如果你是找考試資料或學習書籍？試試我們的免費的 Microsoft 的 MD-102 考題吧！這是一個免費試用考試PDF測

試版本的考題，你可以類比真實的考試情景，可以快速讓你掌握 Microsoft 的基礎知識。我們的 MD-102 權威考試題庫軟體是 Microsoft 認證廠商的授權產品。正確率100%，讓你一次性輕鬆通過 Microsoft MD-102 考試。

## 最新的 Microsoft 365 Certified MD-102 免費考試真題 (Q240-Q245):

### 問題 #240

Your network contains an on-premises Active Directory domain named contoso.com that syncs to Azure AD.

A user named User1 uses the domain-joined devices shown in the following table.

In the Microsoft Entra admin center, you assign a Windows 11 Enterprise E5 license to User1.

You need to identify what will occur when User1 next signs in to the devices.

What should you identify for each device? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

答案：

解題說明：

Explanation:

Device 1:

Will activate as Windows 11 Enterprise. According to Deploy Windows Enterprise licenses, Windows

11 Enterprise E5 license is a subscription license that can be assigned to users who have a supported and licensed version of Windows 10 Pro or Windows 11 Pro. Device 1 has Windows 11 Pro, so it meets the requirement. When User1 signs in to Device 1 with their Azure AD account, the device will automatically activate as Windows 11 Enterprise without changing the edition.

Will not activate as Windows 11 Enterprise. According to Deploy Windows Enterprise licenses, Windows 11 Enterprise E5 license is a subscription license that can be assigned to users who have a supported and licensed version of Windows 10 Pro or Windows 11 Pro. Device 2 has Windows 10 Home, so it does not meet the requirement. When User1 signs in to Device 2 with their Azure AD account, the device will not activate as Windows 11 Enterprise by subscription.

### 問題 #241

Your on-premises network contains an Active Directory Domain Services (AD DS) domain.

You have an Azure subscription that contains a virtual network named VNet1. VNet1 contains five virtual machines and is NOT connected to the on-premises network.

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You purchase Windows 365 Enterprise licenses.

You need to deploy Cloud PC. The solution must meet the following requirements:

\* All users must be able to access their Cloud PC at any time without any restrictions.

\* The users must be able to connect to the virtual machines on VNet1.

How should you configure the provisioning policy for Windows 365? To answer, drag the appropriate options to the correct settings. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

答案：

解題說明：

### 問題 #242

You have a Microsoft 365 tenant that contains the objects shown in the following table.

In the Microsoft Intune admin center, you are creating a Microsoft 365 Apps app named App1. To which objects can you assign App1?

- A. Group1, Group3, and Group4 only
- B. Admin1, Group1, Group2, Group3, and Group4
- C. Admin1, Group3, and Group4 only
- D. Group3 and Group4 only
- E. Group1, Group2, Group3, and Group4 only

答案： A

**解題說明:**

In the Microsoft Intune admin center, you can assign apps to users or devices. Users can be assigned to apps by using user groups or individual user accounts. Devices can be assigned to apps by using device groups. In this scenario, the objects shown in the table are as follows:

- \* Admin1 is an individual user account that belongs to the Global administrators role group.
- \* Group1 is a user group that contains 100 users.
- \* Group2 is a device group that contains 50 devices.
- \* Group3 is a user group that contains 200 users.
- \* Group4 is a device group that contains 150 devices.

Since App1 is a Microsoft 365 Apps app, it can only be assigned to users, not devices. Therefore, Group2 and Group4 are not valid objects for app assignment. Admin1 is also not a valid object for app assignment, because individual user accounts can only be used for testing purposes, not for production deployment.

Therefore, the only valid objects for app assignment are Group1 and Group3, which are user groups.

**問題 #243**

In Microsoft Intune, you have the device compliance policies shown in the following table.

- The Intune compliance policy settings are configured as shown in the following exhibit.
  - On June 1, you enroll Windows 10 devices in Intune as shown in the following table.
  - For each of the following statements, select Yes if the statement is true. Otherwise, select No.
- NOTE: Each correct selection is worth one point.

**答案:**

**解題說明:**

Device 1 is Windows 10 - and policy 1 is for Windows 8. Default compliance for devices without a policy is not compliant so first 2 questions are NO.

Then the third device has 2 policies, the first one is compliant and the second policy is not compliant but the device is not marked as non-compliant due to the fact that mark device as non-compliant is set to 10 days. This means that the machine will be compliant until June 10th.

Source:

Mark device non-compliant: By default, this action is set for each compliance policy and has a schedule of zero (0) days, marking devices as non-compliant immediately.

When you change the default schedule, you provide a grace period in which a user can remediate issues or become compliant without being marked as non-compliant.

This action is supported on all platforms supported by Intune.

<https://docs.microsoft.com/en-us/mem/intune/protect/actions-for-noncompliance>

**問題 #244**

You have a Microsoft 365 subscription.

You have 25 Microsoft Surface Hub devices that you plan to manage by using Microsoft Intune.

You need to configure the devices to meet the following requirements:

- \* Enable Windows Hello for Business.
- \* Configure Microsoft Defender SmartScreen to block users from running unverified files.

Which profile type template should you use for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**答案:**
