

FCSS_CDS_AR-7.6 Learning Engine, FCSS_CDS_AR-7.6 Test Prep

P.S. Free 2026 Fortinet FCSS_CDS_AR-7.6 dumps are available on Google Drive shared by Prep4sureGuide: <https://drive.google.com/open?id=1gNrK7tToKm9q8zFpwz6RDOO73gyVrbRH>

Market is a dynamic place because a number of variables keep changing, so is the practice materials field of the FCSS_CDS_AR-7.6 practice exam. Our FCSS_CDS_AR-7.6 exam dumps are indispensable tool to pass it with high quality and low price. Once you decide to buy, you will have many benefits like free update lasting one-year and convenient payment mode. We will inform you immediately once there are latest versions of FCSS_CDS_AR-7.6 Test Question released. And if you get any questions, please get contact with us, our staff will be online 24/7 to solve your problems all the way.

Fortinet FCSS_CDS_AR-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Security Solutions Deployment and Integration: This section evaluates Cloud Security Engineers on deploying Fortinet solutions to secure various cloud service models, including Infrastructure as a Service (IaaS) and Container as a Service (CaaS). It includes integrating Fortinet security tools with cloud-native services to ensure robust protection across cloud workloads and environments.
Topic 2	<ul style="list-style-type: none">• Automation and Deployment Tools: This domain focuses on the skills of DevOps Engineers in automating cloud infrastructure and security deployments. It covers using Infrastructure as Code tools such as Terraform and Ansible for cloud provisioning, as well as deploying Fortinet solutions through platform-specific automation frameworks like Azure Bicep and AWS CloudFormation to enable repeatable and scalable security implementations.
Topic 3	<ul style="list-style-type: none">• Cloud Infrastructure Monitoring: Cloud Security Engineers are assessed on their ability to monitor cloud networks and workloads using both cloud provider native tools and Fortinet's monitoring solutions. This section includes overseeing AWS and Azure network health and security posture to ensure continuous visibility and threat detection in cloud environments.
Topic 4	<ul style="list-style-type: none">• Troubleshooting and Connectivity Management: Targeting DevOps Engineers, this section focuses on diagnosing and resolving connectivity problems within AWS and Azure cloud services. It emphasizes troubleshooting issues related to cloud network connectivity, including challenges with Software-Defined Networking (SDN) connectors, to maintain stable and secure cloud operations.

Fortinet FCSS_CDS_AR-7.6 Test Prep | Latest FCSS_CDS_AR-7.6 Dumps

It takes a lot of effort and hard work to get the results. The first step is to download real FCSS - Public Cloud Security 7.6 Architect (FCSS_CDS_AR-7.6) Exam Questions of Prep4sureGuide. These FCSS - Public Cloud Security 7.6 Architect (FCSS_CDS_AR-7.6) exam questions are available in PDF, desktop practice test software, and web-based practice exam. If you are already an employee or busy in your routine, you can prepare FCSS_CDS_AR-7.6 Exam quickly with Prep4sureGuide pdf questions. FCSS_CDS_AR-7.6 pdf exam questions help applicants study for the FCSS - Public Cloud Security 7.6 Architect (FCSS_CDS_AR-7.6) exam at any time from any location. With the pdf questions, it will be easy for you to complete the FCSS - Public Cloud Security 7.6 Architect (FCSS_CDS_AR-7.6) exam preparation in a short time.

Fortinet FCSS - Public Cloud Security 7.6 Architect Sample Questions (Q60-Q65):

NEW QUESTION # 60

You have deployed a FortiGate HA cluster in Azure using a Gateway Load Balancer for traffic inspection. However, traffic is not being routed correctly through the firewalls.

What can be the cause of the issue?

- A. The protected VMs are in a different Azure subscription, which prevents the Gateway Load Balancer from forwarding traffic.
- B. The Gateway Load Balancer is not associated with the correct network security group (NSG) rules, which allow traffic to pass through.
- C. The health probes for the Gateway Load Balancer are failing, which causes traffic to bypass the HA cluster.
- **D. The Fortinet VMs have IP forwarding disabled, which is required for traffic inspection.**

Answer: D

Explanation:

Azure requires IP forwarding enabled on each FortiGate NIC used for inspection; without it, Azure drops packets that the VM tries to route onward, so traffic won't traverse the HA firewalls.

NEW QUESTION # 61

Your monitoring team reports performance issues with a web application hosted in Azure. You suspect that the bottleneck might be due to unexpected inbound traffic spikes.

Which method should you use to identify and analyze the traffic pattern?

- A. Enable Azure DDoS protection to prevent inbound traffic spikes.
- B. Use Azure Traffic Manager to visualize all traffic to the application.
- **C. Enable NSG Flow Logs and analyze logs with Azure Monitor.**
- D. Deploy Azure Firewall to log traffic by IP address.

Answer: C

NEW QUESTION # 62

An administrator is trying to implement FortiCNP with Microsoft Azure Security integration.

However, FortiCNP is not able to extract any cloud integration data from Azure; therefore, real-time cloud security monitoring is not possible.

What is causing this issue?

- A. The organization is using a free Azure AD license.
- **B. The FortiCNP account in Azure has the Storage Blob Data Reader role.**
- C. The administrator enabled the wrong Defender plan for servers.
- D. The Azure account doesn't have the Global Administrator role.

Answer: B

Explanation:

For FortiCNP integration with Azure Security, the Azure account must have sufficient permissions to extract security and resource data. If the account only has the Storage Blob Data Reader role, it can read storage blobs but cannot access the required security or resource information, which prevents FortiCNP from performing real-time monitoring.

NEW QUESTION # 63

Which two statements about the Amazon Web Services (AWS) security groups are true?
(Choose two.)

Response:

- A. Configured traffic rules may have an action of allow or deny.
- B. EC2 instances, elastic network interfaces (ENIs), and subnets may have security groups configured on them.
- C. Security groups are applicable at the instance level.
- D. A security group is a stateful list of ingress and egress traffic rules.

Answer: C,D

NEW QUESTION # 64

What are two main features in Amazon Web Services (AWS) network access control lists (NACLs)? (Choose two.)

- A. You cannot use NACLs and Security Groups at the same time.
- B. The default NACL is configured to allow all traffic.
- C. NACLs are stateless, and inbound and outbound rules are used for traffic filtering.
- D. NACLs are tied to an instance.

Answer: B,C

Explanation:

The default NACL in AWS allows all inbound and outbound traffic until modified.

NACLs are stateless, meaning both inbound and outbound rules must be defined to allow return traffic.

NACLs apply at the subnet level, not tied to individual instances, and they can be used together with Security Groups.

NEW QUESTION # 65

.....

Most of the experts in our company have been studying in the professional field for many years and have accumulated much experience in our FCSS_CDS_AR-7.6 practice questions. Our company is considerably cautious in the selection of talent and always hires employees with store of specialized knowledge and skills. All the members of our experts and working staff maintain a high sense of responsibility, which is why there are so many people choose our FCSS_CDS_AR-7.6 Exam Materials and to be our long-term partner.
