2025 Latest PassTestking OGA-031 PDF Dumps and OGA-031 Exam Engine Free Share: [https://drive.google.com/open?id=1IMBG\\_KhcbBLUWSCnKB2I1uUmUrTwIZ5t](https://drive.google.com/open?id=1IMBG_KhcbBLUWSCnKB2I1uUmUrTwIZ5t)

The clients at home and abroad can both purchase our OGA-031 study tool online. Our brand enjoys world-wide fame and influences so many clients at home and abroad choose to buy our ArchiMate 3 Part 1 Exam guide dump. Our company provides convenient service to the clients all around the world so that the clients all around the world can use our OGA-031 study materials efficiently. Our company boosts an entire sale system which provides the links to the clients all around the world so that the clients can receive our products timely. Once the clients order our OGA-031 cram training materials we will send the products quickly by mails. The clients abroad only need to fill in correct mails and then they get our products conveniently. Our OGA-031 cram training materials provide the version with the language domestically and the version with the foreign countries' language so that the clients at home and abroad can use our OGA-031 study tool conveniently.

The The Open Group OGA-031 Exam consists of 40 multiple-choice questions, and candidates have 60 minutes to complete it. The questions cover a range of topics related to ArchiMate 3, including the language structure, modeling concepts, and relationships between different components. Candidates must score at least 60% to pass the exam and earn the certification.

## OGA-031 Valid Exam Fee | OGA-031 Related Exams

OGA-031 exam questions are being offered in three easy-to-use and compatible formats. The The Open Group OGA-031 PDF dumps file, desktop practice test software, and web-based practice test software. All three OGA-031 Exam Questions format contain the The Open Group OGA-031 actual questions and help you in OGA-031 exam preparation entirely.

## The Open Group ArchiMate 3 Part 1 Exam Sample Questions (Q35-Q40):

### NEW QUESTION # 35

Consider the following symbol, which represents information about a transformation project at ArchiSurance involving systems and business processes:

Which of the following statements correctly expresses the meaning of the symbol?

- A. The Board of Directors will use the transformed systems
- B. The Board of Directors has a business role in the project
- C. The Board of Directors has concerns about the project

- D. The transformed systems will store information of interest to the Board of Directors

**Answer: C**

### NEW QUESTION # 36

What relationship is allowed from a technology function to an application function?

- A. Realization
- B. Influence
- C. Assignment
- D. Aggregation

**Answer: C**

Explanation:

Comprehensive and Detailed in Depth Explanation: The Assignment relationship is used to link elements that perform or fulfill a function. A Technology Function represents a logical grouping of technology behavior (e.g., storage, networking), while an Application Function represents software behavior (e.g., processing business transactions).

Since technology functions enable applications to operate, the Assignment relationship correctly models this dependency.

The ArchiMate 3.2 Specification explicitly states that Technology Functions can be assigned to Application Functions.

References:

- \* Archi User Guide
- \* ArchiMate 3.2 Specification

### NEW QUESTION # 37

Relationships are classified in a number of categories as shown below. What are A, B and C?

- A. Aggregation, assignment, realization
- B. Passive, Behavior, Active
- C. Structural, dependency, dynamic
- D. Derived, Internal, External

**Answer: C**

Explanation:

This is because the diagram shows the three main categories of relationships in ArchiMate: structural relationships, which model the static construction or composition of concepts; dependency relationships, which model how elements depend on or use other elements; and dynamic relationships, which model the temporal or causal connections between elements.

### NEW QUESTION # 38

Consider the diagram:

(A diagram showing Chief Marketing Officer connected to Market Share.)

What element represents the Chief Marketing Officer?

- A. Stakeholder
- B. Actor
- C. Business Actor
- D. Role

**Answer: A**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The Chief Marketing Officer (CMO) in this diagram is depicted as a stakeholder, as it represents an individual or a group with concerns about market share.

In ArchiMate 3.2, a stakeholder is an entity that has an interest in the outcomes of enterprise architecture, business processes, or strategic goals. The Market Share concept represents a business driver or key metric, which directly aligns with stakeholder concerns in an organization.

Analysis of Answer Choices:

#A. Business Actor##Incorrect.

\* A Business Actor represents an organizational entity that performs behavior (e.g., a company, department, or system).

\* The CMO is an individual with a concern (Market Share), not a system or department performing business processes.

\* ArchiMate 3.2 Specification, Section 6.2.1, states that a Business Actor is an operational entity rather than a strategic role or stakeholder.

#B. Role##Incorrect.

\* A Role represents a responsibility or job function assigned to actors, but the diagram does not depict responsibilities or assigned functions.

\* A Role is usually linked to a business actor, while the CMO in this context is linked to a business concern (Market Share).

\* ArchiMate 3.2 Specification, Section 6.3.1, states that roles are used to define responsibilities, whereas stakeholders are used to define concerns.

#C. Stakeholder##Correct Answer

\* The CMO represents a strategic position with concerns about business performance, making it a Stakeholder in ArchiMate.

\* ArchiMate 3.2 Specification, Section 6.2.1, defines Stakeholder as an entity concerned with outcomes and business goals, exactly fitting the context of this diagram.

#D. Actor##Incorrect.

\* An Actor in ArchiMate is used to define entities performing business behaviors (such as a department or a system).

\* The CMO is not performing an explicit business function but rather has concerns about market performance.

#C. Stakeholder

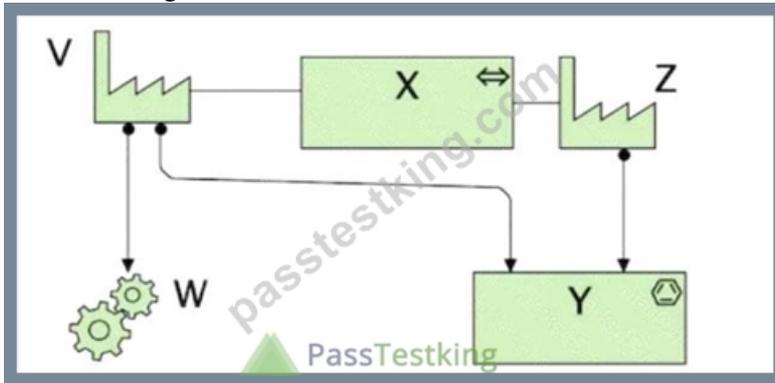

References:

\* ArchiMate 3.2 Specification: Sections 6.2.1 (Stakeholder), 6.3.1 (Role), and 6.2.1 (Business Actor).

\* Archi User Guide: Defining stakeholders and their concerns in Enterprise Architecture.

### NEW QUESTION # 39

Consider the diagram:

(A diagram showing V, W, X, and Y where:

\* V has a factory-like symbol.

\* W has a gear-like symbol.

\* X is connected to Y, which has a transportation-related symbol.)

What are elements V, W, and X?

- A. V = Production process, W = Finished Material, X = Transport network
- B. V = Equipment, W = Facility, X = Distribution channel
- C. V = Facility, W = Equipment, X = Distribution network
- D. V = Factory, W = Raw material, X = Transportation

**Answer: D**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

This ArchiMate Physical Layer diagram represents logistics and supply chain operations. The elements in the diagram align with physical infrastructure concepts used in ArchiMate 3.2.

Understanding the Diagram Elements:

- \* V (Factory symbol) # Represents a Factory or Production Facility, where goods are manufactured.
- \* W (Gear symbol) # Represents Raw Material or Equipment that is used in production.
- \* X (Network or Transportation symbol) # Represents Transportation or a Distribution network for moving goods.
- \* Y (End-point receiving goods) # Represents a logistics center, warehouse, or transportation endpoint

This matches option D, where:

- \* V = Factory # The starting point of manufacturing.
- \* W = Raw material # Essential input for production.
- \* X = Transportation # Moving products to distribution centers.

Analysis of Answer Choices:

#A. V = Production process, W = Finished Material, X = Transport network ## Incorrect

\* V is not a process; it is a physical location (Factory).

\* W represents raw material, not finished material.

\* X represents transportation, but V is wrongly classified as a process.

#B. V = Equipment, W = Facility, X = Distribution channel ## Incorrect

\* V represents a Facility (Factory), not just Equipment.

\* W represents raw material, not a Facility.

\* X is more of a transportation network rather than a distribution channel.

#C. V = Facility, W = Equipment, X = Distribution network ## Incorrect

\* W represents raw material, not just Equipment.

\* X represents Transportation, not strictly a distribution network.

#D. V = Factory, W = Raw material, X = Transportation ## Correct Answer

\* This is the best match with the diagram's physical elements.

\* V (Factory) is the production source.

\* W (Raw material) is used in production.

\* X (Transportation) is the means of moving goods.

\* ArchiMate 3.2 Specification, Section 7.7, defines Facilities, Materials, and Transportation as part of the Physical Layer modeling concepts.

#D. V = Factory, W = Raw material, X = Transportation.

References:

\* ArchiMate 3.2 Specification: Sections 7.7 (Facilities & Physical Elements), 7.8 (Material Flow), and 7.9 (Distribution & Logistics).

\* Archi User Guide: Modeling physical infrastructure in enterprise architecture.

## NEW QUESTION # 40

.....

OGA-031 practice test keeps a record of your attempts so you can evaluate and enhance your progress. Our ArchiMate 3 Part 1 Exam (OGA-031) practice exams replicate the real ArchiMate 3 Part 1 Exam (OGA-031) exam environment so you can eliminate your anxiety. You can access the web-based ArchiMate 3 Part 1 Exam (OGA-031) practice exam through browsers. Moreover, operating systems such as Mac, iOS, Android, Windows, and Linux support the online OGA-031 practice exam.
