Our Dumpcollection 3V0-21.23 exam certification training material is the collection of experience and innovation results of highly certified IT professionals in IT industry. We guarantee that after you buy Dumpcollection 3V0-21.23 certification exam training materials, we will provide free renewal service for one year. If 3V0-21.23 Exam Certification training materials have any quality problem or you fail 3V0-21.23 exam certification, we will give a full refund unconditionally.

VMware vSphere 8.x Advanced Design Sample Questions (Q68-Q73):

NEW QUESTION # 68

An architect is designing a VMware solution for a customer to meet the following requirements:

- The solution must use investments in existing storage array that supports both block and file storage.
- The solution must support the ability to migrate workloads between hosts within a cluster.
- The solution must support resource management priorities.
- The solution must support the ability to connect virtual machines directly to LUNs.
- The solution should use existing 32G fabric infrastructure. There is no budget for additional physical hardware.

Which design decision should the architect make to meet these requirements?

- A. The ESXi hosts will leverage Fibre Channel over Ethernet (FCoE).
- B. The ESXi hosts will leverage NFS.
- C. The ESXi hosts will leverage iSCSI.
- **D. The ESXi hosts will leverage Fibre Channel (FC).**

Answer: D

NEW QUESTION # 69

An architect is designing the expansion of an existing vSphere 7 environment. The customer is requesting a design for a new cluster to support the anticipated future business growth. The requirements specified for the existing environment design must be considered when designing the new cluster.

The existing design has the following requirements:

- REQ01 The environment has an availability target of 99.5% for all infrastructure.
- REQ02 The recovery time objective (RTO) for Tier 1 virtual machines is one hour.
- REQ03 Windows and Linux virtual machines must reside on separate clusters.
- REQ04 Access to the management cluster within the environment must be controlled.

Which of the listed requirements would be classified as a functional requirement?

- **A. Access to the management cluster within the environment must be controlled**
- B. The recovery time objective (RTO) for Tier 1 virtual machines is one hour
- C. Windows and Linux virtual machines must reside on separate clusters
- D. The environment has an availability target of 99.5% for all infrastructure

Answer: A

NEW QUESTION # 70

An architect is designing a new backup solution for a vSphere platform that has been recently upgraded to vSphere 7.

The architect wants the backup solution to perform the following:

- Full virtual machine image backup and restore
- Incremental virtual machine image backup and restore
- File level backup and restore within both Windows and Linux virtual machines
- LAN-free backup

Which functional requirement should the architect include in the design of the new backup solution?

- A. The backup solution must leverage virtual machine snapshots.
- **B. The backup solution must leverage VMware vSphere Storage APIs - Data Protection.**
- C. The backup solution must leverage the VMware Consolidated Backup (VCB) framework.
- D. The backup solution must leverage VMware vStorage APIs for Data Protection (VADP).

Answer: B

Explanation:

<https://kb.vmware.com/s/article/1021175>

VCB and VDP are EOL and no longer supported.

NEW QUESTION # 71

What does a network requirement specify?

- **A. The network bandwidth and connectivity needs.**
- B. The type and size of data storage devices required.
- C. The desired response time for system interactions.
- D. The expected number of concurrent users accessing the system.

Answer: A

NEW QUESTION # 72

An architect has 50 ESXi hosts to deploy and DHCP servers are not allowed on any network. Which automated host deployment method should the architect use?

- A. Stateless vSphere Auto Deploy
- **B. Scripted installation**
- C. Interactive installation
- D. Stateful vSphere Auto Deploy

Answer: B

Explanation:

"Running a script is an efficient way to deploy multiple ESXi hosts" with an unattended installation.
