In addition, once you have used this type of PRINCE2-Agile-Foundation exam question online for one time, next time you can practice in an offline environment. The PRINCE2-Agile-Foundation Test Torrent can be used for multiple clients of computers and mobile phones to study online, as well as to print and print data for offline consolidation. And we are pleased to suggest you to choose our PRINCE2-Agile-Foundation exam question for your exam.

PRINCE2 Agile Foundation Sample Questions (Q155-Q160):

NEW QUESTION # 155

What should be included in the project management team structure?

- A. The procurement and contract needs
- **B. A description of how products are to be produced**
- C. A full and firm foundation for the initiation of the project
- D. The arrangements for co-location of remote teams

Answer: B

Explanation:

Agile Foundation guidance, aligned with PRINCE2 and PRINCE2 Agile, explains that the project management team structure defines how the project will be managed and delivered, including clarity around roles, responsibilities, and ways of working. A key element that should be included within this structure is a description of how products are to be produced, making option D the correct answer.

The project management team structure is not just a list of roles; it provides context on how delivery will operate in practice. This includes how teams are organized, how responsibilities are allocated, and how products will move from concept to completion. Describing how products are to be produced ensures there is shared understanding of the delivery approach, whether it is Agile, iterative, hybrid, or otherwise. This clarity supports coordination, accountability, and effective governance throughout the project lifecycle.

Option A, procurement and contract needs, belongs more appropriately to commercial or procurement management considerations rather than the team structure itself. Option B, a full and firm foundation for initiation, describes the purpose of the initiation stage rather than the contents of the team structure. Option C, arrangements for co-location or remote teams, relates to communication and working practices, which may support delivery but do not define the management structure.

Agile Foundation documents emphasize transparency and alignment between governance and delivery. Including a description of how products are to be produced within the project management team structure helps bridge management expectations with Agile delivery practices. It ensures that all stakeholders understand how work will be organized, how decisions will be made, and how value will be delivered. This supports Agile principles such as collaboration, empowerment, and adaptability while maintaining clear project-level control and accountability.

NEW QUESTION # 156

Which process can take place during a release review workshop?

- A. Directing a project
- B. Controlling a stage
- C. Managing a stage boundary
- **D. Managing product delivery**

Answer: D

NEW QUESTION # 157

Which statement explains how the 'learn from experience' principle is applied in an agile context?

- A. It focuses on the prioritization and decomposition of requirements
- B. It provides guidance on mapping PRINCE2 roles to an agile environment
- C. It integrates releases within management stages
- **D. It is supported by the 'inspect and adapt' concept**

Answer: D

NEW QUESTION # 158

What role does AI play in addressing project complexity within PRINCE2 Agile?

- **A. It helps reduce uncertainty and ambiguity associated with change initiatives**
- B. It helps reduce all sources of project complexity

- C. It ensures stakeholder involvement in all decision-making
- D. It adds layers of complexity through excessive automation

Answer: A

Explanation:

Artificial Intelligence (AI) in PRINCE2 Agile is recognized as a tool that can assist in reducing uncertainty and ambiguity by providing data-driven insights, predictive analytics, and automation of routine tasks. This support helps teams better understand changing environments and respond faster, thereby addressing complexity associated with change initiatives.

While AI can add complexity if misused, PRINCE2 Agile focuses on its beneficial role in supporting decision-making and reducing unknowns rather than complicating governance or communication.

NEW QUESTION # 159

Which two statements are key responsibilities of supplier representative?

1. They highlight areas that the project may impact from a technical perspective.
2. They are partially assigned to the delivery team.
3. They create the project's specialist products.
4. They prioritize requirements.

- A. 1 and 4
- B. 3 and 4
- C. 2 and 3
- D. 1 and 2

Answer: A
