220-1201 Training Courses, Test 220-1201 Topics Pdf

In this hustling society, our 220-1201 study guide is highly beneficial existence which can not only help you master effective knowledge but pass the 220-1201 exam effectively. They have a prominent role to improve your soft-power of personal capacity and boost your confidence of conquering the exam with efficiency. As there are all keypoints in the 220-1201 Practice Engine, it is easy to master and it also helps avoid a waste of time for selecting main content.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q67-Q72):

NEW QUESTION # 67

Which of the following tools would a technician use to connect wires to an RJ45 connector?

- A. Punchdown
- B. Cable stripper
- C. Crimper
- D. Loopback plug

Answer: C

Explanation:

A crimper is specifically used to attach RJ45 connectors to the ends of network cables. It presses the connector pins into the cable's wires, establishing a secure electrical connection. A punchdown tool is used for wiring patch panels or keystone jacks, not for attaching connectors.

Reference: "CompTIA A+ Complete Study Guide" by Quentin Docter - Chapter 3, "Cables and Connectors", page 162. Also outlined in the 220-1201 objectives under 3.1.

NEW QUESTION # 68

Which of the following should a technician use to terminate a Cat 6 cable to a patch panel?

- A. Crimper
- B. Toner probe
- C. Network tap
- D. Punchdown tool

Answer: D

Explanation:

A punchdown tool is specifically used to insert wires into a punchdown block in patch panels, which is typical for Cat 6 and similar cabling. It ensures a secure and correct connection by pushing the wire into a metal groove that slices the insulation.

Reference: "CompTIA A+ Certification All-in-One Exam Guide" by Mike Meyers - Chapter 18, page 758.

NEW QUESTION # 69

A technician is installing a wireless access point and is required to run all cabling and make patch cords if necessary.

INSTRUCTIONS

Part 1

For each cable type, click the (+) to select the appropriate connector and tool.

part 2

An access point was moved and no longer has connectivity. Connect the access point, patch panel, and switch by clicking the (+) to select the appropriate cable end for each corresponding location to create a link.

The link will be visible after making the second selection of each pair.

Cable ends may be used multiple times, and all placeholders will be filled.

Explanation:

Explanation:

A close-up of several cables AI-generated content may be incorrect.

A group of different colored rectangular objects AI-generated content may be incorrect.

NEW QUESTION # 70

A company migrates a local application to an internal cloud platform. Which of the following best describes this cloud platform?

- A. Community
- **B. Private**
- C. Hybrid
- D. Public

Answer: B

Explanation:

An internal cloud platform operated exclusively for a single organization is a private cloud, providing dedicated resources and enhanced control.

From CompTIA A+ 220-1101 Official Study Guide, Objective 3.7 - Cloud models:

"A private cloud is provisioned for exclusive use by a single organization, typically managed internally or by a third party, and may be hosted on-premises." Verified Source:

* CompTIA A+ Core 1 (220-1101) Official Study Guide, Chapter 3: Cloud Concepts

* CompTIA Exam Objectives 220-1101, Domain 3.7

NEW QUESTION # 71

A technician is troubleshooting internet connectivity issues after a firewall update. Users report that they can access local network resources, such as printers and shares, but cannot access the internet. Which of the following settings is most likely causing the issue?

- **A. Default gateway**
- B. VLANs
- C. Subnet mask
- D. Static IP assignments

Answer: A

Explanation:

If users can access local network resources but not the internet, the most likely culprit is a misconfigured or missing default gateway.

The default gateway routes traffic from the local network to external networks (i.e., the internet). If it's not properly set or was altered during a firewall update, internet traffic won't be forwarded correctly.

Option A: Static IPs could cause conflict, but wouldn't affect only external access if configured correctly.

Option C: An incorrect subnet mask could isolate devices, but local communication would likely be impacted too.

Option D: VLANs segment networks; while misconfigured VLANs could cause access issues, they'd more likely isolate local traffic as well.

CompTIA A+ Core 1 Exam Objective Reference:

Objective 2.6: Given a scenario, configure and troubleshoot network connectivity.

NEW QUESTION # 72

.....

As mentioned earlier, VCEdumps solves all problems that you face while locating updated CompTIA A+ Certification Exam: Core 1 (220-1201) exam questions. We know that as an applicant for the test, you have excessive pressure to pass the CompTIA Certification Exam. VCEdumps is here to help you earn the highly sought-after CompTIA A+ Certification Exam: Core 1 (220-1201) certification on the first attempt. Don't wait to get help from our CompTIA 220-1201 real exam dumps to crack the test quickly. You can better comprehend VCEdumps's CompTIA A+ Certification Exam: Core 1 (220-1201) exam questions if you know about the three formats described here.
