#### NEW QUESTION # 205

A construction company specializes in building residential and commercial structures. The company uses discrete manufacturing in Dynamics 365 Supply Chain Management.

The company has the following business requirements:

- \* Construction tasks must be scheduled based on the project delivery date.
- \* All raw components must be available when the job begins.

You need to configure job scheduling for each production order.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Job scheduling

Requirement

Determine the starting dates for each construction task based on the delivery date.

Ensure that the required raw components are available when the job begins.

Configuration

Forward scheduling
Forward scheduling
Backward scheduling

  

Finite material
Finite capacity
Finite material

**Answer:**

Explanation:

The screenshot shows the 'Job scheduling' configuration page. Under the 'Requirement' section, there are two text boxes: 'Determine the starting dates for each construction task based on the delivery date.' and 'Ensure that the required raw components are available when the job begins.' To the right, under the 'Configuration' section, there are two dropdown menus. The first dropdown menu has 'Forward scheduling' selected. The second dropdown menu has 'Finite material' selected.

Explanation:

A close up of a text AI-generated content may be incorrect.

Job scheduling

Requirement

Determine the starting dates for each construction task based on the delivery date.

Ensure that the required raw components are available when the job begins.

Configuration

Forward scheduling
Finite material

**NEW QUESTION # 206**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen A client subcontracts production work to a vendor for production operations.

You need to model subcontracting of route operations in production orders.

Solution: Ensure that subcontracting of route operations supports back-flush costing.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

**NEW QUESTION # 207**

A manufacturing company is implementing Dynamics 365 Supply Chain Management.

You have a bill of materials (BOM) for each finished good. Finished goods may have subcontracted operation steps.

When a user views a BOM for a finished good, the finished good must be exploded automatically.

You need to configure the BOM lines.

What should you configure? To answer, drag the appropriate configurations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

**Explanation:**

## NEW QUESTION # 208
