GARP Sustainability and Climate Risk Sample Questions (Q83-Q88):

NEW QUESTION # 83

A natural gas production company makes a 2040 net-zero commitment. Before publicly announcing the commitment, the company sustainability team verifies the credibility and transparency of the company net-zero commitment to minimize any greenwashing claims. What action will the team most likely take to strengthen the credibility of the company net-zero commitment?

- A. Offset future GHG emissions that cannot be avoided with carbon credits.
- B. Develop and promote a comprehensive media campaign announcing the company net-zero commitment.
- C. Utilize existing internal audit processes in the absence of external audit verification providers.
- **D. Develop interim targets and implement third-party verification aligned with established standards.**

Answer: D

NEW QUESTION # 84

A European bank considers investing in an offshore wind farm project. A bank ESG analyst assists in the origination and execution of green and sustainable finance transactions to finance the project. The analyst recommends a loan to finance the project by gathering related materials on sustainability-linked loans (SLLs), green loans, and corresponding market trends. Which of the following loans is the analyst likely to recommend?

- A. Green loan because it offers greater flexibility of use than SLLs as green loans do not have loan usage reporting requirements.
- **B. SLL because the total volume of SLLs exceeded that of green loans over the past 5 years.**
- C. SLL because SLL issuance is highly concentrated in renewable energy projects and the power generation sector.
- D. Green loan because in contrast to SLLs, green loans are rapidly being adopted by a variety of sectors and tied to numerous KPIs.

Answer: B

NEW QUESTION # 85

To comply with publicly stated climate goals, a country dependent on fossil fuel production begins phasing out oil production facilities. Climate activists largely celebrate this commitment, while expressing concern for a just transition. Which of the following just transition programs will the activists most likely support?

- **A. A national scholarship program to retrain displaced workers from carbon-intensive industries**
- B. An annual tax rebate for workers transitioning to jobs outside of carbon-intensive industries
- C. Increased funding for researchers examining alternatives to carbon-intensive fuel sources
- D. Subsidies provided to low-income residents who use carbon-intensive fuels

Answer: A

NEW QUESTION # 86

The national meteorological agency of a small African nation forms a team to identify and assess extreme climate events in the region. The team leader introduces extreme attribution science along with data and techniques used to connect climate change to extreme events.

To attribute extreme events to climate change, what information will be most useful for the team to collect?

- A. Community exposure to increased flooding events
- B. Future projections of global emissions
- C. Cross-hatching that indicates climate model agreement
- **D. Statistical analysis of historic drought occurrences**

Answer: D

NEW QUESTION # 87

To inform climate policy in a European country, a coalition of government scientists prepares a report on future climate conditions. Within the report, the scientists summarize how positive feedback loops accelerate the rate of climate change. Which feedback loop will the scientists most likely include in the coalition report?

- A. Thawing permafrost near polar regions absorbs CO₂ which slows global warming and increases thawing.
- B. Rising sea levels increase the total mass of global oceans, leading to increased oceanic carbon absorption and growing calcification for sea life.
- C. Warmer air temperatures can hold higher amounts of water vapor, leading to higher temperatures and increased water vapor.
- D. Melting sea ice increases solar energy reflection, which intensifies the albedo in polar regions and leads to more global warming.

Answer: C

NEW QUESTION # 88

.....
