Our product is designed by experts in their respective fields, ensuring that our customers receive the most up-to-date and accurate ITIL ITIL4-DPI Exam Questions.

ITIL 4 Strategist: Direct, Plan and Improve (DPI) Sample Questions (Q36-Q41):

NEW QUESTION # 36

At the start of an organizational change initiative, the managers of an organization ensure that stakeholders know what the change is supposed to achieve and encourage them to discuss it.

Which organizational change management requirement does this MOST contribute to?

- A. Strong and committed leadership
- **B. Willing and prepared participants**
- C. Sustained improvement
- D. Clear and relevant objectives

Answer: B

Explanation:

DPI emphasizes that OCM must create willing and prepared participants by providing clarity on the change's purpose and encouraging open discussion. This builds trust, reduces resistance, and increases engagement. Objectives (A) and leadership (B) are important but are managerial aspects, not participant readiness. Sustained improvement (D) occurs later. The direct outcome of early communication and dialogue is prepared participants.

(Reference: ITIL 4 Strategist DPI, section on "Organizational change management - preparing participants")

NEW QUESTION # 37

A service provider has experienced a number of problems with their cloud storage service that have caused service outages. Problem management has successfully identified the cause of each incident, but further improvements to the service are considered necessary.

Which is the BEST example of using the 'continual improvement model' to guide improvements to the service?

- A. Use the model to assess and authorize changes to improve the cloud storage service
- **B. Use the model to identify and prioritize improvements to the cloud storage service**
- C. Use the model to restore and recover the cloud storage service each time the service fails
- D. Use the model to identify and compare improvements to the 'problem management' practice

Answer: B

Explanation:

The continual improvement model is applied to evaluate, prioritize, and implement improvements across services, practices, and processes. Here, the focus is the cloud storage service, not just the practice of problem management. Option B reflects the model's purpose—identify improvement opportunities, assess priorities, and act to prevent recurrence of failures. Options A, C, and D misapply the model to either specific practices or operational recovery, not holistic improvement.

(Reference: ITIL 4 Strategist DPI, section on "Applying the continual improvement model to services and practices")

NEW QUESTION # 38

An organization is drafting a plan to achieve its strategic goals and is ensuring that they consider the involvement of all appropriate stakeholders at all levels in the organization.

Which guiding principle are they applying?

- A. Keep it simple and practical
- **B. Collaborate and promote visibility**

- C. Think and work holistically
- D. Focus on value

Answer: B

Explanation:

The DPI guidance emphasizes collaboration and visibility as essential principles in planning. By ensuring all stakeholders at every level are engaged, the organization promotes shared ownership and transparency.

"Focus on value" (A) targets alignment to business outcomes, "Think and work holistically" (B) refers to systems thinking, and "Keep it simple and practical" (D) ensures clarity. The scenario most directly reflects collaboration and visibility. (Reference: ITIL 4 Strategist DPI, section on "Guiding principles - Collaborate and promote visibility")

NEW QUESTION # 39

Which type of plan would outline the organizational vision for a multi-year infrastructure expansion?

- A. Strategic
- B. Project
- C. Tactical
- D. Operational

Answer: A

Explanation:

According to ITIL DPI, planning occurs at strategic, tactical, and operational levels. A strategic plan defines long-term direction, including multi-year infrastructure expansion that aligns with business goals. Tactical plans break this down into departmental objectives, while operational plans manage day-to-day execution.

Project plans are temporary and specific but not long-term vision documents.

(Reference: ITIL 4 Strategist DPI, section on "Planning levels - strategic, tactical, operational")

NEW QUESTION # 40

A manager is planning which interfaces will be needed across the value stream when a new service is created. Which of these steps should be carried out FIRST?

- A. Identify tools that will be used to develop and deploy the service
- B. Identify practices that will be used to create and manage the service
- C. Identify utility and warranty requirements for the service
- D. Identify and involve stakeholders in the service

Answer: D

Explanation:

According to DPI, the first step in value stream planning is to involve stakeholders. Stakeholders help identify requirements, expectations, and dependencies, ensuring the value stream design supports utility (fit for purpose) and warranty (fit for use). Tools and practices (A and B) come later, once needs are clarified.

Utility and warranty requirements (C) are critical, but they must be established with stakeholder input, not in isolation.

(Reference: ITIL 4 Strategist DPI, section on "Value stream mapping - stakeholder involvement in design")

NEW QUESTION # 41

.....

our advanced operation system on the ITIL4-DPI learning guide will automatically encrypt all of the personal information on our ITIL4-DPI practice dumps of our buyers immediately, and after purchasing, it only takes 5 to 10 minutes before our operation system sending our ITIL4-DPI Study Materials to your email address, there is nothing that you need to worry about, and we will spare no effort to protect your interests from any danger and ensure you the fastest delivery.
