## MB-335인기시험, MB-335최신 기출문제

Microsoft인증 MB-335시험을 등록하였는데 시험준비를 어떻게 해야 할지 몰라 고민중이시라면 이 글을 보고 ExamPassdump를 찾아주세요. ExamPassdump의Microsoft인증 MB-335덤프샘플을 체험해보시면 시험에 대한 두려움이 사라질것입니다. ExamPassdump의Microsoft인증 MB-335덤프는Microsoft인증 MB-335실제시험문제를 마스터한 기초에서 제작한 최신시험에 대비한 공부자료로서 시험패스율이 100%입니다. 하루 빨리 덤프를 마련하여 시험을 준비하시면 자격증 취득이 빨라집니다.

MB-335 시험은 Microsoft Dynamics 365 공급망 관리와 관련된 기능 컨설턴트 작업을 수행하는 후보자의 능력을 테스트하도록 설계되었습니다. 이 포괄적인 시험에는 객관식, 드래그 앤 드롭 및 핫스팟과 같은 다양한 형식의 40-60 개의 질문이 포함됩니다. 또한 응용 프로그램에 대한 경험이 있고 지식을 검증하려는 전문가를 위해 설계되었습니다.

## 최신 Microsoft Certified: Dynamics 365 MB-335 무료샘플문제 (Q141-Q146):

### 질문 # 141

You need to configure the solution for the two issues the production manager reported.

How should you complete the configurations? To answer, move the appropriate configurations to the correct issues. You may use each configuration once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Configurations   | Production resource configurations   |       |               |         |  |         |  |
|--|--|-------|---------------|---------|--|---------|--|
| <div>Assign a maintenance worker.</div> <div>Assign a capability to a resource.</div> <div>Create a working calendar.</div> <div>Define the capability priority.</div> | <table border="1"> <thead> <tr> <th>Issue</th> <th>Configuration</th> </tr> </thead> <tbody> <tr> <td>Issue 1</td> <td></td> </tr> <tr> <td>Issue 2</td> <td></td> </tr> </tbody> </table> | Issue | Configuration | Issue 1 |  | Issue 2 |  |
| Issue  | Configuration  |       |               |         |  |         |  |
| Issue 1  |  |       |               |         |  |         |  |
| Issue 2  |  |       |               |         |  |         |  |

정답:

설명:

| Configurations   | Production resource configurations   |       |               |         |  |         |  |

Topic 6, Adatum Corporation Adatum Corporation is a multi-entity corporation located in Seattle, Washington in the United States. The company is a leading producer of specialty cakes and cookies. The company also manufactures specialty chocolates that use ethically sourced ingredients from around the world. The company plans to launch a new product line of organic chocolates later this year.

Adatum plans to implement Dynamics 365 Finance and Dynamics 365 Supply Chain Management to manage financials, inventory, and manufacturing capabilities across the entire organization.

\* Manufactured products are stored at the distribution warehouses until they are shipped to customers.

\* Individually branded pre-packaged cake and cookie mixes are supplied to specialty cafes and restaurants.

The mixes are shipped directly to the cafes and restaurants from the production factories.

\* The company maintains a fleet of trucks and also subcontracts shipments between the factories and warehouses to outside vendors.

\* The mixes and specialty chocolates are based on standard recipes that use precise ingredient ratios. There are strict rules around ingredient substitutions.

\* All mixes use one of three base recipes as their foundation: BaseA, BaseB, and BaseC. Additional ingredients, spices, and flavorings are then added to make the final product.

\* BaseA and BaseB are made in large batches and stored until they are used in the other mixes.

\* Mixes with BaseA have a shelf life of six months due to the type of flour it uses.

\* Specialty chocolates are manufactured only during the holiday season.

\* Specialty desserts are offered during the holiday season. This year, customers may specify additional icing colors and cake layers when placing orders. Depending on the popularity of two of the new colors, they may be offered the next year.

\* Cocoa oil that is extracted during the production of some of the specialty chocolates is used in the BaseB foundation mix.

\* Cleaning and setup of machinery between products has been causing delays in production.

\* Prices of raw ingredients such as sugar can fluctuate greatly depending on seasonal and worldwide demand.

\* To properly record profitability, all raw materials use the first in, first out (FIFO) costing method, while finished products are recorded at standard costs.

\* Large fluctuations have been occurring at month end in costs reported due to the inability to track production runs that span from month-to-month.

- \* Leftover flour and sugar from production runs are collected, packaged, and donated to local food banks if the amount is too small to use in other runs.
- \* To maintain Adatum's certification as a manufacturer of ethically sourced ingredients, the traceability of every ingredient in all products to their source must be tracked.
- \* All products must be randomly tested for adherence to quality standards for ingredient makeup and weight.
- \* Similar recipes must be able to be produced in succession to limit machinery cleaning and setup times.
- \* All costs must be tracked for each production run and be able to be reconciled at the end of the monthly accounting cycle, including any work in process (WIP) costs and donations.
- \* The organic chocolate line must be set up. The ingredients cannot be mixed with non-organic ingredients in inventory.
- \* Mixes are generally stored and sold in 16-ounce bags. Some quantities are sold and distributed in 5, 10, and 20-gallon containers to large restaurants.
- \* Each mix has a single unique item number and is tracked per batch produced.
- \* Specialty chocolate products must be stored in climate-controlled areas of the warehouse.
- \* QA TesterA discovers during a random test that the batch of a mix does not contain the necessary amount of IngredientB.
- \* VendorZ, who transports finished goods from PlantA to Warehouses, is consistently late picking up product.
- \* OperatorA must consolidate partial mix batch group runs into saleable package quantities.
- \* UserB must set up the mix items.
- \* UserC learns that mixes containing BaseA have been stamped with a batch date from the flour vendor and is not being calculated from the mix manufacturing date. The mixes from the past month that might be impacted need to be identified and the calculation needs to be corrected.
- \* UserD must update the costs of finished goods. Accounting wants labor calculated in WIP based on how much time an individual spends performing the operation, as well as the finished goods to post to a specific different ledger account.
- \* UserE must set up and maintain the cost of sugar.
- \* UserF must decrease downtime for the machinery.
- \* UserG must plan the specialty desserts for the current holiday season.

#### 질문 # 142

You are a production manager at a company which produces large batches of coffee and creamers.

After a quality inspection, batch 120008 of your cold brew coffee (item number CB-0001) was found to be too acidic and must be reworked.

You need to add 20 grams of sugar and stir the product for an additional 0.5 hours.

What three actions are required on the rework order? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add 20 grams of sugar to the production formula.
- B. Delete all route operations except for a half an hour stirring operation.
- C. Add a route operation for 0.5 run time hours of stirring.
- D. Manually reserve batch 120008 after estimating the batch order.
- E. Delete all items from the production formula except for 20 grams of sugar.

정답: A,B,C

#### 설명:

The correct answer is B, C, and E. Here is the explanation:

To rework a batch order in Dynamics 365 Supply Chain Management, you need to create a new batch order and set the Rework batch toggle to Yes<sup>1</sup>. You also need to select the Batch number of the original batch that needs to be reworked<sup>1</sup>. The new batch order will have only one formula line that represents the original batch, and no route operations<sup>1</sup>.

To add 20 grams of sugar and stir the product for an additional 0.5 hours, you need to do the following actions on the rework order: Add 20 grams of sugar to the production formula. You can do this by clicking on the Formula option on the All production orders form and adding a new formula line for sugar with a quantity of 20 grams<sup>1</sup>. You can also specify the ingredient type for sugar, such as Compensating or Filler<sup>2</sup>.

Add a route operation for 0.5 run time hours of stirring. You can do this by clicking on the Route option on the All production orders form and adding a new route operation for stirring with a run time of 0.5 hours<sup>1</sup>. You can also specify the resource or resource group that will perform the stirring operation<sup>3</sup>.

Delete all route operations except for a half an hour stirring operation. You can do this by clicking on the Route option on the All production orders form and deleting any existing route operations that are not related to stirring<sup>1</sup>. This way, you can avoid unnecessary steps and costs for the rework order.

### 질문 # 143

A manufacturer is implementing master planning in Dynamics 365 Supply Chain Management for planned orders. Master planning is running for the first time in the production environment.

You need to instruct the production planners where to view the following information:

\* Planned orders that are created in a run.

\* An item's planned orders against the demand over user-defined periods of time.

In which two possible locations can the information be found? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Planned orders
- B. Net requirements form
- C. Sequenced planned orders
- D. Supply Schedule form
- E. Item requirement statistics

정답: A,B

### 질문 # 144

You are a manufacturing consultant helping a client test out different bill of material (BOM) and route consumption options when starting production orders. Material and labor consumption are to be completed before Report as finish.

You are running a production order with BOM lines that have a Flushing principle set to Start. The Automatic Route Consumption Runtime has been set to Yes.

You have set up the default Start user options for all production orders as shown in the exhibit below.

Set up start

Use on selected orders

START

Date: 12/18/2018

Start production: Yes

References: No

ROUTE CARD JOURNAL

Route card: Route

Automatic route consumption: Always

Post route card: No

End mark route: No

Make default for all users

JOURNALS

Show journal info: Yes

PICKING LIST JOURNAL

Picking list: Pick

Automate BOM consumption: Flushing principle

Create journal per: [blank]

Post picking list: No

Physical reduction: No

Complete picking list journal: Yes

End mark picking list: Yes

Pick negative: No

Post picking list: No

Print options

Based on the settings in Route Card Journal area, what will happen when the production order is started?

- A route card that includes only hours is posted
- A route card that only includes hours and good quantities is posted
- An unposted route card is posted. Hours and quantities are blank

Based on the settings in the Picking list journal area, what will happen when the production order is started?

- A picking list is posted with consumption quantities entered and end selected
- An unposted picking list is created with consumption quantities filled in for all lines and end selected
- An unposted picking list is created with consumption quantities blank and end selected

정답:

#### 질문 # 145

A bicycle manufacturing company is implementing Dynamics 365 Supply Chain Management.

The warehouse must pick and stage parts other than paint for bicycle assembly. Paint is at the production station.

You need to configure the reservations for production.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

**Requirement**

Define configuration for paint reservation.

Define the reservation principle for paint.

**Configuration**

Picking journal  
Picking journal  
Production order  
Item model group  
Release  
Start  
Manual  
Release  
Scheduling

정답:

설명:

**Answer Area**

**Requirement**

Define configuration for paint reservation.

Define the reservation principle for paint.

**Configuration**

Picking journal  
Picking journal  
Production order  
Item model group  
Release  
Start  
Manual  
Release  
Scheduling

Explanation

To configure the reservations for production, you should do the following:

Define configuration for paint reservation: You should configure the Item model group for paint. The Item model group determines the inventory policies for an item, such as reservation, tracking, and costing<sup>1</sup>. You can set the reservation policy for paint to FIFO date-controlled, which means that the inventory reservation is controlled by a sorting date according to the FIFO principle<sup>2</sup>. You

can also set the Backward from ship date option, which means that the inventory reservation is controlled by the last update physical date according to the FIFO rule2.
