

# Free Updates for 365 Days on Cisco 200-201 Exam Questions

The screenshot shows a computer window for a Cisco 200-201 exam. The title bar says '200-201-prepaway-premium-exam.122q' and '79 of 122'. The main content area displays a log entry:

```
Mar 6 10:35:34 user sshd[12900]: pam_unix(sshd:auth):authentication failure;
logname= uid=0 euid=0 tty=ssh ruser= rhost=127.0.0.1
Mar 6 10:35:36 user sshd[12900]: Failed password for invalid user not_bill from
127.0.0.1 port 38346 ssh2
```

Below the log entry is a question: 'Refer to the exhibit. In which Linux log file is this output found?' with four options:

- A. /var/log/authorization.log
- B. /var/log/dmesg
- C. /var/log/lastlog
- D. /var/log/auth.log

At the bottom of the window are 'Prev' and 'Next' buttons.

## Online Cisco 200-201 Web-based Practice Test

We think of providing the best services as our obligation. So we have patient colleagues offering help 24/7 and solve your problems about 200-201 training materials all the way. We have considerate services as long as you need us. Do not underestimate your ability, we will be your strongest backup while you are trying with our 200-201 Real Exam. Besides, to fail while trying hard is no dishonor. We will provide the free update of our 200-201 study engine until you pass your exam successfully!

## Cisco Understanding Cisco Cybersecurity Operations Fundamentals Sample Questions (Q191-Q196):

### NEW QUESTION # 191

How does statistical detection differ from rule-based detection?

- A. Rule-based detection involves the evaluation of events, and statistical detection requires an evaluated set of events to function. Rule-based detection defines
- B. Statistical detection involves the evaluation of events, and rule-based detection requires an evaluated set of events to function.
- **C. Statistical detection defines legitimate data over time, and rule-based detection works on a predefined set of rules**
- D. legitimate data over a period of time, and statistical detection works on a predefined set of rules

**Answer: C**

Explanation:

Statistical detection relies on analyzing data over time to identify patterns and anomalies, without predefined rules. It uses algorithms and statistical models to determine normal behavior and identify deviations.

Rule-based detection uses predefined rules or patterns to identify known threats or vulnerabilities, often based on signatures or behaviors associated with specific attacks.

### NEW QUESTION # 192

Which type of attack is a blank email with the subject "price deduction" that contains a malicious attachment?

- A. **phishing attack**
- B. integrity violation
- C. man-in-the-middle attack
- D. smishing

**Answer: A**

Explanation:

A phishing attack often involves sending emails that appear to be from reputable sources with the goal of inducing individuals to reveal personal information, such as passwords and credit card numbers. In this case, the email with the subject "price deduction" containing a malicious attachment is designed to trick the recipient into opening the attachment, which can then execute harmful software on their device

### NEW QUESTION # 193

What is a difference between an inline and a tap mode traffic monitoring?

- A. **Inline monitors traffic without examining other devices, while a tap mode tags traffic and examines the data from monitoring devices.**
- B. Inline mode monitors traffic path, examining any traffic at a wire speed, while a tap mode monitors traffic as it crosses the network.
- C. Tap mode monitors traffic direction, while inline mode keeps packet data as it passes through the monitoring devices.
- D. Tap mode monitors packets and their content with the highest speed, while the inline mode draws a packet path for analysis.

**Answer: A**

### NEW QUESTION # 194

Refer to the exhibit.
