## 100% Pass 2026 Efficient CIMAPRA19-F03-1: F3 Financial Strategy Valid Test Fee

The most important feature of the online version of our CIMAPRA19-F03-1 learning materials are practicality. The online version is open to all electronic devices, which will allow your device to have common browser functionality so that you can open our products. At the same time, our online version of the CIMAPRA19-F03-1 Learning Materials can also be implemented offline, which is a big advantage that many of the same educational products are not able to do on the market at present.

CIMA F3 certification exam is divided into two parts: objective test and case study. The objective test consists of 60 multiple-choice questions that cover the key concepts and theories of financial management. The case study part of the exam is designed to test the candidate's ability to apply these concepts and theories to real-world scenarios. The case study exam consists of four to five questions that are based on a given scenario.

### CIMA F3 Financial Strategy Sample Questions (Q181-Q186):

#### NEW QUESTION # 181

A company needs to raise \$40 million to finance a project. It has decided on a rights issue at a discount of 20% to its current market share price.

There are currently 20 million shares in issue with a nominal value of \$1 and a market price of \$10.00 per share.

- A. 1 new share for every 4 existing shares
- B. 1 new share for every 5 existing shares
- C. 1 new share for every 25 existing shares
- D. 1 new share for every 20 existing shares

**Answer: A**

Explanation:

The company needs to raise \$40 million via a rights issue.

Current share price = \$10

Rights issue at a 20% discount, so issue price =

$10 \times (1 - 0.20) = 10 \times 0.8 = \$8$  Number of new shares needed:

$\text{New shares} = \frac{40}{8} = 5 \text{ million shares}$

There are currently 20 million shares in issue, so the rights issue ratio is:

$\frac{\text{New shares}}{\text{Existing shares}} = \frac{5}{20} = \frac{1}{4}$

So, shareholders will receive 1 new share for every 4 existing shares.

#### NEW QUESTION # 182

Which of the following statements is true of a spin-off (or demerger)?

- A. Increases the risk of a takeover bid for the core entity.
- B. Raises finance to fund new projects.
- C. Changes the ownership structure of the core entity by introducing new shareholders.
- D. Allows investors to identify the true value of the demerged business.

**Answer: D**

Explanation:

A spin-off/demerger normally involves separating a division or subsidiary and giving its shares to the existing shareholders. It doesn't in itself raise finance (A), it doesn't introduce new shareholders to the core entity (B), and it does not inherently increase takeover risk (D). Its main advantage is that it allows the market to value the demerged business separately, revealing its "true" value - C is correct.

#### NEW QUESTION # 183

A company is planning to repurchase some of its shares. Relevant details are as follows:

- \* 100 million shares in issue
- \* Current share price \$5
- \* 5 million shares to be repurchased
- \* 10% repurchase premium
- \* Repurchased shares to be cancelled

What would you expect the share price after the repurchase to be?

Give your answer to two decimal places.

**Answer:**

Explanation:

\$ ?

4.97, 4.98

#### NEW QUESTION # 184

A listed company is financed by debt and equity.

If it increases the proportion of debt in its capital structure it would be in danger of breaching a debt covenant imposed by one of its lenders.

The following data is relevant:

□ The company now requires \$800 million additional funding for a major expansion programme.

Which of the following is the most appropriate as a source of finance for this expansion programme?

- A. Private placement of a bond
- **B. Rights issue**
- C. Retained earnings
- D. Bank overdraft

**Answer: B**

#### NEW QUESTION # 185

A company is wholly equity funded. It has the following relevant data:

- \* Dividend just paid \$4 million
- \* Dividend growth rate is constant at 5%
- \* The risk free rate is 4%
- \* The market premium is 7%
- \* The company's equity beta factor is 1.2

Calculate the value of the company using the Dividend Growth Model.

Give your answer in \$ million to 2 decimal places.

\$ ? million

**Answer:**

Explanation:

56.76, 56.75

#### NEW QUESTION # 186
