- D. Type 2 hypervisors

Answer: B

NEW QUESTION # 15

A support technician receives a call stating that a user has added a device to the network. The user used the same configurations from another workstation. When both workstations are turned on, neither can access the network reliably. Which of the following is the most likely cause of the issue?

- A. The security on the switchport needs to be reset.
- B. The DNS server is registering both hostnames.
- **C. The new computer has a duplicate IP address.**
- D. The network cable was improperly terminated.

Answer: C

Explanation:

If two devices have the same static IP address, an IP conflict occurs. This results in both devices being intermittently disconnected or unable to communicate on the network. It's a common mistake when copying configurations manually.

Option B: DNS conflicts wouldn't cause total disconnection - and wouldn't occur just from copying IP settings.

Option C: A cable issue would only affect one workstation.

Option D: Switchport security issues wouldn't affect both machines simultaneously unless port security was configured very specifically.

Objective 2.6: Given a scenario, configure and troubleshoot network connectivity.

NEW QUESTION # 16

Which of the following could a user employ to maximize module bandwidth when selecting memory for a high-end gaming computer?

- A. RAM voltage
- B. Physical module size
- C. Error correction
- D. Channel configuration

Answer: D

Explanation:

Channel configuration (e.g., dual-channel, quad-channel) determines how memory modules communicate with the memory controller. Using matched pairs in dual- or quad-channel setups can significantly increase memory bandwidth, improving performance - especially for gaming and video-intensive tasks.

Option A (Error correction): ECC RAM is used in servers for reliability, not performance or gaming.

Option B (RAM voltage): Affects compatibility and overclocking but not bandwidth.

Option D (Physical size): Refers to module form factor (e.g., DIMM, SO-DIMM) and does not impact bandwidth.

Objective 3.2: Given a scenario, install RAM types.
