If you are hesitating about which version should you choose, you can download our 1z0-071 free demo first to get a firsthand experience before you make any decision. You will love our 1z0-071 study guide for sure!

Oracle Database SQL Sample Questions (Q18-Q23):

NEW QUESTION # 18

You need to produce a report where each customer's credit limit has been incremented by \$1000. In the output, the customer's last name should have the heading Name and the incremented credit limit should be labeled New Credit Limit. The column headings should have only the first letter of each word in uppercase.

Which statement would accomplish this requirement?

- A. `SELECT cust_last_name AS "Name", cust_credit_limit + 1000AS "New Credit Limit"FROM customers;`
- B. `SELECT cust_last_name AS Name, cust_credit_limit + 1000"New Credit Limit"FROM customers;`
- C. `SELECT INITCAP (cust_last_name) "Name", cust_credit_limit + 1000INITCAP ("NEW CREDIT LIMIT")FROM customers;`
- D. `SELECT cust_last_name AS Name, cust_credit_limit + 1000AS New Credit LimitFROM customers;`

Answer: A

NEW QUESTION # 19

Which two tasks require subqueries?

- A. Display the total number of products supplied by supplier 102 which have a product status of obsolete.
- **B. Display the number of products whose PROD_LIST_PRICE is more than the average PROD_LIST_PRICE.**
- **C. Display products whose PROD_MIN_PRICE is more than the average PROD_LIST_PRICE of all products, and whose status is orderable.**
- D. Display the minimum PROD_LIST_PRICE for each product status.
- E. Display suppliers whose PROD_LIST_PRICE is less than 1000.

Answer: B,C

NEW QUESTION # 20

View the exhibit and examine the data in ORDERS_MASTER and MONTHLY_ORDERS tables.

Evaluate the following MERGE statement:

```
MERGE INTO orders_master o
```

```
USING monthly_orders m
```

```
ON (o.order_id = m.order_id)
```

```
WHEN MATCHED THEN
```

```
UPDATE SET o.order_total = m.order_total
```

```
DELETE WHERE (m.order_total IS NULL)
```

```
WHEN NOT MATCHED THEN
```

```
INSERT VALUES (m.order_id, m.order_total);
```

What would be the outcome of the above statement?

- **A. The ORDERS_MASTER table would contain the ORDER_IDS 1, 2 and 4.**
- B. The ORDERS_MASTER table would contain the ORDER_IDS 1, 2 and 3.
- C. The ORDERS_MASTER table would contain the ORDER_IDS 1 and 2.
- D. The ORDERS_MASTER table would contain the ORDER_IDS 1, 2, 3 and 4.

Answer: A

NEW QUESTION # 21

Examine the description of the BOOKS_TRANSACTIONS table:

Which two WHERE conditions give the same result?

- A. WHERE (borrowed_date = SYSDATE AND transaction_type = 'RM') OR member_id IN ('A101','A102');
- **B. WHERE borrowed_date = SYSDATE AND (transaction_type = 'RM' OR member_id IN ('A101','A102'));**
- C. WHERE borrowed_date = SYSDATE AND (transaction_type = 'RM' AND member_id = 'A101' OR member_id = 'A102');
- **D. WHERE borrowed_date = SYSDATE AND (transaction_type = 'RM' AND (member_id = 'A101' OR member_id = 'A102'));**
- E. WHERE borrowed_date = SYSDATE AND transaction_type = 'RM' OR member_id IN ('A101','A102');

Answer: B,D

Explanation:

The WHERE clause in SQL filters the rows returned by the SELECT statement. The result of logical operators and conditions can change significantly depending on the use of parentheses.

Options A and E both use parentheses to ensure that borrowed_date = SYSDATE is evaluated with transaction_type = 'RM' as one group and the member_id conditions as another group. The parentheses ensure that both conditions within each set of parentheses must be true for the rows to be included.

Option B is incorrect because it does not use parentheses to enforce the grouping of conditions, leading to potentially different results due to the way logical OR works.

Option C is incorrect because it has a syntax error; it is missing a parenthesis.

Option D is incorrect because it will return rows where either `borrowed_date = SYSDATE AND transaction_type = 'RM'` is true or `member_id IN ('A101','A102')` is true, which is a broader condition than what's specified in options A and E.

NEW QUESTION # 22

View the exhibit and examine the structure of the PROMOTIONS table.

You have to generate a report that displays the promo name and start date for all promos that started after the last promo in the 'INTERNET' category.

Which query would give you the required output?

- A. `SELECT promo_name, promo_begin_date FROM promotions WHERE promo_begin_date > ALL (SELECT promo_begin_date FROM promotions WHERE promo_category = 'INTERNET');`
- B. `SELECT promo_name, promo_begin_date FROM promotions WHERE promo_begin_date IN (SELECT promo_begin_date FROM promotions WHERE promo_category = 'INTERNET');`
- C. `SELECT promo_name, promo_begin_date FROM promotions WHERE promo_begin_date > ALL (SELECT MAX (promo_begin_date) FROM promotions) AND promo_category = 'INTERNET';`
- D. `SELECT promo_name, promo_begin_date FROM promotions WHERE promo_begin_date > ANY (SELECT promo_begin_date FROM promotions WHERE promo_category = 'INTERNET');`

Answer: A

NEW QUESTION # 23

.....

The Actual4Cert 1z0-071 exam questions are being offered in three different formats. These formats are 1z0-071 PDF dumps files, desktop practice test software, and web-based practice test software. All these three 1z0-071 exam dumps formats contain the Real 1z0-071 Exam Questions that assist you in your Oracle Database SQL practice exam preparation and finally, you will be confident to pass the final Oracle Database SQL (1z0-071) exam easily.
