

# Free PDF Quiz Databricks - Databricks-Certified-Data-Engineer-Associate - Answers Databricks Certified Data Engineer Associate Exam Real Questions

P.S. Free & New Databricks-Certified-Data-Engineer-Associate dumps are available on Google Drive shared by Fast2test: <https://drive.google.com/open?id=1DQARsymTyNwTwj0zUSMHOZd4iWCK36C4>

Contending for the success fruit of Databricks-Certified-Data-Engineer-Associate exam questions, many customers have been figuring out the effective ways to pass it. And that is why we have more and more customers and everyday the hot hit and high pass rate as well. It is all due to the advantage of our useful Databricks-Certified-Data-Engineer-Associate practice materials, and we have these versions of our Databricks-Certified-Data-Engineer-Associate study materials for our customers to choose according to their different study habits: the PDF, the Software and the APP online.

Becoming a Databricks Certified Data Engineer Associate provides several benefits to candidates. Firstly, it validates their skills and knowledge in data engineering, making them more competitive in the job market. Secondly, it demonstrates their commitment to staying current with the latest technologies and their dedication to professional development. Finally, it provides them with access to a community of Databricks-certified professionals, which can help them network and collaborate with other data engineers.

Earning the Databricks-Certified-Data-Engineer-Associate Certification can help individuals advance their careers in the field of data engineering. Databricks Certified Data Engineer Associate Exam certification is recognized globally and can demonstrate to employers that the individual has the skills and knowledge required to work with Databricks effectively. It can also lead to better job opportunities and higher salaries.

## **Databricks-Certified-Data-Engineer-Associate Exam Torrent & Databricks-Certified-Data-Engineer-Associate Real Questions & Databricks-Certified-Data-Engineer-Associate Exam Cram**

Now the Databricks Certified Data Engineer Associate Exam Databricks-Certified-Data-Engineer-Associate exam dumps have become the first choice of Databricks-Certified-Data-Engineer-Associate exam candidates. With the top-notch and updated Databricks Databricks-Certified-Data-Engineer-Associate test questions you can ace your Databricks Certified Data Engineer Associate Exam Databricks-Certified-Data-Engineer-Associate exam success journey. The thousands of Databricks Databricks-Certified-Data-Engineer-Associate Certification Exam candidates have passed their dream Databricks Databricks-Certified-Data-Engineer-Associate certification and they all used the valid and real Databricks Certified Data Engineer Associate Exam Databricks-Certified-Data-Engineer-Associate exam questions. You can also trust Databricks Databricks-Certified-Data-Engineer-Associate pdf questions and practice tests.

The Databricks Certified Data Engineer Associate Exam certification exam is designed for data engineers, data analysts, and data scientists who build and maintain data pipelines using Databricks. Databricks-Certified-Data-Engineer-Associate Exam is intended to validate an individual's skills in data engineering and Databricks, enabling them to design and implement efficient data pipelines. Databricks Certified Data Engineer Associate Exam certification exam aims to test the candidate's knowledge of data processing

and data modeling, as well as their ability to use Databricks to process large datasets.

## Databricks Certified Data Engineer Associate Exam Sample Questions (Q210-Q215):

### NEW QUESTION # 210

A data engineer is implementing a data ingestion pipeline that automatically detects schema changes in incoming JSON files and evolves the target Delta table accordingly. Which feature supports this automatic schema evolution?

- A. Schema evolution
- B. Broadcast join
- C. Schema enforcement
- D. Partition pruning

**Answer: A**

### NEW QUESTION # 211

A data engineer that is new to using Python needs to create a Python function to add two integers together and return the sum? Which of the following code blocks can the data engineer use to complete this task?

- A.
- B.
- C.
- D.
- E.

**Answer: C**

### NEW QUESTION # 212

Which of the following describes a benefit of creating an external table from Parquet rather than CSV when using a CREATE TABLE AS SELECT statement?

- A. Parquet files have the ability to be optimized
- B. Parquet files can be partitioned
- C. Parquet files have a well-defined schema
- D. Parquet files will become Delta tables
- E. CREATE TABLE AS SELECT statements cannot be used on files

**Answer: C**

Explanation:

Option C is the correct answer because Parquet files have a well-defined schema that is embedded within the data itself. This means that the data types and column names of the Parquet files are automatically detected and preserved when creating an external table from them. This also enables the use of SQL and other structured query languages to access and analyze the data. CSV files, on the other hand, do not have a schema embedded in them, and require specifying the schema explicitly or inferring it from the data when creating an external table from them. This can lead to errors or inconsistencies in the data types and column names, and also increase the processing time and complexity.

CREATE TABLE AS SELECT, Parquet Files, CSV Files, Parquet vs. CSV

### NEW QUESTION # 213

A data engineer needs to process SQL queries on a large dataset with fluctuating workloads. The workload requires automatic scaling based on the volume of queries, without the need to manage or provision infrastructure. The solution should be cost-efficient and charge only for the compute resources used during query execution. Which compute option should the data engineer use?

- A. Databricks Jobs
- B. Databricks Runtime for ML
- C. Serverless SQL Warehouse

- D. Databricks SQL Analytics

**Answer: C**

Explanation:

A Serverless SQL Warehouse automatically scales to handle fluctuating workloads, requires no infrastructure management, and charges only for the compute used during query execution, making it cost-efficient for large datasets.

#### NEW QUESTION # 214

Which of the following commands can be used to write data into a Delta table while avoiding the writing of duplicate records?

- A. APPEND
- B. IGNORE
- **C. MERGE**
- D. DROP
- E. INSERT

**Answer: C**

Explanation:

The MERGE command can be used to upsert data from a source table, view, or DataFrame into a target Delta table. It allows you to specify conditions for matching and updating existing records, and inserting new records when no match is found. This way, you can avoid writing duplicate records into a Delta table<sup>1</sup>. The other commands (DROP, IGNORE, APPEND, INSERT) do not have this functionality and may result in duplicate records or data loss<sup>234</sup>. References: 1: Upsert into a Delta Lake table using merge | Databricks on AWS 2: SQL DELETE | Databricks on AWS 3: SQL INSERT INTO | Databricks on AWS 4: SQL UPDATE | Databricks on AWS
