to EDA.

**Answer: A**

Explanation:

After installing EDA, the consultant needs to make the EDA record types available to profiles that need to access them. This is because EDA comes with several custom record types for standard objects, such as Account, Contact, Course, and Program Enrollment. These record types enable different views and fields for different types of records, such as Household, Student, Faculty, Course Offering, and Program Enrollment. By default, these record types are not assigned to any profiles, so the consultant needs to manually assign them to the appropriate profiles based on the business requirements and user roles of the university. This will ensure that the users can see and use the EDA record types and fields correctly and efficiently. Reference: Education Data Architecture Basics, Assign Record Types to Profiles

#### NEW QUESTION # 130

Recruiters want to visualize the number of prospective students at various stages in the recruitment process.

Which report chart should the consultant implement?

- **A. Opportunity Funnel report**
- B. Application Tabular report
- C. Education History dashboard
- D. Program Enrollment dashboard

**Answer: A**

Explanation:

Opportunity Funnel report is a report chart that the consultant can implement to help recruiters visualize the number of prospective students at various stages in the recruitment process. Opportunity Funnel report is a type of report that shows the distribution of Opportunities by stage, amount, or probability. Opportunity Funnel report can be used to track the progress and performance of the recruitment pipeline, and identify bottlenecks or opportunities for improvement. Application Tabular report, Education History dashboard, and Program Enrollment dashboard are not report charts that can help recruiters visualize the number of prospective students at various stages in the recruitment process. #### NEW QUESTION # 131

A university uses Admissions Connect and wants to digitally transform its Study Abroad processes. Currently, staff need to check multiple spreadsheets to identify which Study Abroad students have completed specific tasks to qualify for the program.

Which solution should a consultant recommend?

- A. Program Plan
- **B. Action Plans**

- C. Pathways
- D. Attendance Event

**Answer: B**

Explanation:

Action Plans are a feature of Admissions Connect that allow staff to create and assign tasks to students, track their progress, and automate reminders and notifications. Action Plans can be used to streamline the Study Abroad process by creating a template of tasks that students need to complete to qualify for the program, such as submitting an application, attending an orientation, obtaining a visa, etc. Staff can then assign the Action Plan to each student who is interested in studying abroad and monitor their completion status. Action Plans can also be integrated with Salesforce Communities to provide students with a self-service portal where they can view and update their tasks, upload documents, and communicate with staff. Reference: [Admissions Connect Documentation], [Admissions Connect: Action Plans]

### NEW QUESTION # 132

A university plans to implement Advisor Link for approximately 90,000 students. The university needs to populate data from the student information system (SIS) to Salesforce. The data exported from SIS needs to be automatically modified to correspond to values in Salesforce.

Which integration approach should the consultant recommend?

- A. Salesforce Data Import Wizard
- B. Salesforce Data Loader
- **C. ETL tool**
- D. Lightning Connect

**Answer: C**

Explanation:

An ETL tool is an integration approach that the consultant should recommend to populate data from the SIS to Salesforce, and automatically modify the data to correspond to values in Salesforce. An ETL tool is a software application that can extract, transform, and load data from one system to another. An ETL tool can perform data transformations such as mapping, filtering, sorting, and aggregating, to ensure that the data from the SIS matches the values in Salesforce. Lightning Connect, Salesforce Data Import Wizard, and Salesforce Data Loader are not integration approaches that can automatically modify the data to correspond to values in Salesforce. Reference:
