Latest SAFe-RTE VCE Torrent & SAFe-RTE Pass4sure PDF & SAFe-RTE Latest VCE

BONUS!!! Download part of Prep4SureReview SAFe-RTE dumps for free: https://drive.google.com/open?id=1PL-UMV9EVB46AqKSKk9hHvS_os63jZJh

You must ensure that you can pass the exam quickly, so you must choose an authoritative product. Our SAFe-RTE exam materials are certified by the authority and have been tested by our tens of thousands of our worthy customers. This is a product that you can definitely use with confidence. And with our SAFe-RTE training guide, you can find that the exam is no long hard at all. It is just a piece of cake in front of you. What is more, you can get your SAFe-RTE certification easily.

We provide three versions of SAFe-RTE study materials to the client and they include PDF version, PC version and APP online version. Different version boosts own advantages and using methods. The content of SAFe-RTE exam torrent is the same but different version is suitable for different client. For example, the PC version of SAFe-RTE study materials supports the computer with Windows system and its advantages includes that it simulates real operation exam environment and it can simulates the exam and you can attend time-limited exam on it. And whatever the version is the users can learn the SAFe-RTE Guide Torrent at their own pleasures. The titles and the answers are the same and you can use the product on the computer or the cellphone or the laptop.

Scaled Agile SAFe-RTE Valid Braindumps Book & New SAFe-RTE Test Pass4sure

In order to help you save more time, we will transfer SAFe-RTE test guide to you within 10 minutes online after your payment and

guarantee that you can study these SAFe-RTE training materials as soon as possible to avoid time waste. We believe that time is the most valuable things in the world. This is why we are dedicated to improve your study efficiency and production. Here are some advantages of our SAFe-RTE study question and we would appreciate that you can have a look to our SAFe-RTE questions.

Scaled Agile SAFe-RTE (SAFe Release Train Engineer) Exam is an important certification for individuals who want to excel in the field of agile development. SAFe Release Train Engineer certification is offered by Scaled Agile, which is a leading provider of agile methodologies and frameworks. The SAFe-RTE Exam is designed to test the knowledge and skills of individuals who are responsible for overseeing the release train in a SAFe environment.

Scaled Agile SAFe Release Train Engineer Sample Questions (Q188-Q193):

NEW QUESTION # 188
At the end of day two of the Program Increment (PI) Planning event, the team's final plan review covers what information?

- A. Changes to capacity and load, final PI objectives, program risks and impediments
- B. Team Features, Stories, and team-level enablers
- C. Changes to iteration goals, measured velocity, and dependencies
- D. Planned Features, uncommitted objectives, and ROAMed risks

Answer: D

Explanation:
At the end of day two of the Program Increment (PI) Planning event, the team's final plan review covers the Planned Features, uncommitted objectives, and ROAMed risks. This is a timeboxed session where teams present their final plans, PI Objectives, and risks and impediments12. The focus is on what the teams plan to deliver (Planned Features), the objectives that they aim to achieve but are not committed (uncommitted objectives), and the risks that have been identified and categorized according to the ROAM framework (Resolved, Owned, Accepted, Mitigated)2. This session is crucial as it provides a clear picture of the team's direction and preparedness for the upcoming Program Increment. It also allows for transparency and alignment among all members of the Agile Release Train (ART).

NEW QUESTION # 189
Which skill do Release Train Engineers (RTEs) have the opportunity to regularly practice and improve?

- A. Continuous Integration
- B. Test-driven development
- C. Servant leadership
- D. Return-on-investment (ROI) projections

Answer: C

Explanation:
Release Train Engineers (RTEs) have the opportunity to regularly practice and improve the skill of servant leadership. This skill is central to the RTE role in the SAFe framework, as RTEs are expected to be servant leaders and coaches to their Agile Release Trains (ARTs).
Servant leadership involves focusing on the needs of others, especially team members, before considering one's own. It requires the leader to ensure that other people's highest priority needs are being served to encourage teamwork and personal involvement. An RTE practicing servant leadership will:
1.Facilitate and Support: Help teams navigate through the SAFe processes, removing impediments and fostering an environment where teams can be effective1.
2.Coach and Mentor: Provide guidance to teams, Scrum Masters, and other stakeholders in Lean-Agile practices and mindsets1.
3.Lead by Example: Demonstrate the principles of Lean-Agile leadership, embodying the values and principles of SAFe in their daily work1.
4.Drive Continuous Improvement: Encourage and lead the efforts for relentless improvement within the ART, promoting a culture of innovation and continuous learning1.
5.Communicate and Align: Ensure that everyone on the ART understands the mission, vision, and goals, and is aligned in their efforts to achieve them1.
By regularly practicing and improving their servant leadership skills, RTEs can effectively lead their ARTs to deliver value more efficiently and foster a healthy, collaborative, and high-performing team environment.

NEW QUESTION # 190

Which action describes the behavior of applying Systems Thinking for a Release Train Engineer (RTE)?

- A. Facilitates individual decision-making over team-level decision-making
- B. Examines what may be missing to make the environment better for the team
- C. Encourages the team to express opinions in all circumstances
- D. Demonstrates appreciation to team members in many ways

Answer: B

NEW QUESTION # 191

What is the name of the event where all team members determine how much of the team's backlog they can commit to delivering during an upcoming Iteration?

- A. Solution Demo
- B. Iteration planning
- C. Backlog refinement
- D. Solution planning

Answer: B

Explanation:
The event where all team members determine how much of the team's backlog they can commit to delivering during an upcoming Iteration is known as Iteration Planning. This is a core event in the Scaled Agile Framework (SAFe) where teams select stories from the Team Backlog and commit to executing a set of them in the upcoming Iteration. The purpose of Iteration Planning is to organize the work and define a realistic scope for the Iteration, ensuring that the team's capacity and the complexity, size, and dependencies of each story are considered1.
During Iteration Planning, the following activities take place:
* The Product Owner (PO) typically starts the event by presenting high-priority stories from the Team Backlog and any preliminary Iteration Goals.
* The team then collaborates to define, organize, and commit to the work for the next Iteration, summarizing this work as a set of committed Iteration Goals.
* The Iteration Planning meeting is timeboxed to ensure focus and efficiency, and it results in a clear commitment from the team to the Iteration Goals1.
This event is distinct from Backlog Refinement, Solution Planning, and Solution Demo, which serve different purposes within the SAFe framework. Iteration Planning is specifically about the commitment to the Iteration's delivery and is the first event of the Iteration1.

NEW QUESTION # 192

What is an example of Scrum Master servant leader behavior?

- A. Keeps their opinions to themselves
- B. Focuses on the day-to-day team activities
- C. Strives to create a conflict-free environment
- D. Uses persuasion instead of authority

Answer: D
