You have to put time and money into passing the Cisco Certified Support Technician (CCST) IT Support exam. The best method to reap the rewards of your investment in becoming an expert is by using Cisco 100-140 Exam Questions. Additionally, you can confidently study for the 100-140 exam. Passing an Cisco Certified Support Technician (CCST) IT Support exam on the first attempt can be stressful, but Cisco 100-140 exam questions can help manage stress and allow you to perform at your best.

Cisco Certified Support Technician (CCST) IT Support Sample Questions (Q153-Q158):

NEW QUESTION # 153

An employee reports that their desktop, which is connected via Ethernet, cannot access the network, while Wi-Fi devices are connecting without issue. What should the technician check first to troubleshoot this wired connection problem?

- A. Verify that the Ethernet cable is securely plugged into both the computer and the wall socket
- B. Check if the Wi-Fi on the desktop is turned on and searching for signals
- C. Reconfigure the firewall settings to allow Ethernet connections
- D. Increase the bandwidth allocation for the Ethernet network

Answer: A

Explanation:

Correct Answer. A. Verify that the Ethernet cable is securely plugged into both the computer and the wall socket Physical connection issues are the most common cause for a wired device not accessing the network. Ensuring that the cable is properly connected is a fundamental and simple first step.

Option B is incorrect. The issue is with the wired connection, not wireless, so checking Wi-Fi is irrelevant.

Option C is incorrect. Bandwidth allocation would affect speed, not initial network access.

Option D is incorrect. Firewall settings typically do not discriminate between connection types at the device level and would not affect just the wired connection.

NEW QUESTION # 154

What is a common indicator of a phishing email?

- A. An official-looking email address
- B. Use of company-specific terminology and logos
- C. Generic greetings such as "Dear Customer."
- D. A clear, concise message with no grammatical errors

Answer: C

Explanation:

Correct Answer. B. Generic greetings such as "Dear Customer." Phishing emails often use generic greetings because they are sent in large batches to people whose names the attackers do not know, making this a common red flag.

Option A is incorrect because attackers often spoof email addresses to look official.

Option C is incorrect because phishing emails can also be well-crafted and free of grammatical errors.

Option D is incorrect as attackers frequently use legitimate company logos and terminology to appear credible.

NEW QUESTION # 155

The IT department identifies that a database server crashes frequently due to high query loads during peak hours.

What should the next step be in devising a plan to resolve this problem?

- A. Plan to distribute the query load using load balancing techniques
- B. Increase the physical memory of the server immediately
- C. Schedule a complete database redesign to optimize performance
- D. Advise users to avoid using the database during peak hours

Answer: A

Explanation:

Planning to distribute the query load through load balancing is a strategic approach that can effectively mitigate the issue without extensive downtime or resource investment. It addresses the immediate cause--high query loads--by distributing these loads more evenly across the system or additional resources.

Option A is incorrect because while increasing physical memory may provide temporary relief, it does not address the root cause of high query loads.

Option B is incorrect because a complete database redesign, while potentially beneficial, is a long-term and resource-intensive solution that may not quickly resolve the immediate issue.

Option D is incorrect because advising users to avoid using the database during peak hours is impractical and does not solve the underlying technical problem.

NEW QUESTION # 156

A user has low storage on an iPhone.

You need to tell the user how to increase available storage.

For each action, select Yes if it helps the user increase available storage, or No if it does not.

Note: You will receive partial credit for each correct selection.

Answer Area

Offload unused apps.

Empty the **Recently Deleted** album.

Enable **Optimize Photos**.

Answer:

Explanation:

Answer Area

	Yes	No
Offload unused apps.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Empty the Recently Deleted album.	<input type="checkbox"/>	<input type="checkbox"/>
Enable Optimize Photos .	<input type="checkbox"/>	<input type="checkbox"/>

Answer Area

	Yes	No
Offload unused apps.	<input type="checkbox"/>	<input type="checkbox"/>
Empty the Recently Deleted album.	<input type="checkbox"/>	<input type="checkbox"/>
Enable Optimize Photos .	<input type="checkbox"/>	<input type="checkbox"/>

NEW QUESTION # 157

During a hardware audit, an IT support technician notices that some office computers have USB- A ports that do not support charging mobile devices when the computers are turned off.

What is the likely reason for this?

- A. The USB-A ports are configured to disable power in BIOS settings when the computer is off
- B. The USB-A ports are not USB 3.0 compliant
- C. The USB-A ports are USB 1.1 ports only
- D. The USB-A ports do not support data transfer

Answer: A

Explanation:

Correct Answer: B. The USB-A ports are configured to disable power in BIOS settings when the computer is off Some BIOS settings allow for configuration of USB ports to provide power even when the computer is off. If these ports do not charge devices when the computer is off, it is likely due to these BIOS settings being configured to disable power supply to USB ports.

Option A is incorrect because USB 3.0 compliance affects data transfer rates and has less to do with the ability to charge devices

when the computer is off.

Option C is incorrect because the capability to support data transfer does not correlate directly with the ability to provide power when the computer is off.

Option D is incorrect because while USB 1.1 ports have lower data transfer rates, their ability to charge devices when off depends primarily on BIOS settings rather than USB version limitations.

NEW QUESTION # 158

.....

Using computer-aided software to pass the Cisco 100-140 exam has become a new trend. Because the new technology enjoys a distinct advantage, that is convenient and comprehensive. In order to follow this trend, our company product such a Cisco Certified Support Technician (CCST) IT Support 100-140 Exam Questions that can bring you the combination of traditional and novel ways of studying.
