220-1202 Updated Test Cram | Latest 220-1202 Test Materials

In the modern world, obtaining 220-1202 certification is essential. With the growing popularity of CompTIA, the demand for professionals holding this CompTIA A+ Certification Exam: Core 2 (220-1202) certification holders has increased significantly. Unfortunately, many candidates fail to pass the 220-1202 Exam due to outdated CompTIA A+ Certification Exam: Core 2 (220-1202) exam study material. Such failure can lead to the loss of time, money, and confidence.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q54-Q59):

NEW QUESTION # 54

Users are reporting that an unsecured network is broadcasting with the same name as the normal wireless network. They are able to access the internet but cannot connect to the file share servers. Which of the following best describes this issue?

- A. Unreachable DNS server
- **B. Rogue wireless access point**
- C. Incorrect IP address
- D. Virtual local area network misconfiguration

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

This scenario describes a rogue access point - a malicious or unauthorized wireless access point that uses the same SSID as the legitimate network. Users may connect to it unknowingly, which can result in limited network access, data interception, or redirection of traffic. The inability to reach internal file servers supports this being an unauthorized AP with no connection to internal resources.

A: A DNS issue would impact name resolution, not connectivity to file servers directly.

B: VLAN issues generally affect segmentation, not mimic SSID problems.

C: An incorrect IP address could cause connectivity issues, but not in the presence of a malicious AP broadcasting the same SSID.

Reference:

CompTIA A+ 220-1102 Objective 2.4: Compare and contrast wireless and physical security threats.

Study Guide Section: Rogue access points and their detection

NEW QUESTION # 55

A technician is reviewing an organization's current incident management policy. The organization uses a third-party vendor to protect the organization's assets with multiple tools. Which of the following service types is the organization using?

- A. EDR
- **B. MDR**
- C. XDR
- D. PaaS

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

MDR (Managed Detection and Response) provides outsourced threat monitoring and response using multiple tools. The use of a third-party provider for protection and incident handling confirms MDR.

From Quentin Docter - CompTIA A+ Study Guide:

"MDR provides 24/7 threat detection and response through outsourced experts using advanced tools across client environments."

NEW QUESTION # 56

A user switches from Linux to Windows and tries to migrate data using an external USB drive. Windows prompts that the device must be formatted. It works fine on Linux. What should the user do?

- **A. Update the file allocation system to exFAT**
- B. Apply a firmware update from the PC manufacturer
- C. Configure Windows firewall to allow data from Linux systems
- D. Replace the cable with Windows-supported hardware

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Windows doesn't natively support many Linux file systems (like ext4). Reformatting to exFAT makes the drive readable/writable on both Linux and Windows.

From All-in-One Exam Guide:

"For cross-platform compatibility, exFAT is recommended as it supports large files and is recognized by Windows, macOS, and Linux (with exFAT drivers)."

NEW QUESTION # 57

A technician needs to install an operating system on a large number of workstations. Which of the following is the fastest method?

- A. Manual installation
- B. Mountable ISO
- C. Physical media
- **D. Image deployment**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Image deployment is the fastest and most efficient method for installing operating systems on multiple machines. It involves creating a pre-configured image of an OS and deploying it across systems using tools like Windows Deployment Services (WDS) or third-party imaging solutions. This method saves time and ensures consistency across all devices.

A: Physical media is slow and not scalable.

B: Mountable ISOs are useful but still require manual installation.

C: Manual installation is time-consuming and not suitable for large-scale deployment.

Reference:

CompTIA A+ 220-1102 Objective 1.4: Given a scenario, use appropriate Microsoft operating system installation methods.

Study Guide Section: Deployment methods - image deployment, automation

NEW QUESTION # 58

A user's computer is running slowly. Task Manager shows:

Disk: 2%

Network: 12%

GPU: 15%

CPU: 70%

Memory: 97%

Which of the following would a technician most likely do to resolve the issue?

- A. Delete temporary files
- **B. Close unnecessary programs**
- C. Upgrade the network connection
- D. Clear browser cached data

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Memory usage is critically high, suggesting many applications or background processes. Closing unnecessary programs will immediately free up RAM.

From Travis Everett - All-in-One Exam Guide:

"High memory usage with moderate CPU load usually means too many applications are open. Close unnecessary apps or use Task Manager to end processes."

NEW QUESTION # 59

.....

The 21 century is the information century. Information and cyber technology represents advanced productivity, and its rapid development and wide application have given a strong impetus to economic and social development and the progress of human civilization (220-1202 exam materials). They are also transforming people's lives and the mode of operation of human society in a profound way. So you really should not be limited to traditional paper-based 220-1202 Test Torrent in the 21 country especially when you are preparing for an exam, our company can provide the best electronic 220-1202 exam torrent for you in this website.
