BONUS!!! Download part of BraindumpsIT C-ACDET-2506 dumps for free: <https://drive.google.com/open?id=10h6mOWKF4PLIRYLiKd62j3w21hBgt7q4>

Our product is of high quality and boosts high passing rate and hit rate. Our passing rate is 98%-100% and our C-ACDET-2506 test prep can guarantee that you can pass the exam easily and successfully. Our C-ACDET-2506 exam materials are highly efficient and useful and can help you pass the exam in a short time and save your time and energy. It is worthy for you to buy our C-ACDET-2506 Quiz torrent and you can trust our product. You needn't worry that our product can't help you pass the exam and waste your money.

## SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li> </ul>

We have accommodating group offering help 24/7. It is our responsibility to aid you through those challenges ahead of you. So instead of focusing on the high quality C-ACDET-2506 latest material only, our staff is genial and patient to your questions of our C-ACDET-2506 real questions. It is our obligation to offer help for your trust and preference. Besides, you can have an experimental look of demos and get more information of C-ACDET-2506 Real Questions. The customer-service staff will be with you all the time to smooth your acquaintance of our C-ACDET-2506 latest material.

### **SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q20-Q25):**

#### **NEW QUESTION # 20**

Which scenarios are applicable when moving templates from the test site to the production site by Intelligent Configuration Manager (ICM)? (Select 2 correct answers)

- A. Draft templates on the source site are skipped.
- B. New templates that successfully migrated to the production site are in Draft state.
- C. Batch imports are available for templates when migrating configuration bundles.
- D. Published templates with flex master data references in the test site are migrated to the production site during the first migration attempt.

**Answer: A,B**

Explanation:

ICM only migrates published templates; draft templates are skipped (A). When templates are imported into production, they arrive in draft state by default to allow review and publishing before use (C). Batch imports for templates (B) are not supported; migration is typically handled per template. Flex master data references require manual migration steps and are not migrated automatically during the initial template transfer (D).

#### **NEW QUESTION # 21**

During verification in Production, a stakeholder reports that the imported form template appears outdated. What could be a likely reason for this?

- A. The Test site template was not the latest version when exported.
- B. The Production site does not support custom form templates.
- C. The system automatically reverted the template to a previous version during import.
- D. The Production site is missing certain parameter settings.

**Answer: A**

Explanation:

If an imported form template appears outdated in Production, the most common cause is that the version exported from Test was not the latest published version. SAP Ariba's export/import process is version-specific; only the selected version at export time is moved. If the latest updates weren't published or exported, Production will receive an older version.

SAP does not auto-revert templates to previous versions during import, and missing parameter settings typically do not affect template versions. Production supports custom templates as long as metadata and versions align.

Proper version control, including publishing the latest template version in Test before export, is essential to avoid this issue.

### NEW QUESTION # 22

If you add a custom field to the ConntractWorkspace class, which other class(es) will that field be added to?

- A. AbstractContractWorkspace
- B. Internal ContractWorkspace and SalesContractWorkspace
- C. ContractRequest
- D. SalesContractRequest and InternalContractRequest

**Answer: B**

### NEW QUESTION # 23
