Cisco 350-601 certification exam, also known as Implementing Cisco Data Center Core Technologies (350-601 DCCOR), is designed for IT professionals who want to demonstrate their expertise in implementing and troubleshooting Cisco data center technologies. 350-601 exam validates the knowledge and skills required to implement core data center technologies, including network, compute, storage network, automation, and security.

Related Certification Tracks

- **Cisco CCIE Data Center**

Cisco CCIE Data Center is the highest attainable certificate within Cisco's comprehensive data center path. It confirms expert-level mastery of data center technologies and is the key to distinguishing yourself as a top-ranked IT nerd who gives reliable solutions. CCIE Data Center will not only confirm your ability to work with complex data center technologies but will also prepare you for a wide range of exciting roles within the same niche. To attain it, candidates must ace two tests: the above-mentioned Cisco 350-601 alongside the relevant lab exam, CCIE Data Center v3.0.

- **Cisco CCNP Data Center**

Cisco CCNP Data Center is a professional-level certificate for those who want to prove their data center networking skills at the intermediate level. Obtaining it requires the candidates to succeed in two different exams. In this case, the combination includes a core test, basically, Cisco 350-601 and one concentration exam that can be selected out of the five options. They allow one to validate specialized skills in different areas such as designing or troubleshooting the Cisco data center infrastructure, performing the implementation of automation, setting up Cisco MDS 9000 Series switches, or utilizing Cisco application centric infrastructure. Also, having about 3-5 years of experience in the data center field is recommended.

- **Cisco Certified Specialist – Data Center Core**

If you are not ready to pass the concentration test and go for CCNP Data Center, passing 350-601 will still bring you a certificate. This is Cisco Certified Specialist – Data Center Core. This title helps individuals to mark their achievement even if this is only a basic test and verify skills needed for more advanced accreditations.

350-601 Latest Test Labs - Valid 350-601 Exam Camp

You plan to place an order for our Cisco 350-601 test questions answers; you should have a credit card. Mostly we just support credit card. If you just have debit card, you should apply a credit card or you can ask other friend to help you pay for 350-601 test questions answers. If you choose SWREG payment for 350-601 Test Questions Answers, it will have extra tax for some countries.

Cisco 350-601 certification exam is designed to test the knowledge and skills of professionals who want to implement data center technologies. 350-601 exam covers a wide range of topics such as network design, virtualization, automation, and security. Candidates who Pass 350-601 Exam will demonstrate their ability to plan, implement, and troubleshoot complex data center solutions using Cisco technologies.

Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q121-Q126):

NEW QUESTION # 121

A network engineer must configure a Cisco MDS switch to use the local user database for console access if all AAA servers are unreachable. Which configuration should be applied to complete this task?

- A. aaa authentication login default local
- B. aaa authentication login console fallback error local
- C. aaa authentication login console local
- D. aaa authentication login default fallback error local

Answer: B

NEW QUESTION # 122

Drag and drop the keywords onto the URL request to collect all the subnets configured under tenant Production using a REST API. Not all options are used.

The screenshot shows a REST API URL configuration interface. The URL is `https://{api_ip}/api/ /uni/tn-Production.json?`. Below the URL are several input fields for keywords: `target-subtree-class`, `query-target-filter`, `query-target`, `children`, `subtree`, `class`, and `mo`. A 'Cisco' logo is visible in the background.

Answer:

Explanation:

```

https://{apic_ip}/api/  /uni/tn-Production.json?
 =  & 
=fvSubenet

```

target-subtree-class

query-target-filter

query-target

children

subtree

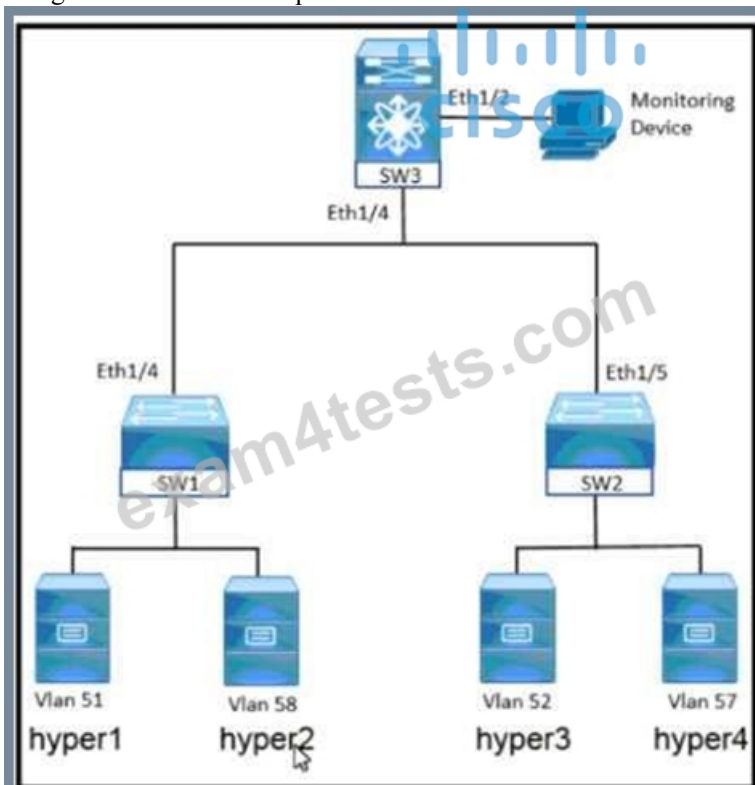

class

mo

NEW QUESTION # 123

Drag and Drop Question

Refer to the exhibit. An engineer must monitor the Ethernet port and the corresponding VLAN traffic for the hyper4 device. The SW3 device is a Cisco Nexus 7000 Series Switch. Drag and drop the code snippets from the right into the boxes in the configuration to meet these requirements.

```

!SW3 configuration
interface ethernet 1/2
  switchport 

monitor session 2
  source interface 
  destination interface 
  source 

```

- vlan 57
- ethernet 1/2
- ethernet 1/4
- monitor
- interface vlan 57

Answer:

Explanation:

```
!SW3 configuration
interface ethernet 1/2
  switchport 

monitor session 2
  source interface 
  destination interface 
  source 
```

```
interface vlan 57
```

NEW QUESTION # 124

Refer to the exhibit.

```
monitor fabric session mySession
  description "This is my fabric ERSPAN session"
  destination tenant t1 application app1 epg epg1 destination-ip 192.0.20.123 source-ip-prefix 10.0.20.1
  erspan-id 100
  ip dscp 42
  ip ttl 16
  mtu 9216
  exit
  source interface eth 1/1 switch 101
  direction tx
  filter tenant t1 bd bd1
  filter tenant t1 vrf vrfl
  no shut
```

An engineer needs to implement a monitoring session that should meet the following requirements:

- * Monitor traffic from leaf to leaf switches on a Cisco ACI network
- * Support filtering traffic from Bridge Domain or VRF

Which configuration must be added to meet these requirements?

- A. interface eth 1/2 leaf 101
- B. application epg epg1 app1
- C. application app1 epg epg1
- D. interface eth 1/2 switch 101

Answer: C

NEW QUESTION # 125

An engineer must perform a software upgrade on a production Cisco Nexus 7000 Series Switch. Before the upgrade activity, the requirement is for all ports to be shut down and routing protocols to terminate gracefully. Which feature must be used to meet these requirements?

- A. Configuration Profile
- B. Maintenance Mode Profile
- C. Switch Profile
- D. Service Profile Template

Answer: B
