Salesforce Certified Experience Cloud Consultant Sample Questions (Q159-Q164):

NEW QUESTION # 159

Universal Containers has Contact and Account objects set to Public Read Only for internal users, but an Experience Cloud users is not able to view Contacts and accounts.

How should you fix this issue?

- A. The existing sharing model should be updated to so that the Contact and Account Objects are private, and sharing rules should be configured on each individual object to give Public Read Only access to Experience Cloud users.
- **B. Sharing rules should be configured open each object to give Read Only access to experience Cloud users.**
- C. The external sharing model should be updated so that the Account object is private but the Contact object remains public only
- D. The internal sharing model should be updated so that the Contact and Account objects are Public read Only.

Answer: B

Explanation:

To fix the issue of Experience Cloud users not being able to view Contacts and Accounts, you should configure sharing rules on each object to give Read Only access to Experience Cloud users. Sharing rules allow you to extend sharing access to users in public groups, roles, or territories. You can use sharing rules to grant Read Only access to Contacts and Accounts owned by internal users to Experience Cloud users.

NEW QUESTION # 160

Universal Containers (UC) has been using Salesforce to manage its sales and service processes. UC also an Experience Cloud site to interact with its customers. UC has now acquired Cloud Kicks (CK) Retail to grow its business, CK also uses Salesforce and a self-service site built on the experience Cloud to allow its customers to log support requests. UC now wants its customers to be able to use CK's self-service site so they can have a more integrated experience.

What should an Experience Cloud consultant recommend so that UC's can log in to CK;s site?

- A. Create separate user account for UC customer in CK's Experience Cloud site, since SSO cannot be established between two Experience Cloud sites.
- B. Establish SSO between the two Experience Cloud sites by using one org as an identity provider and the other org as a service.
- C. Use a third-party identity provider to establish SSO between the two Experience Cloud sites, since Salesforce can only be used as a service provider.
- D. Create custom Apex handlers using login method from site class to sign in users from one community to the other.

Answer: B

Explanation:

To allow UC's customers to log in to CK's site, an Experience Cloud consultant should recommend establishing SSO between the two Experience Cloud sites by using one org as an identity provider and the other org as a service provider. SSO is a feature that allows users to authenticate with one system and access multiple systems without entering their credentials again. To use SSO between two Experience Cloud sites, you need to use one org as an identity provider (IdP), which is the system that verifies the user's identity and issues a security token. You also need to use the other org as a service provider (SP), which is the system that accepts the security token and grants access to its resources.

NEW QUESTION # 161

A consultant for Cloud Kicks (CK) is asked to build a site for CK customers. As part of this site, a custom object will be used to manage customer subscriptions. These subscriptions will need to leverage advanced sharing rules to ensure that only appropriate customers can see these subscriptions.

Which two user license types should be granted to customers to support this sharing requirement?

Choose 2 answers

- A. Customer Community Login User
- B. Partner Community User
- C. Customer Community Plus Login User
- D. Customer Community User

Answer: A,C

NEW QUESTION # 162

Partners at Universal Containers (UC) have given feedback that it takes too long for administrators to create new users or reset passwords for partner employees.

What should be done to help UC with user management?

- A. Recommend partners share user credentials.
- B. Implement a limit on new users and password resets.
- C. Delegate external user administration.
- D. Create a new user form that automatically triggers a process to create a user.

Answer: D

Explanation:

To help UC with user management, UC should delegate external user administration to its partners. This will allow UC to grant permission to its partners to create new users or reset passwords for partner employees without involving UC's administrators. UC can use Delegated External User Administration, which is a feature that allows UC to assign specific users as delegated administrators who can manage external users in their own accounts.

NEW QUESTION # 163

Get Cloudy Consulting wants to leverage Experience Bundle for making updates to its community.

What are the two key features of experienceBundle?

Choose 2 answers

- A. ExperienceBundle allows us to programmatically edit any community but using Experience Builder.
- B. ExperienceBundle provides editable community metadata in a human-readable format.
- C. ExperimentBundle provides editable community metadata in a human-readable format.
- D. ExperienceBundle enables Creating experiencing across orgs.

Answer: A,C
