# NSE5_SSE_AD-7.6 Trustworthy Source & New NSE5_SSE_AD-7.6 Test Questions

In this fast-changing world, the requirements for jobs and talents are higher, and if people want to find a job with high salary they must boost varied skills which not only include the good health but also the working abilities. But if you get the NSE5_SSE_AD-7.6 certification, your working abilities will be proved and you will find an ideal job. We provide you with NSE5_SSE_AD-7.6 Exam Materials of high quality which can help you pass the NSE5_SSE_AD-7.6 exam easily. It also saves your much time and energy that you only need little time to learn and prepare for NSE5_SSE_AD-7.6 exam.

Fortinet NSE5_SSE_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	• Decentralized SD-WAN: This domain covers basic SD-WAN implementation including configuring members, zones, and performance SLAs to monitor network quality.
Topic 2	• Secure Internet Access (SIA) and Secure SaaS Access (SSA): This section focuses on implementing security profiles for content inspection and deploying compliance rules to managed endpoints.
Topic 3	• SASE Deployment: This domain covers FortiSASE administration settings, user onboarding methods, and integration with SD-WAN infrastructure.
Topic 4	• Analytics: This domain covers analyzing SD-WAN and FortiSASE logs to monitor traffic behavior, identify security threats, and generate reports.
Topic 5	• Rules and Routing: This section addresses configuring SD-WAN rules and routing policies to control and direct traffic flow across different links.

Free Real Fortinet NSE5_SSE_AD-7.6 Exam Questions Updates and a Free Demo

The PDF version of our NSE5_SSE_AD-7.6 guide quiz is prepared for you to print it and read it everywhere. It is convenient for you to see the answers to the questions and remember them. After you buy the PDF version of our NSE5_SSE_AD-7.6 study material, you will get an E-mail form us in 5 to 10 minutes after payment.Once any new question is found, we will send you a link to download a new version of the NSE5_SSE_AD-7.6 training engine. So don't worry if you are left behind the trend.

Fortinet NSE 5 - FortiSASE and SD-WAN 7.6 Core Administrator Sample Questions (Q11-Q16):

NEW QUESTION # 11

What is the purpose of the priority/failover connection feature in FortiSASE Geofencing for managing VPN connections?

- A. It forces all remote users to connect only to the nearest security POP regardless of location.
- B. It allows administrators to define rules to prioritize on-premises FortiGate connections for users in specific countries, with failover to a security POP if the FortiGate device is unavailable.
- C. It automatically balances VPN traffic across all available security POPs without prioritizing on- premises devices.
- D. It restricts VPN access to users based on their geolocation without allowing failover options.

Answer: B

Explanation:
Priority/failover in FortiSASE geofencing lets administrators prefer an on-premises FortiGate for users in specified countries and fail over to a FortiSASE security POP only if the on-premises device is unreachable.

NEW QUESTION # 12

Which two statements about configuring a steering bypass destination in FortiSASE are correct? (Choose two.)

- A. You can select from four destination types: Infrastructure, FQDN, Local Application, or Subnet
- B. Subnet is the only destination type that supports the Apply condition
- C. Apply condition can be set only to On-net or Off-net. but not both
- D. Apply condition allows split tunneling destinations to ae applied to On-net. off-net. or both types of endpoints

Answer: A,D

Explanation:
According to theFortiSASE 7.6 Feature Administration Guide, steering bypass destinations (also known as split tunneling) allow administrators to optimize bandwidth by redirecting specific trusted traffic away from the SASE tunnel to the endpoint's local physical interface.
* Destination Types (Option C): When creating a bypass destination, administrators can select from four distinct types:Infrastructure(pre-defined apps like Zoom/O365),FQDN(specific domains),Local Application(identifying processes on the laptop), orSubnet(specific IP ranges).
* Apply Condition (Option B): The "Apply" condition is a flexible setting that allows the administrator to choose when the bypass is active. It can be applied to endpoints that areOn-net(inside the office),Off- net(remote), orBoth. This ensures that if a user is in the office, they don't use the SASE tunnel for local resources, but if they are home, they might still bypass high-bandwidth sites like YouTube to preserve tunnel capacity.
Why other options are incorrect:
* Option A: Subnet is one of four types and is not the only type supporting these conditions.
* Option D: The system explicitly supports "Both" to ensure consistency across network transitions.

NEW QUESTION # 13

An administrator is configuring SD-WAN to load balance their network traffic. Which two things should they consider when setting up SD-WAN? (Choose two.)

- A. When applicable, FortiGate load balances traffic through all members that meet the SLA target.
- B. Only the manual and lowest cost (SLA) strategies allow SD-WAN load balancing.
- C. You can select the outbandwidth hash mode with all strategies that allow load balancing.
- D. SD-WAN load balancing is possible only when using the manual and the best quality strategies.

Answer: A,C

Explanation:
FortiGate load balances traffic across all members that meet the SLA targets, depending on the strategy used.
The outbandwidth hash mode can be selected with load-balancing strategies to distribute traffic based on flow characteristics.

NEW QUESTION # 14

Which FortiSASE feature monitors SaaS application performance and connectivity to points of presence (POPs)?

- A. Operations widgets
- B. Event logs
- C. Digital experience monitoring
- D. FortiView dashboards

Answer: C

Explanation:

According to theFortiSASE 7.6 Administration GuideandDigital Experience Monitoring (DEM) documentation, the feature specifically designed to monitor SaaS application performance and connectivity to PoPs isDigital Experience Monitoring (DEM).
* SaaS and Path Visibility: DEM assists administrators in troubleshooting remote user connectivity issues by providing enhanced health check visibility forSaaS applications, endpoint devices, and the network path. It provides real-time insights into application performance and latency issues.
* PoP Connectivity: It monitors the digital journey from the end-user device through theSecurity Points of Presence (POPs)to the final application, identifying hops where degraded service (packet loss, delay, or jitter) is detected.
* Proactive Management: By establishing thresholds and simulating user activities throughSynthetic Transaction Monitoring (STM), DEM allows IT teams to identify performance problems before they impact the business.
Why other options are incorrect:
* Option A: Operations widgets provide general status overviews but do not offer the granular per-hop path analysis or specific SaaS transaction monitoring found in DEM.
* Option B: FortiView dashboards provide traffic visibility and session data but are not dedicated performance monitoring tools for end-to-end digital experience.
* Option C: Event logs record system occurrences and security events but do not provide real-time performance metrics or health check probes for SaaS applications.

NEW QUESTION # 15
What is the primary function of FortiView on FortiSASE?

- A. Displays individual logs on the GUI without aggregation, allowing administrators to sort events by time only.
- B. Presents raw log data in graphical format only, without sorting criteria or aggregated views.
- C. Provides consolidated consoles to analyze security events over time using graphical or text- based log views.
- D. Generates real-time alerts for security events and presents them in a single text-based console without metadata.
Answer: C

Explanation:

FortiView on FortiSASE provides consolidated, visual and text-based views of security events over time, allowing administrators to analyze and interpret log data efficiently through aggregated dashboards.

NEW QUESTION # 16
......

We are a leading corporation in this line handling NSE5_SSE_AD-7.6 study questions well with passing rate up to 98 and over percent, which is an unreachable goal for others. So our NSE5_SSE_AD-7.6 preparation exam enjoys good sales for the excellent quality and reasonable prices in recent years. And we are so sure that we can serve you even better than you can imagine with our NSE5_SSE_AD-7.6 learning guide since we are keeping on doing a better job in this career.
