

# Unlimited 300-445 Exam Practice, 300-445 Valuable Feedback

**300-445 ENNA Practice Test**

## Benefits of Online Cisco 300-445 Practice Test

**Wider Access to Learning Resources**  
Online education enables access to a wide range of learning materials and resources from around the world, anytime and anywhere.

**Customizable Learning**  
Online education platforms often provide content that can be tailored to each student's needs and learning pace, allowing for more personalized learning.

**Interactive and Engaging**  
The use of multimedia, such as videos, animations, and simulations, makes learning more interactive and interesting, increasing student engagement.

The advertisement features a blue background with several icons: a red bell, a green search icon, a green arrow pointing left, a white box with three yellow stars, a white report card with a red 'A+' grade, a red play button, and a white box with three yellow stars. Illustrations include a person sitting at a desk with a laptop, a person holding a laptop, and a person sitting at a desk with a laptop and a speech bubble containing icons of people.

What's more, part of that ExamsLabs 300-445 dumps now are free: <https://drive.google.com/open?id=1yln5eGlj0gVKQP2OSS4Jlu4JzI3jeG0w>

We are here divide grieves with you to help you pass your 300-445 exam with ease. You can abandon the time-consuming thought from now on. You won't regret your decision of choosing our 300-445 study guide. In contrast, they will inspire your potential without obscure content to feel. After getting our 300-445 Exam Prep, you will not live under great stress during the 300-445 exam period. You will experience a pleasant and leisure study method with boomed success!

Our company abides by the industry norm all the time. By virtue of the help from professional experts, who are conversant with the regular exam questions of our latest 300-445 exam torrent we are dependable just like our 300-445 test prep. They can satisfy your knowledge-thirsty minds. And our 300-445 Quiz torrent is quality guaranteed. By devoting ourselves to providing high-quality practice materials to our customers all these years we can guarantee all content is of the essential part to practice and remember.

## 300-445 Exam Questions - 300-445 Guide Torrent & 300-445 Test Torrent

We stress the primacy of customers' interests on our 300-445 training quiz, and make all the preoccupation based on your needs. We assume all the responsibilities our 300-445 practice materials may bring. They are a bunch of courteous staff waiting for offering help 24/7. You can definitely contact them when getting any questions related with our 300-445 Study Materials. And our staffs will help you in the first time with the most professional knowledge.

## Cisco Designing and Implementing Enterprise Network Assurance Sample Questions (Q23-Q28):

### NEW QUESTION # 23

An engineer is trying to configure a Page Load test and is trying to assign the east1-agent-1 to run it, but cannot see that agent listed. What is the reason that the designated agent does not appear?

- **A. The agent does not support Page load tests**
- B. The agent is still registering
- C. The agent is not running
- D. The agent is disabled

**Answer: A**

Explanation:

In the framework of Designing and Implementing Enterprise Network Assurance (300-445 ENNA), selecting the appropriate agent for specific test types is a critical configuration step. The ThousandEyes platform utilizes different agent binaries and capabilities depending on the underlying hardware and software environment. Specifically, Page Load tests and Transaction tests require the agent to have a browser engine (Chromium) installed and functional to render web content and measure DOM-related metrics.

According to the ENNA implementation guidelines, not all Enterprise Agents support these browser-based tests. The exhibit displays a "New Test" configuration screen where the engineer is searching for "east1-agent-1".

While other agents like "west-2-ag-1" are visible, the designated agent is missing because it does not support Page load tests (Option D). This common occurrence happens when an Enterprise Agent is deployed on resource-constrained hardware—such as certain Cisco Catalyst 9000 switches or Cisco ISR 4000 series routers—where the Chromium browser package is either not supported or has not been enabled due to memory and CPU limitations.

When an agent lacks the required capabilities for a specific test layer (e.g., Web layer tests), it is automatically filtered out from the selection list in the ThousandEyes portal to prevent invalid test configurations. To identify compatible agents, an engineer can look for the "Browser" or "Dual Chromium" labels in the agent settings. If the "east1-agent-1" were merely offline (Option A), disabled (Option B), or still registering (Option C), it would typically still appear in the list but with a status indicator showing its unavailability, rather than being entirely hidden from the test assignment menu. Therefore, the absence of the agent in a web-layer test configuration explicitly indicates a lack of functional support for the required browser-based metrics.

#### NEW QUESTION # 24

Which RFC defines the concept of passive monitoring in network assurance?

- A. RFC 7276
- **B. RFC 7799**
- C. RFC 7986
- D. RFC 791

**Answer: B**

Explanation:

RFC 7799 standardizes passive monitoring methodologies, providing guidelines for data collection without affecting network traffic.

#### NEW QUESTION # 25

Which Meraki Insight feature is crucial for diagnosing issues related to jitter in VoIP calls?

- A. Connectivity heat maps
- B. Traffic analytics
- **C. Voice quality monitoring**
- D. Application health scores

**Answer: C**

#### NEW QUESTION # 26

In the IT operations dashboard, while comparing the latest metrics, what is the time difference between Page Load time and DOM time?

- **A. 125.3 ms**
- B. 100 ms
- C. 150.4 ms
- D. 120.6 ms

**Answer: A**

Explanation:

Detailed Explanation:

This analysis requires extracting two specific browser-rendering metrics from the IT Operations Dashboard.

By placing the cursor over the latest metrics data points:

\* Page Load time: 1479.6 ms.

\* DOM load time: 1354.3 ms.

By subtracting the DOM time from the Page Load time ( $1479.6 \text{ ms} - 1354.3 \text{ ms} = 125.3 \text{ ms}$ ), the engineer identifies the duration spent rendering the page after the initial document structure was established.

#### NEW QUESTION # 27

Which integration type enables seamless data exchange between Cisco technologies and third-party ITSM platforms?

- **A. API**
- B. SNMP
- C. Alerting thresholds
- D. Open telemetry

**Answer: A**

Explanation:

API integration enables seamless data exchange between Cisco technologies and third-party ITSM platforms, facilitating automation and interoperability in network assurance.
