Valid AI-102 Test Forum, Reliable AI-102 Test Cram

I know that all your considerations are in order to finally pass the AI-102 exam. Our AI-102 study materials have helped many people pass the exam and is about to help you. The 99% pass rate of our AI-102 training prep is enough to make you feel at ease. Of course, we do everything we could do to ensure that you could think through it and that you also needed to pay a bit of your effort. And with our AI-102 Exam Questions, you will pass the exam for sure.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q243-Q248):

NEW QUESTION # 243

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Cognitive Search service.

During the past 12 months, query volume steadily increased.

You discover that some search query requests to the Cognitive Search service are being throttled.

You need to reduce the likelihood that search query requests are throttled.

Solution: You migrate to a Cognitive Search service that uses a higher tier.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Comprehensive Detailed Explanation

You have an Azure Cognitive Search service. Query volume has increased, and some search requests are now being throttled. This means your current tier is no longer sufficient to handle the query traffic.

Why does migrating to a higher tier work?

Each Azure Cognitive Search pricing tier (Basic, Standard S1/S2/S3, Storage Optimized, etc.) provides different resource limits for queries per second (QPS), indexing throughput, and storage.

Throttling occurs when query traffic exceeds the capacity limits of the current tier.

Moving to a higher tier increases:

The allowed query units (QUs),

Maximum queries per second (QPS),

and available compute resources.

Therefore, migrating to a higher tier reduces the likelihood of throttling and supports the increased query volume.

Why not other solutions?

Simply adding replicas can help scale out query workloads, but the question specifically asks whether moving to a higher tier meets the goal-and it does.

Using indexer scaling or adjusting query patterns might help, but they are not direct answers to the throttling caused by insufficient service tier capacity.

The Answer: A. Yes

NEW QUESTION # 244

You are building an agent by using the Azure AI Agent Service.

You need to ensure that the agent can access publicly accessible data that was released during the past 90 days.

How should you complete the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 245

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You create a web app named app1 that runs on an Azure virtual machine named vm1. Vm1 is on an Azure virtual network named vnet1.

You plan to create a new Azure Cognitive Search service named service1.

You need to ensure that app1 can connect directly to service1 without routing traffic over the public internet.

Solution: You deploy service1 and a private endpoint to vnet1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

A private endpoint is a network interface that uses a private IP address from your virtual network. This network interface connects

you privately and securely to a service powered by Azure Private Link. By enabling a private endpoint, you're bringing the service into your virtual network.

The service could be an Azure service such as:

Azure Storage

Azure Cosmos DB

Azure SQL Database

Your own service using a Private Link Service.

Topic 1, Contoso, Ltd.

General Overview

Contoso, Ltd. is an international accounting company that has offices in France, Portugal, and the United Kingdom. Contoso has a professional services department that contains the roles shown in the following table.

Infrastructure

Contoso has the following subscriptions:

- * Azure

- * Microsoft 365

- * Microsoft Dynamics 365

Azure Active (Azure AD) Directory

Contoso has Azure Active Directory groups for securing role-based access. The company uses the following group naming conventions:

- * ICountryJ-[Level]-[Role]

- * [Level]-[Role]

Intellectual Property

Contoso has the intellectual property shown in the following table.

Text-based content is provided only in one language and is not translated.

Planned Projects

Contoso plans to develop the following:

- * A document processing workflow to extract information automatically from PDFs and images of financial documents

- * A customer-support chatbot that will answer questions by using FAQs

- * A searchable knowledgebase of all the intellectual property

Technical Requirements

Contoso identifies the following technical requirements:

- * All content must be approved before being published.

- * All planned projects must support English, French, and Portuguese.

- * All content must be secured by using role-based access control (RBAC).

- * RBAC role assignments must use the principle of least privilege.

- * RBAC roles must be assigned only to Azure Active Directory groups.

- * AI solution responses must have a confidence score that is equal to or greater than 70 percent.

- * When the response confidence score of an AI response is lower than 70 percent, the response must be improved by human input.

Chatbot Requirements

Contoso identifies the following requirements for the chatbot:

- * Provide customers with answers to the FAQs.

- * Ensure that the customers can chat to a customer service agent.

- * Ensure that the members of a group named Management-Accountants can approve the FAQs.

- * Ensure that the members of a group named Consultant-Accountants can create and amend the FAQs.

- * Ensure that the members of a group named the Agent-CustomerServices can browse the FAQs.

- * Ensure that access to the customer service agents is managed by using Omnichannel for Customer Service.

- * When the response confidence score is low, ensure that the chatbot can provide other response options to the customers.

Document Processing Requirements

Contoso identifies the following requirements for document processing:

- * The document processing solution must be able to process standardized financial documents that have the following characteristics:

- * Contain fewer than 20 pages.

- * Be formatted as PDF or JPEG files.

- * Have a distinct standard for each office.

- * The document processing solution must be able to extract tables and text from the financial documents.

- * The document processing solution must be able to extract information from receipt images.

- * Members of a group named Management-Bookkeeper must define how to extract tables from the financial documents.

- * Members of a group named Consultant-Bookkeeper must be able to process the financial documents.

Knowledgebase Requirements

Contoso identifies the following requirements for the knowledgebase:

- * Supports searches for equivalent terms
- * Can transcribe jargon with high accuracy
- * Can search content in different formats, including video
- * Provides relevant links to external resources for further research

NEW QUESTION # 246

You have a collection of press releases stored as PDF files.

You need to extract text from the files and perform sentiment analysis.

Which service should you use for each task? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:
