

# Free PDF Fortinet - NSE8\_812 - High Hit-Rate Detailed Fortinet NSE 8 - Written Exam (NSE8\_812) Answers

P.S. Free & New NSE8\_812 dumps are available on Google Drive shared by Prep4sures: <https://drive.google.com/open?id=1dZVPPrLJTEbc69yuaMku2tc9HV8WD0cl>

Unlike other NSE8\_812 study materials, there is only one version and it is not easy to carry. Our NSE8\_812 exam questions mainly have three versions which are PDF, Software and APP online, and for their different advantages, you can learn anywhere at any time. And the prices of our NSE8\_812 training engine are reasonable for even students to afford and according to the version that you want to buy.

Fortinet NSE8\_812 Exam is a certification test designed to measure the knowledge and skills of IT professionals in deploying, managing, and troubleshooting complex network security infrastructure. NSE8\_812 exam is a part of the Fortinet Network Security Expert (NSE) program, which is a comprehensive training and certification program that provides IT professionals with the necessary knowledge and skills to design, implement, and manage Fortinet security solutions.

## NSE8\_812 Reliable Test Cram | Valid NSE8\_812 Exam Guide

Our company Prep4sures abides by the industry norm all the time. By virtue of the help from professional experts, who are conversant with the regular exam questions of our latest NSE8\_812 real dumps. They can satisfy your knowledge-thirsty minds. And our NSE8\_812 Exam Quiz is quality guaranteed. By devoting ourselves to providing high-quality NSE8\_812 practice materials to our customers all these years we can guarantee all content is of the essential part to practice and remember.

The NSE8\_812 certification exam is a 2-hour exam consisting of 60 multiple-choice questions. NSE8\_812 exam covers a range of topics such as Fortinet Security Fabric, FortiGate Security Platforms, and Fortinet Security Services. NSE8\_812 Exam is designed to test your knowledge and understanding of advanced security concepts and your ability to apply them in real-world scenarios. To pass the exam, you must achieve a minimum score of 70%.

## Fortinet NSE 8 - Written Exam (NSE8\_812) Sample Questions (Q24-Q29):

### NEW QUESTION # 24

You must analyze an event that happened at 20:37 UTC. One log relevant to the event is extracted from FortiGate logs:

The devices and the administrator are all located in different time zones Daylight savings time (DST) is disabled

\* The FortiGate is at GMT-1000.

\* The FortiAnalyzer is at GMT-0800

\* Your browser local time zone is at GMT-03.00

You want to review this log on FortiAnalyzer GUI, what time should you use as a filter?

- **A. 17:37:08**
- B. 20:37:08
- C. 10:37:08
- D. 12:37:08

**Answer: A**

Explanation:

To review this log on FortiAnalyzer GUI, the administrator should use the time filter that matches the local time zone of FortiAnalyzer, which is GMT-0800. Since the log was generated at 20:37 UTC (GMT+0000), the corresponding time in GMT-0800 is 20:37 - 8 hours = 12:37. However, since DST is disabled on FortiAnalyzer, the administrator should add one hour to account for daylight saving time difference, resulting in 12:37 + 1 hour = 13:37. Therefore, the time filter to use is 13:37:08.

### NEW QUESTION # 25

You are deploying a FortiExtender (FEX) on a FortiGate-60F. The FEX will be managed by the FortiGate. You anticipate high utilization. The requirement is to minimize the overhead on the device for WAN traffic. Which action achieves the requirement in this scenario?

- **A. Change connectivity between the FortiGate and the FortiExtender to use VLAN Mode**
- B. Enable CAPWAP connectivity between the FortiGate and the FortiExtender.
- C. Add a switch between the FortiGate and FEX.
- D. Add a VLAN under the FEX-WAN interface on the FortiGate.

**Answer: A**

Explanation:

VLAN Mode is a more efficient way to connect a FortiExtender to a FortiGate than CAPWAP Mode. This is because VLAN Mode does not require the FortiExtender to send additional control traffic to the FortiGate.

The other options are not correct.

\* A. Add a switch between the FortiGate and FEX. This will add overhead to the network, as the switch will need to process the traffic.

\* B. Enable CAPWAP connectivity between the FortiGate and the FortiExtender. This will increase the overhead on the FortiGate, as it will need to process additional control traffic.

\* D. Add a VLAN under the FEX-WAN interface on the FortiGate. This will not affect the overhead on the FortiGate.

<http://docs.fortinet.com/document/fortiextender/7.0.3/admin-guide-ftg-managed/618684/vlan-mode-and-performance>

### NEW QUESTION # 26

Refer to the exhibit.

A customer has deployed a FortiGate 200F high-availability (HA) cluster that contains a TPM chip. The exhibit shows output from the FortiGate CLI session where the administrator enabled TPM.

Following these actions, the administrator immediately notices that both FortiGate high availability (HA) status and FortiManager status for the FortiGate are negatively impacted.

What are the two reasons for this behavior? (Choose two.)

- A. TPM functionality is not yet compatible with FortiGate HA.
- **B. Configuration for TPM is not synchronized between FortiGate HA cluster members.**
- C. The private-data-encryption key entered on the primary did not match the value that the TPM expected.
- **D. The administrator needs to manually enter the hex private data encryption key in FortiManager.**
- E. The FortiGate has not finished the auto-update process to synchronize the new configuration to FortiManager yet.

**Answer: B,D**

Explanation:

<https://docs.fortinet.com/document/fortimanager/7.4.2/administration-guide/30332/verifying-devices-with-private-data-encryption-enabled>

### NEW QUESTION # 27

Refer to the exhibit.

A customer wants FortiClient EMS configured to deploy to 1500 endpoints. The deployment will be integrated with FortiOS and there is an Active Directory server.

Given the configuration shown in the exhibit, which two statements about the installation are correct? (Choose two.)

- A. If no client update time is specified on EMS, the user will be able to choose the time of installation if they wish to delay.
- **B. A client can be eligible for multiple enabled configurations on the EMS server, and one will be chosen based on first priority**
- C. You must use Standard or Enterprise SQL Server rather than the included SQL Server Express
- D. The Windows clients only require "File and Printer Sharing" allowed and the rest is handled by Active Directory group policy
- **E. You can only deploy initial installations to Windows clients.**

**Answer: B,E**

Explanation:

B is correct because a client can be eligible for multiple enabled configurations on the EMS server, and one will be chosen based on first priority. This is explained in the FortiClient EMS Administration Guide under Deployment & Installers > Manage Deployment > Managing deployment configuration priority levels. C is correct because you can only deploy initial installations to Windows clients using FortiClient EMS. This is also explained in the FortiClient EMS Administration Guide under Deployment & Installers > Deploying FortiClient software to endpoints. Reference: <https://docs.fortinet.com/document/forticlient/7.0.7/ems-administration-guide/278884/deployment-installers> <https://docs.fortinet.com/document/forticlient/7.0.7/ems-administration-guide/374506/deploying-forticlient-software-to-endpoints>

### NEW QUESTION # 28

Refer to the exhibit showing a FortiSOAR playbook.

You are investigating a suspicious e-mail alert on FortiSOAR, and after reviewing the executed playbook, you can see that it requires intervention.

What should be your next step?

- **A. Go to the Incident Response tasks dashboard and run the pending actions**
- B. Reply to the e-mail with the requested Playbook action
- C. Run the Mark Drive by Download playbook action
- D. Click on the notification icon on FortiSOAR GUI and run the pending input action

**Answer: A**

Explanation:

The exhibited playbook requires intervention, which means that the playbook has reached a point where it needs a human operator to take action. The next step should be to go to the Incident Response tasks dashboard and run the pending actions. This will allow you to see the pending actions that need to be taken and to take those actions.

The other options are not correct. Option B will only show you the notification icon, but it will not allow you to run the pending input action. Option C will run the Mark Drive by Download playbook action, but this is not the correct action to take in this case. Option D is not a valid option.

Here are some additional details about pending actions in FortiSOAR:

- \* Pending actions are actions that need to be taken by a human operator.
- \* Pending actions are displayed in the Incident Response tasks dashboard.
- \* Pending actions can be run by clicking on the action in the dashboard.
