CompTIA A+ Certification Exam: Core 1 Sample Questions (Q61-Q66):

NEW QUESTION # 61

A technician recently installed a new printer that is being shared over the network via a 64-bit Windows Print Server. Two users, who have computers with a legacy OS, are unable to print to this new printer. Which of the following should the technician do to resolve this issue?

- A. Run Windows Update on the users' computers.
- B. Update the computers to a 64-bit driver.
- **C. Enable 32-bit drivers on the Print Server.**
- D. Enable Print Spooler and restart the computer.

Answer: C

NEW QUESTION # 62

An internet service provider is delivering service through a copper medium with shared customer bandwidth. Which of the following services has most likely been installed?

- A. NIC
- B. DSL
- **C. Cable**
- D. Fiber

Answer: C

Explanation:

Cable internet service is delivered through coaxial cables that are shared among multiple customers in a neighborhood. This means that the bandwidth may vary depending on the network congestion. Fiber, NIC, and DSL are not copper-based or shared mediums. Reference: CompTIA A+ Core 1 (220-1101) Certification Study Guide, page 28.

NEW QUESTION # 63

A customer has contacted you about building two new desktops. The first desktop will be a gaming workstation. The customer requirements include:

Playing the newest games at a high frame rate

Fast game load times

Enough storage to have several games installed at once

High-end audio

No concern about cost

Running the current Windows OS

The second workstation will be a family workstation. The requirements include:

Capability for word processing, videoconferencing, and basic web surfing Minimal cost, as long as it meets the requirements Running the current Windows OS

Answer:

Explanation:

Explanation:

NEW QUESTION # 64

Which of the following server roles does RADIUS perform?

- A. DNS
- B. AAA
- C. Syslog
- D. Mail server

Answer: B

Explanation:

AAA stands for Authentication, Authorization, and Accounting, and it is a framework that provides security services for network access control. Authentication verifies the identity of a user or device that requests access to a network resource. Authorization

determines what level of access or privileges are granted to a user or device based on their identity or role. Accounting tracks and records the usage of network resources by users or devices for billing or auditing purposes.

RADIUS (Remote Authentication Dial-In User Service) is a protocol that implements AAA functions by communicating with a central server that stores user credentials and policies.

NEW QUESTION # 65

A user is having difficulty connecting to the corporate Wi-Fi network. The user has the correct SSID and network key, but the connection fails every time the user attempts to connect. Which of the following is the most likely cause of the issue?

- A. Outdated firmware
- B. Insufficient power input to the AP
- C. Router malfunction
- D. Incorrect security settings

Answer: D

NEW QUESTION # 66
