

# Quiz Juniper - JN0-224 - Fantastic Automation and DevOps, Associate (JNCIA-DevOps) Exam Torrent

If you want to be the talent the society actually needs you must apply your knowledge into the practical working and passing the test JN0-224 certification can make you become the talent the society needs. If you buy our JN0-224 study materials you will pass the exam successfully and realize your goal to be the talent. We have been in this career for over ten years and we have been the leader in the market. Our JN0-224 Exam Question are always the latest and valid for you to pass the exam.

If you would like to create a second steady stream of income and get your business opportunity in front of more qualified people, please pay attention to Juniper JN0-224 latest study dumps. JN0-224 useful exam torrents are valid and refined from the previous actual test. You will find the PassLeaderVCE JN0-224 valid and reliable questions & answers are all the key questions, unlike other vendors offering the dumps with lots of useless questions, wasting the precious time of candidates. PassLeaderVCE Juniper free demo is available and you can download and have a try, then you can make decision to buy the Juniper exam dumps. Do study plan according to the Juniper exam study material, and arrange your time and energy reasonably. I believe that an efficiency and reasonable exam training can help you to pass the JN0-224 Exam successfully.

## Pass Guaranteed 2026 Juniper JN0-224: Automation and DevOps, Associate (JNCIA-DevOps) Exam Torrent

In order to gain more competitive advantage in the interview, more and more people have been eager to obtain the JN0-224 certification. They believe that passing certification is a manifestation of their ability, and they have been convinced that obtaining a JN0-224 certification can help them find a better job. Our JN0-224 test guides have a higher standard of practice and are rich in content. If you are anxious about how to get JN0-224 Certification, considering purchasing our JN0-224 study tool is a wise choice and you will not feel regretted. Our learning materials will successfully promote your acquisition of certification. Our JN0-224 qualification test closely follow changes in the exam outline and practice.

## Juniper Automation and DevOps, Associate (JNCIA-DevOps) Sample Questions (Q10-Q15):

### NEW QUESTION # 10

You are asked to develop an on-box Junos script that prevents deletion of the SNMP configuration. Which type of script serves this purpose?

- A. commit script
- B. event script
- C. op script
- D. SNMP script

**Answer: A**

Explanation:

A commit script in Junos is used to enforce policies and configuration constraints on the device. These scripts are written in Extensible Stylesheet Language Transformations (XSLT) or Python and are executed automatically during the commit process of a configuration change.

In this context, to prevent the deletion of the SNMP configuration, a commit script is the appropriate choice. It can be designed to check the configuration changes being committed and reject any commit that attempts to delete or modify the SNMP configuration. This script essentially acts as a gatekeeper, ensuring that only allowable changes are committed to the device configuration.

Supporting Reference:

Juniper Networks Commit Scripts Documentation: The official Juniper documentation provides examples and use cases of commit scripts, including how they can be used to prevent unauthorized changes to the device configuration.

"Junos Automation Scripting" by Jonathan Looney: This resource gives practical examples and best practices for creating commit scripts to enforce configuration policies in Junos OS.

### NEW QUESTION # 11

What is the correct Python script syntax to prompt for input?

- A. `hostIP = input("Device IP address: ")`
- B. `hostIP = input {Device IP address: }`
- C. `input("Device IP address: ") = hostIP`
- D. `hostIP = input"Device IP address: "`

**Answer: A**

Explanation:

In Python, the correct syntax to prompt the user for input and store that input in a variable is:

`input(prompt)`: The `input()` function is used to take input from the user. The string provided as an argument (inside the parentheses) is displayed as a prompt to the user. The input provided by the user is returned as a string and can be stored in a variable.

Example:

```
hostIP = input("Device IP address: ")
```

In this example, "Device IP address: " is the prompt displayed to the user, and the user's input will be stored in the variable `hostIP`.

Options B, C, and D are syntactically incorrect in Python.

Reference:

Python Official Documentation: Describes the use of the `input()` function for getting user input.

Python Tutorials: Various tutorials demonstrate how to properly use the `input()` function in scripts.

### NEW QUESTION # 12

What are two important aspects of the DevOps culture? (Choose two.)

- A. use of specific tools
- B. separation of duties
- C. people
- D. communication

**Answer: C,D**

Explanation:

Two important aspects of the DevOps culture are:

Communication (A): In a DevOps environment, continuous and effective communication between development, operations, and

other stakeholders is crucial. It ensures that everyone is aligned, reduces misunderstandings, and facilitates faster and more efficient workflows.

People (D): DevOps is as much about the people as it is about the processes and tools. The culture emphasizes collaboration, shared responsibility, and a mindset focused on continuous improvement. Empowering people to work together across different disciplines is at the heart of DevOps.

Options B and C are not primary aspects of the DevOps culture. While tools are essential in implementing DevOps practices, the culture emphasizes communication and collaboration among people more than the use of specific tools or rigid separation of duties. Reference:

DevOps Handbook: Discusses the cultural aspects of DevOps, with a focus on communication and people.

DevOps Best Practices: Highlights the importance of fostering a culture that prioritizes collaboration and shared goals.

### NEW QUESTION # 13

Exhibit.

```
#!/usr/bin/python

from jnpr.junos import Device
from pprint import pprint
from lxml import etree

with Device("172.25.11.1", user="lab", passwd="lab123") as dev:
    config_data = dev.rpc.get_config(filter_xml="interfaces",
options={"format": "json"})

    print("Configured interfaces:")
    for interface in config_data["configuration"]["interfaces"]
["interface"]:
        print(interface["name"])
```

Referring to the exhibit, which two statements about the script are correct? (Choose two.)

- A. The script retrieves the interface configuration in XML.
- **B. The script retrieves the interface configuration in JSON.**
- C. The script prints interface information for each interface name.
- **D. The script prints the name of each configured interface.**

**Answer: B,D**

### NEW QUESTION # 14

You are asked to use the REST API to retrieve interface configuration information from your Junos device. You decide to use a cURL HTTP GET command to retrieve this information.

In this scenario, which statement is correct?

- A. The request is handled by the rpd process running on the Junos device.
- B. The request is handled by the mod process running on the Junos device.
- **C. The request is handled by the isrpd process running on the Junos device.**
- D. The request is handled by the isd process running on the Junos device.

**Answer: C**

Explanation:

When using the REST API on a Junos device, the isrpd (Integrated Service Routing Process Daemon) process is responsible for handling REST API requests. This process listens for incoming HTTP requests and processes them accordingly, including retrieving interface configuration information when a GET request is made.

Option B is correct because the isrpd process handles the REST API requests on a Junos device.

Options A (mod process), C (rpd process), and D (isd process) are incorrect in this context as they either do not exist or serve different purposes on a Junos device.

Supporting Reference:

Juniper Networks REST API Documentation: Provides insights into how REST API requests are managed and processed by the isrpd process on Junos devices.

## NEW QUESTION # 15

.....

There are many merits of our product on many aspects and we can guarantee the quality of our JN0-224 practice engine. Firstly, our experienced expert team compile them elaborately based on the real exam. Secondly, both the language and the content of our JN0-224 study materials are simple. The content emphasizes the focus and seizes the key to use refined JN0-224 Questions and answers to let the learners master the most important information by using the least practice. Three, we provide varied functions to help the learners learn our study materials and prepare for the exam.

**JN0-224 Valid Test Practice:** <https://www.passleadervce.com/Automation-and-DevOps/reliable-JN0-224-exam-learning-guide.html>

With the PassLeaderVCE of Juniper JN0-224 exam materials, I believe that your tomorrow will be better, So you can trust PassLeaderVCE JN0-224 Valid Test Practice JN0-224 Valid Test Practice - Automation and DevOps, Associate (JNCIA-DevOps) practice test questions and start preparation with confidence, We have introduced three formats of our Automation and DevOps, Associate (JNCIA-DevOps) JN0-224 exam product, There are 192 Q&As in real Juniper JN0-224 exam dumps, which can help you test all the Automation and DevOps JN0-224 skills.

In some cases, when a computer already is in the JN0-224 room, this can provide a less-expensive option than purchasing more than one iTV unit, Transform scenarios into automated tests that easily Questions JN0-224 Exam confirm your software's expected behavior as designs emerge and specifications evolve.

## Valid JN0-224 Exam Torrent Spend Your Little Time and Energy to Pass Juniper JN0-224: Automation and DevOps, Associate (JNCIA-DevOps) exam

With the PassLeaderVCE of Juniper JN0-224 Exam Materials, I believe that your tomorrow will be better, So you can trust PassLeaderVCE Automation and DevOps, Associate (JNCIA-DevOps) practice test questions and start preparation with confidence.

We have introduced three formats of our Automation and DevOps, Associate (JNCIA-DevOps) JN0-224 exam product, There are 192 Q&As in real Juniper JN0-224 exam dumps, which can help you test all the Automation and DevOps JN0-224 skills.

Now that more people are using mobile phones to learn our JN0-224 study materials, you can also choose the one you like.
